HR · PAYROLL · ATTENDANCE — PAKISTAN

HR Payroll System Flow

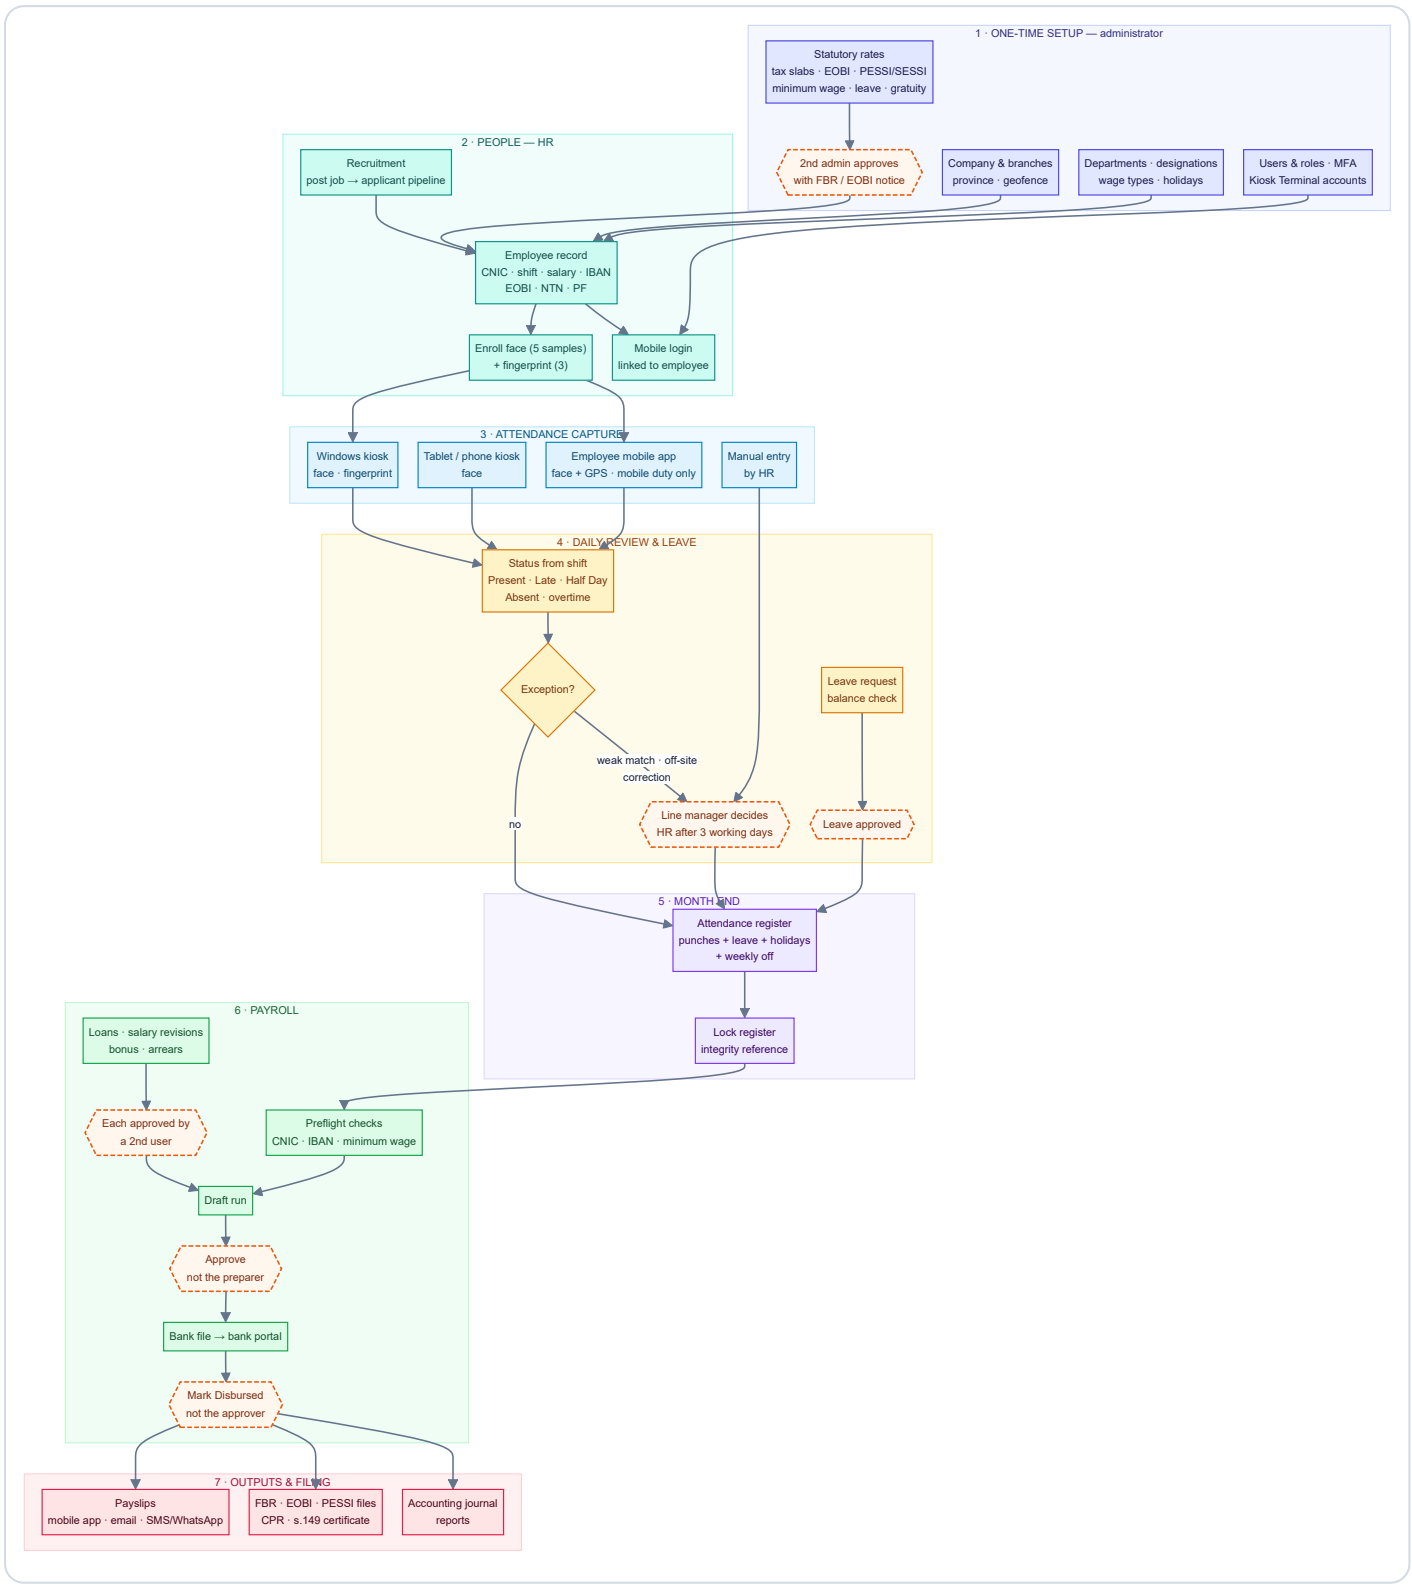

How work moves through the system, from one-time setup to a paid salary and filed returns. Each colour is one area of the system. Dashed orange boxes are steps that need a second person (maker-checker) — the system will not let the same person do both.

Setup (once) | People | Attendance capture | Review & leave

Month-end lock | Payroll | Outputs & filing | Second-person approval

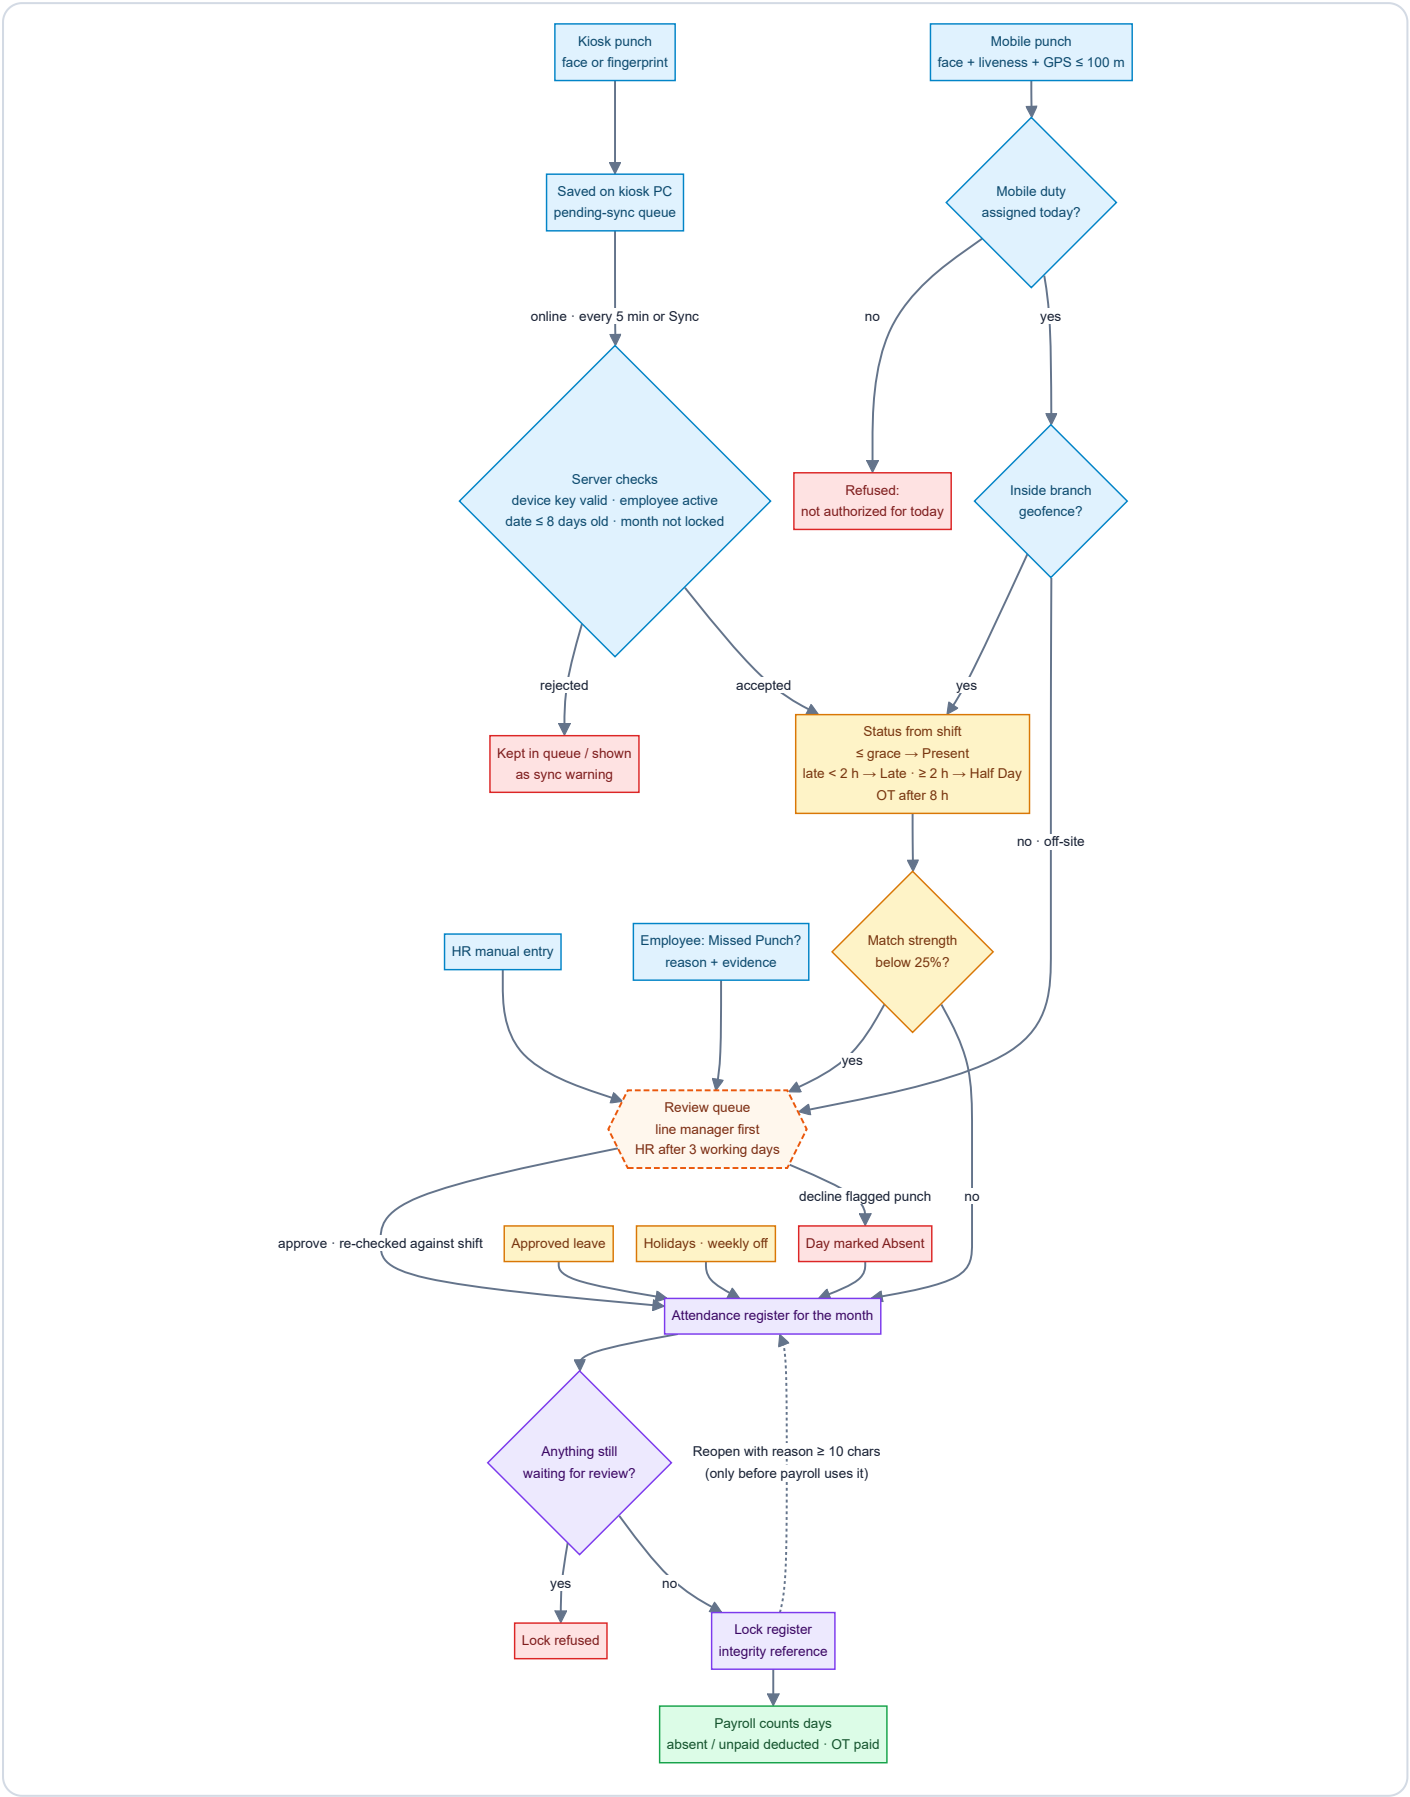

The big picture 7 AREAS · END TO END

Read top to bottom. Setup feeds the employee record; punches become a daily status; exceptions are reviewed; the month is locked; payroll is prepared, approved and paid; payslips and statutory files come out the end.

Punch to paid day ATTENDANCE · REVIEW · REGISTER

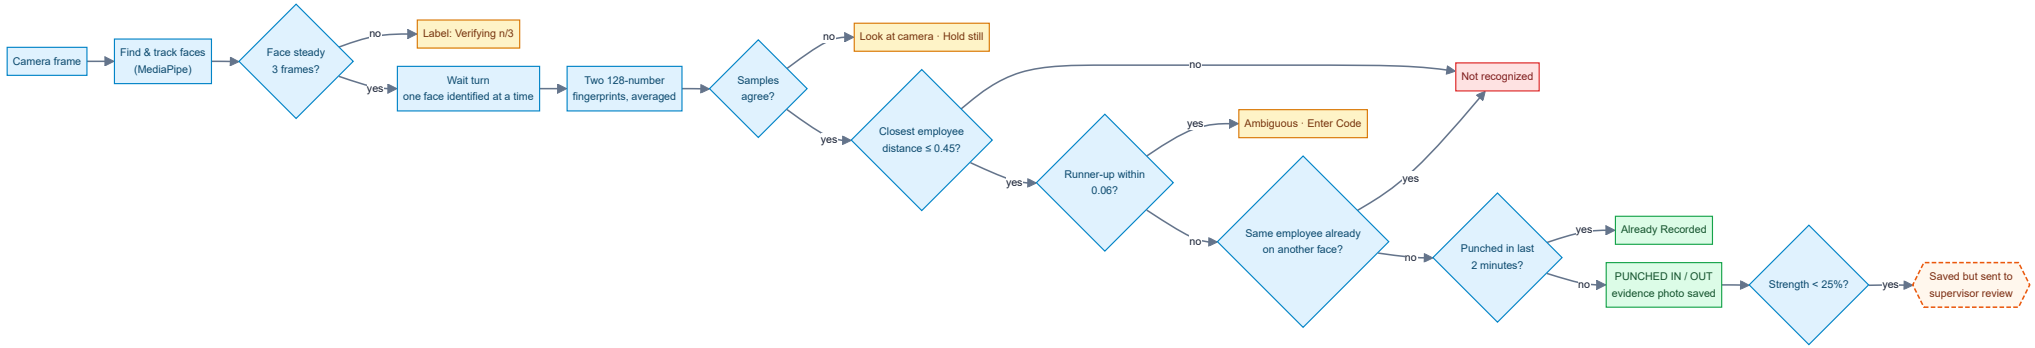

Every punch is saved on the device first and sent to the server; the server accepts it only from a registered kiosk or a signed-in employee with mobile duty. Anything unusual waits for a person before the month can be locked.

Face recognition at the kiosk

MULTI-FACE STREAM · VERSION 1.0.2+

Each face is turned into a 128-number identity fingerprint and compared with the employee's 5 enrolled samples. Distances are small for the same person (about 0.1–0.4) and large for different people (above about 0.55).

Enrollment

5 samples with a left/right head turn; all 5 must agree, and the face must not already belong to another employee.

Thresholds

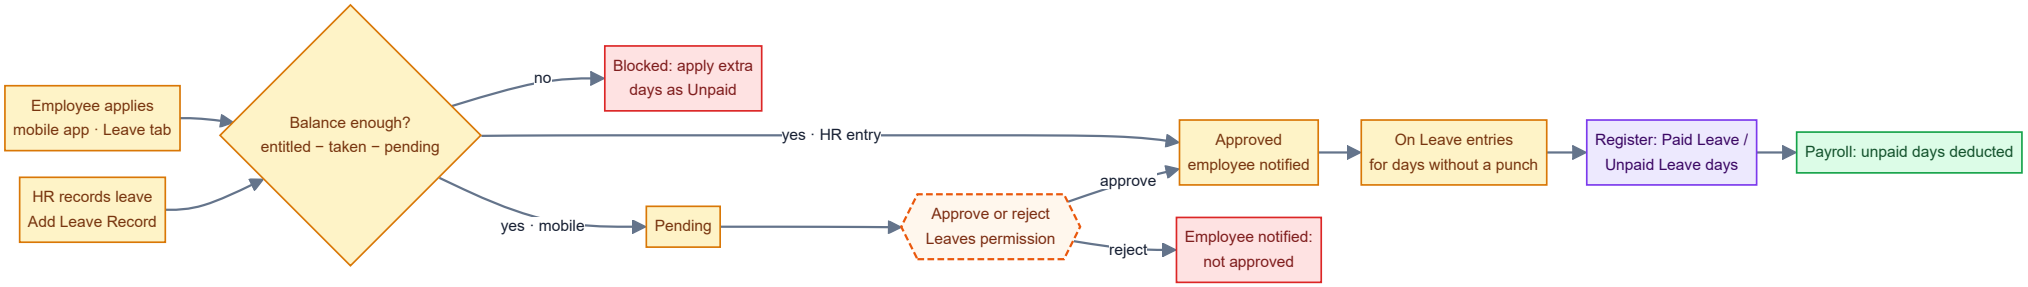

`0.45` without a code · `0.50` with an employee code · runner-up margin `0.06`.

Liveness

1-on-1 mode asks for Center → Left → Center → Right; photos and screens fail the check.

Leave

REQUEST · BALANCE · REGISTER

Yearly days (default)

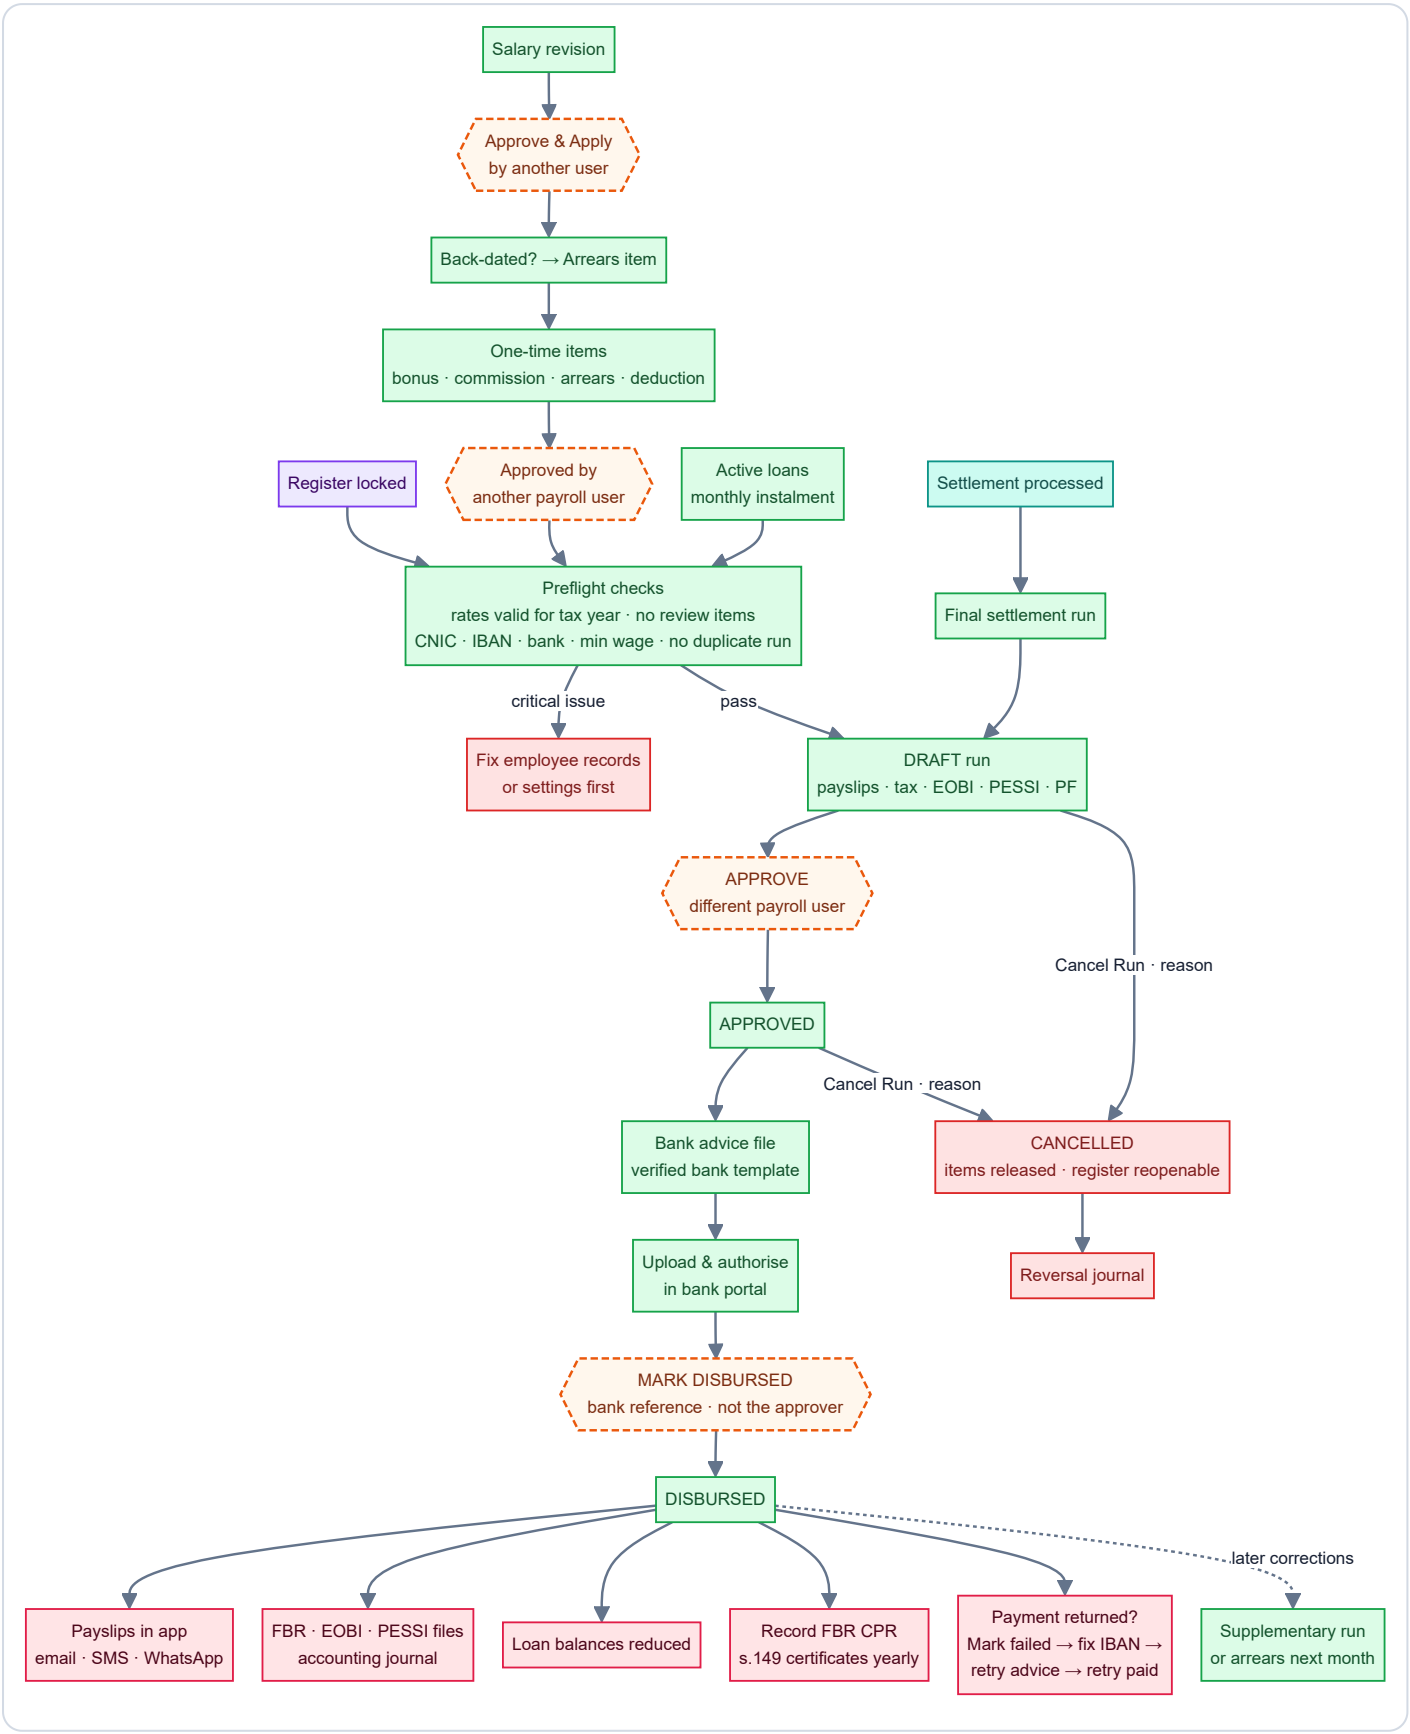

Annual **14** · Casual **10** · Sick **16** · Maternity **90** · Paternity & Hajj **0** until set.

Pro-rata

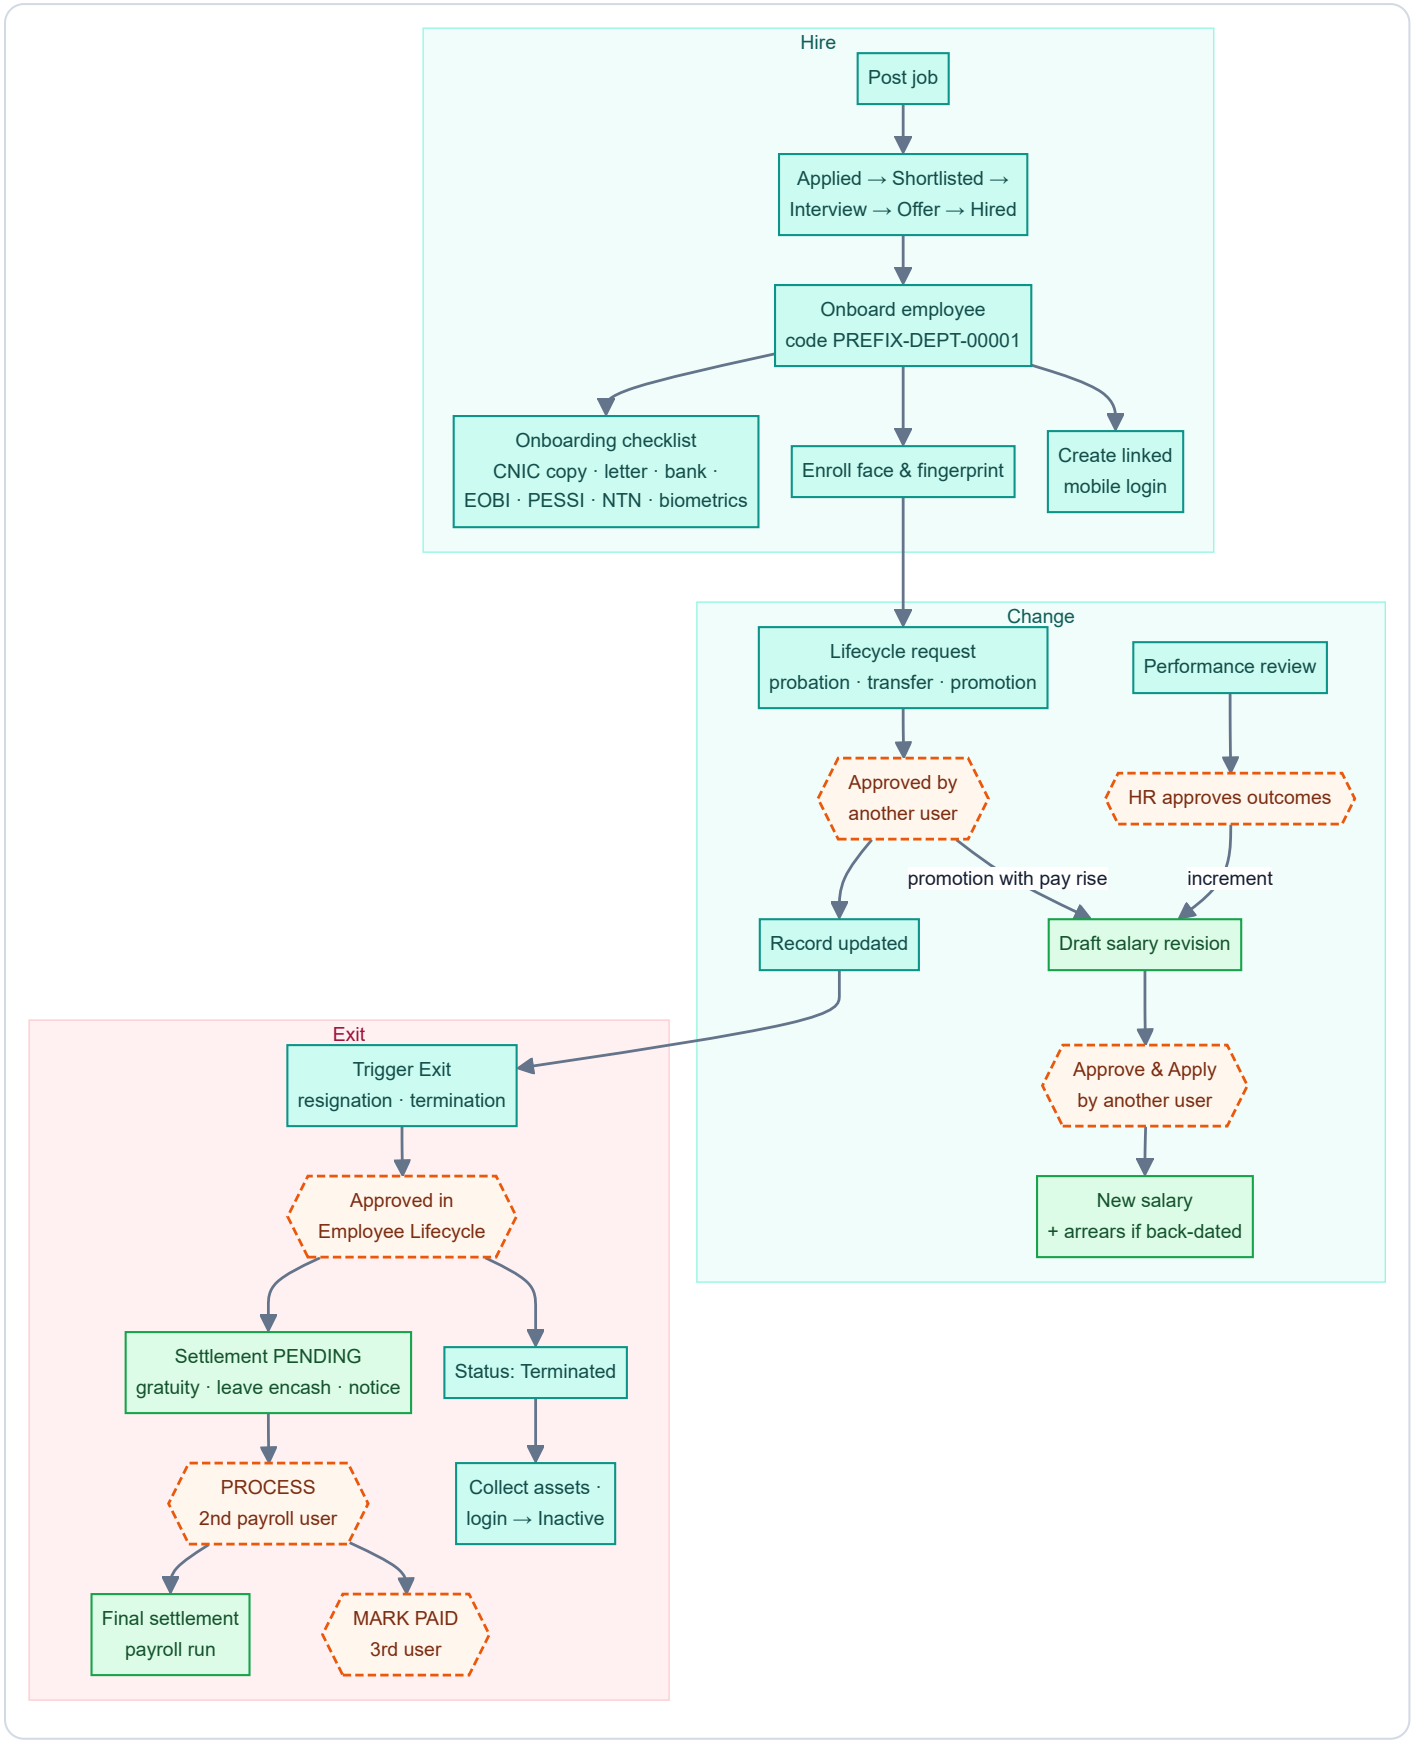

Annual and casual leave are reduced for people who joined during the year (January–December).

Payroll cycle DRAFT · APPROVED · DISBURSED

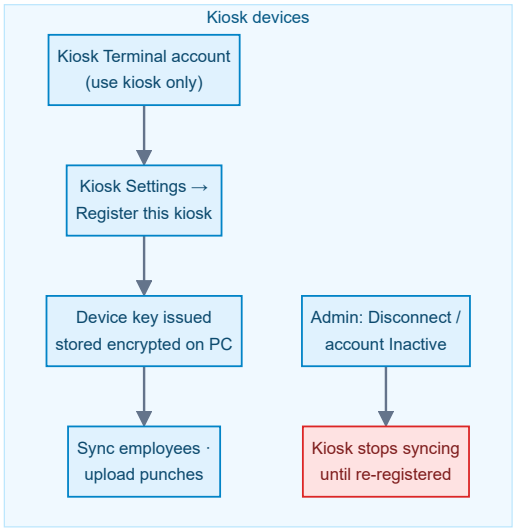

Three controls protect every salary: the preparer cannot approve, the approver cannot mark it paid, and a paid run can never be changed — corrections go into a later month.

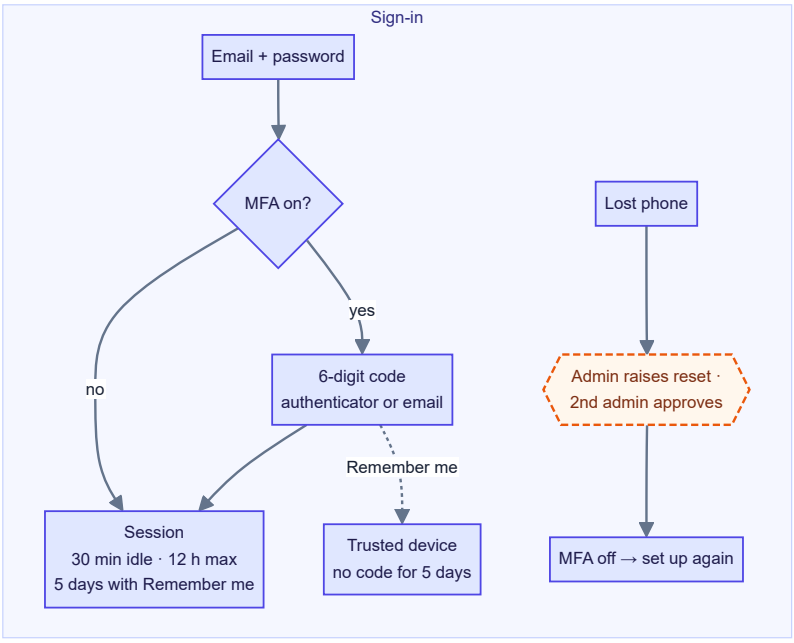

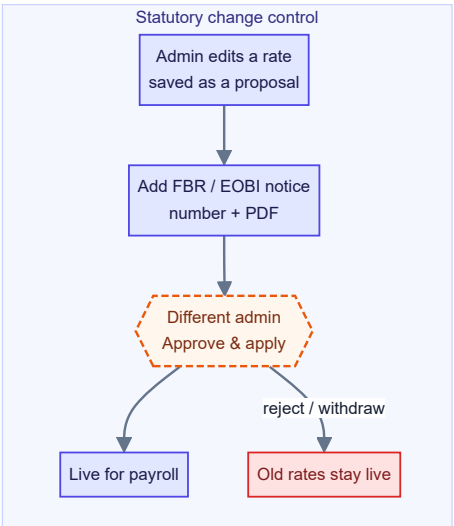

Employee lifecycle HIRE · CHANGE · EXIT

Rates, access & kiosks CHANGE CONTROL · SIGN-IN · DEVICES

Matches the system as of 17-Oct-2026 (web portal, mobile app, kiosk 1.0.2). Thresholds shown are the defaults; administrators can change leave days, alert limits and the low-confidence level in 1. Statutory Config.
