COMPLETE USER GUIDE · A TO Z

# HR, Payroll & Attendance System

Step-by-step instructions for everyone who uses it — written in plain language, with pictures of every screen.

**Web portal**
For HR, payroll and administrators, in any web browser.

**Mobile app**
For employees on Android phones: attendance, leave and payslips.

**Attendance kiosk**
For the entrance: Windows PC or tablet with face and fingerprint.

Guide edition: 17-Oct-2026 · Kiosk app version 1.0.2 and later
All names, codes and amounts in the pictures belong to an imaginary company ("Demo Textiles") and are examples only.

I2 Common messages and what to do 94
I3 Routines at a glance 95
I4 Words used in this guide 96

PART A

# Getting started

What the system is, who does what, how to sign in safely, and how to find your way around. Everyone should read this part.

# A1 How to use this guide

This guide explains every screen of the system, one step at a time. You do not need any technical knowledge. Follow the numbered steps in order.

- **Words in a green box** like **Save Settings** are exactly what you will see on screen — a button, a menu item or a field name. Look for those words and click (or tap) them.
- Text in *italics* is a message the system shows you.
- Pictures show the screen you should see. Your company name, people and amounts will be different.

> **Tip — read only what you need**
>
> Find your job in the table "Who does what" (section A3), then read Part A and the parts listed for your job.

> **Coloured boxes**
>
> **Green (Tip)** — a helpful shortcut. **Amber (Important)** — read this before you continue. **Red (Warning)** — mistakes here can affect salaries or delete data. **Blue (Good to know)** — background information.

# A2 What the system does

The system keeps all your staff information in one safe place and uses it to pay people correctly under Pakistani law. In simple words:

1. **You record your company and your rules once** — tax slabs, EOBI, provincial social security (PESSI / SESSI etc.), minimum wage, leave days, holidays.
2. **You add your employees** — personal details, CNIC, job, shift, salary and bank account.
3. **Employees mark attendance** — at a kiosk with their face or fingerprint, or on their phone with face check and GPS when working outside the office.
4. **HR checks attendance and leave** and approves anything unusual.
5. **Each month the attendance register is locked**, so nobody can change it after payroll uses it.
6. **Payroll is calculated** (tax, EOBI, social security, provident fund, loans), **checked by a second person**, and a **bank file** is produced for salary transfer.
7. **Employees see their payslips** in the mobile app (in English or Urdu), and you produce the FBR, EOBI and social-security files.

**Punch** → **Attendance register** → **Lock month** → **Payroll run** → **Second-person approval** → **Bank file & payment** → **Payslips & returns**

## Two-person checking ("maker-checker")

Many important actions need **two different people**: one person prepares the change (the *maker*) and another person checks and approves it (the *checker*). The system will not let you approve your own work — the approve button is greyed out for you. This protects the company and you from mistakes and fraud.

| What needs a second person | Where |
|---|---|
| Changes to tax, EOBI, minimum wage and other legal rates | 1. Statutory Config |
| Salary increases and promotions | 9. Salary Revisions, 12. Employee Lifecycle |
| Transfers, probation, resignations and terminations | 12. Employee Lifecycle |
| Attendance corrections and manual attendance entries | 7. Attendance |
| Bonuses, arrears and other one-time payroll items | 10. Payroll Processing |
| Approving a payroll run (the preparer cannot approve) and paying it (the approver cannot mark it paid) | 10. Payroll Processing |
| Final settlements (a third person marks them paid) | 11. Gratuity & Settlement |
| Resetting someone's two-step verification (MFA) | User Management |

## The three ways to use the system

| App | Who uses it | Where to read |
|---|---|---|
| **Web portal** — opened in Chrome, Edge or another browser | Administrators, HR, payroll, managers | Parts A–E, H–J |
| **Mobile app** — "Bin Ishaq HR Suite" on Android | Employees (and phones/tablets used as a kiosk) | Part F |
| **Attendance kiosk** — Windows program "Bin Ishaq Attendance Kiosk" | Placed at the entrance; employees use it to punch in and out | Part G |

# A3 Who does what (roles)

Every login has a **role**. The role decides which menu items a person sees. An administrator sets roles in **User Management** (see section B5).

| Role | What this person can do | Read these parts |
|---|---|---|
| **Super Admin** | Everything, including users, roles and legal rates. Keep this role for one or two trusted people. | All |
| **HR Manager** | Employees, recruitment, performance, assets, holidays, leave, attendance, biometric devices, loans, salary revisions, employee lifecycle. | A, C, D, H, J |
| **Payroll Specialist** | Payroll runs, payslips, bank files, statutory returns, loans, salary revisions, gratuity and settlements. | A, E, H, J |
| **Employee** | Uses only the mobile app: own attendance (when allowed), leave requests and own payslips. | F |
| **Kiosk Terminal** | A special account used only to switch on an attendance kiosk. It cannot see any other data. | G |

The menu each permission opens:

| Menu item | Permission needed (as shown in the Roles & permissions table) |
|---|---|
| Operations Dashboard | Dashboard |
| 1. Statutory Config · 2. Company & Master Data · Master Data | Settings |
| 3. Employee Directory · Recruitment · 12. Employee Lifecycle | Employees |
| Performance | Employees (managers) — others see only their own approved reviews |
| Asset Management | Employees or Settings |
| 4. Holiday Calendar | Attendance or Settings |
| 5. Leave Management | Leaves |
| 6. Biometric Devices | Attendance or Employees |
| 7. Attendance | Attendance (the mobile-duty panel also needs Mobile duty) |
| 8. Loans & Advances · 9. Salary Revisions | Payroll or Employees |
| 10. Payroll Processing · 11. Gratuity & Settlement | Payroll |
| Data Backup | Users & roles or Settings |
| User Management | Users & roles |

**Important — use separate people for payroll**

To pay salaries you need at least **two** people with payroll permission: one prepares the run, another approves it. The system recommends **three** (prepare, approve, mark paid). The dashboard check "Three separate payroll users" stays red until you have them.

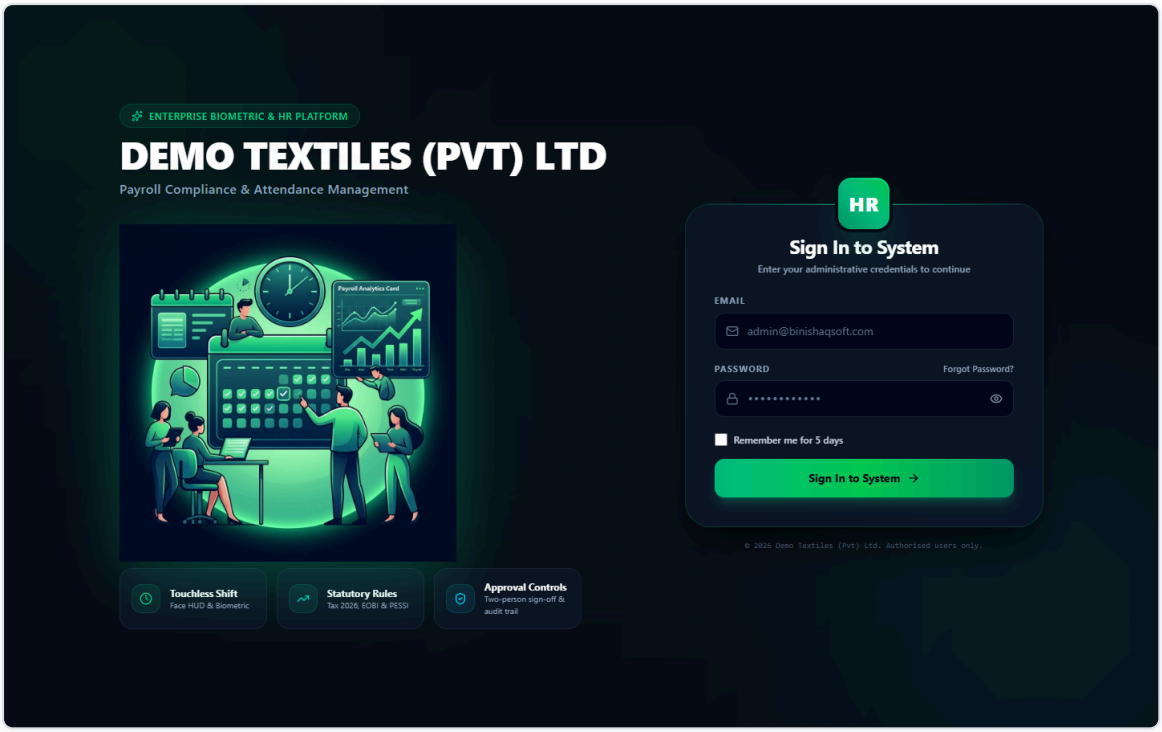

# A4 First-time setup of a brand-new system

This happens **only once**, the very first time the system is opened and no accounts exist yet. If your company already uses the system, skip this section.

1. Open the web address of your system. Because there are no accounts yet, the **DATABASE SETUP WIZARD** appears instead of the sign-in page.
2. Fill in **Company Name**, **Super Admin Full Name**, **Super Admin Email** and **Super Admin Password**. The boxes contain sample text — replace all of it.
3. Choose a strong password of **at least 12 characters**. Write it down and keep it somewhere safe.
4. Click **Initialize Database & Sign In**. You are signed in as the first Super Admin.
5. Now work through the numbered menu items in order, starting with **1. Statutory Config** (Part B), and set up two-step verification (section A6).

> **Good to know**
>
> Once any account exists, the setup wizard can never be used again — this stops anyone from taking over your system. If the wizard says *This system is already set up. Sign in with an existing account.*, use the normal sign-in page.

# A5 Signing in and signing out

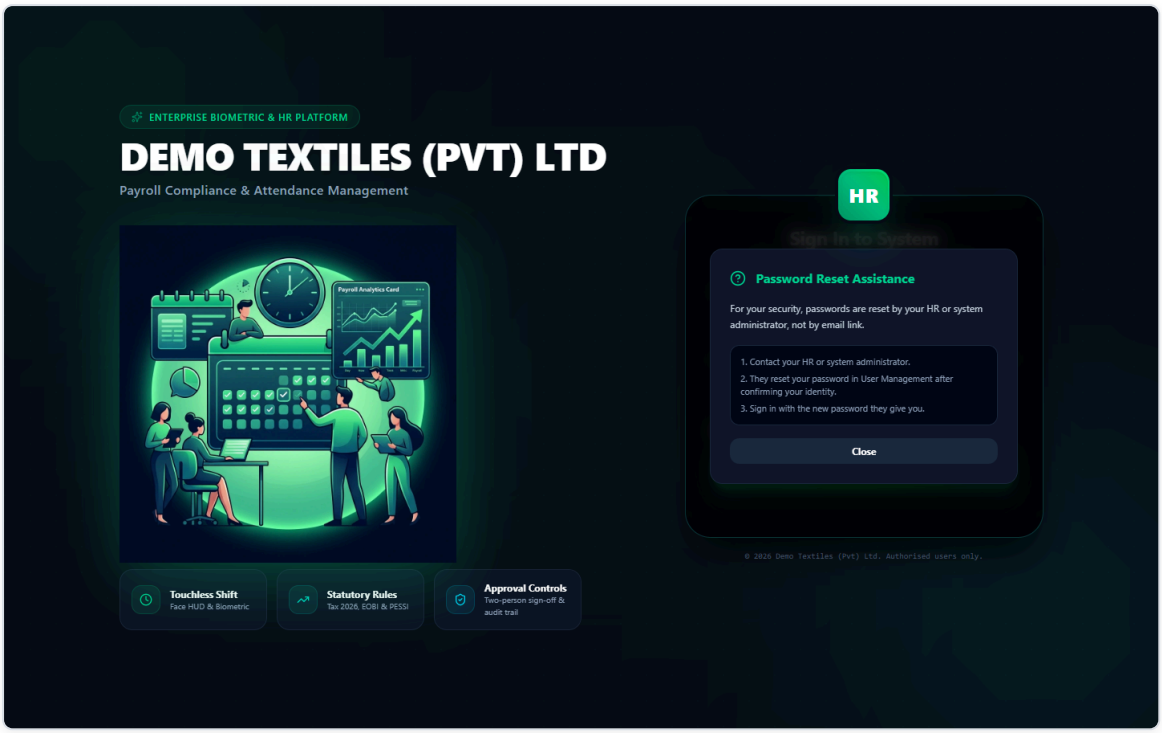

**The sign-in page.** Your company name appears on the left.

1. In **EMAIL**, type your email address.
2. In **PASSWORD**, type your password. Click the eye symbol to see what you typed. If you see *Caps Lock is ON*, press the Caps Lock key once.
3. Tick **Remember me for 5 days** only on your **own** computer or phone (never on a shared one).
4. Click **Sign In to System**.
5. If your account uses two-step verification, the **TWO-FACTOR VERIFICATION** box appears:
   - **Authenticator app:** open the app on your phone (for example Google or Microsoft Authenticator), read the 6-digit code and type it, then click **Verify Authenticator Code**.
   - **Email code:** click **Send email code**, open your email, type the 6-digit code and click **Verify Email Code**. Wait one minute before asking for another code.

## How long you stay signed in

- Normally you are signed out after **30 minutes without activity**, and after **12 hours** in any case.
- With **Remember me for 5 days** ticked, you stay signed in for up to **5 days** on that device. After you enter a verification code once, that device will not ask for a code again for 5 days — even after you sign out.
- When your time runs out you see *Your secure session expired. Please sign in again.* Just sign in again; nothing is lost.

## Forgot your password?

**Forgot Password?** explains that passwords are reset by your HR or system administrator.

For security, passwords are **not** reset by email. Contact your HR or system administrator. After confirming who you are, they set a new password for you in **User Management** → **Edit** → **Reset password** (see section B5). Then sign in with the new password.

## Signing out

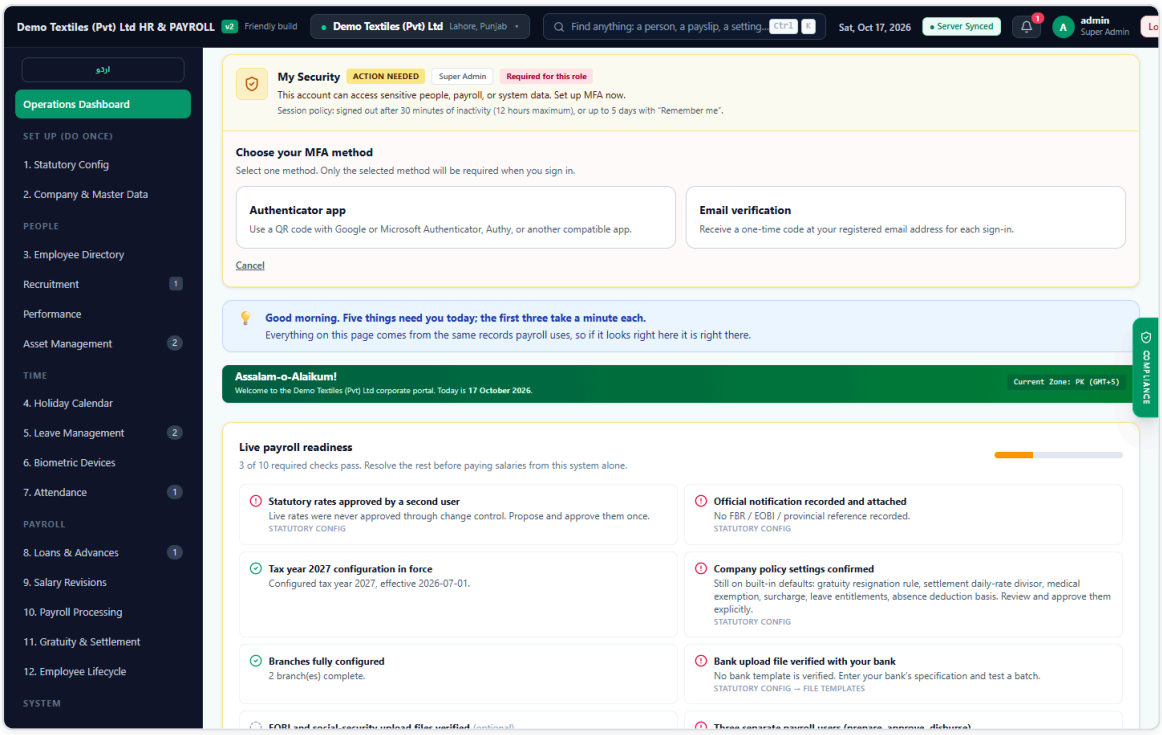

Click **Logout** at the top right of the screen. Always sign out on shared computers.

## Problems signing in

| You see | What to do |
|---|---|
| *Invalid email or password.* | Check spelling and Caps Lock. Ask your administrator to reset the password if needed. |
| *Account is suspended. Contact your administrator.* | Your account has been switched off. Ask your administrator. |
| *Too many authentication attempts.* | Wait one minute and try again. |
| *Invalid, expired, or already used verification code.* | Use the newest code. Phone codes change every 30 seconds; email codes last 10 minutes. |
| *MFA challenge is invalid or expired.* | You took more than 5 minutes or entered 5 wrong codes. Sign in again from the start. |
| *The server can't be reached right now…* | Check your internet connection. If it continues, tell your IT person. |

# A6 Protecting your account (two-step verification / MFA)

Two-step verification means signing in needs your password **and** a 6-digit code from your phone or email. Even if someone learns your password, they cannot get in. Everyone who can see salaries or change settings **must** set it up — the box **My Security** at the top of every page shows **ACTION NEEDED** until you do.

**My Security → Set up MFA.** Choose one method.

## Set up with an authenticator app (recommended)

1. Install **Google Authenticator** or **Microsoft Authenticator** on your phone (free, from the Play Store).
2. In the portal, click **Set up MFA** and then **Authenticator app**. A square QR code appears under **Connect your authenticator app**.
3. In the phone app, tap **+** / **Scan a QR code** and point the camera at the code. (If you cannot scan, type the **Secret** shown under the code into the app instead.)
4. Type the 6-digit code the phone shows into **Authenticator code** and click **Confirm MFA**. Do this within 10 minutes.
5. You see *Authenticator MFA is enabled.* The badge changes to **Protected**.

## Set up with email codes

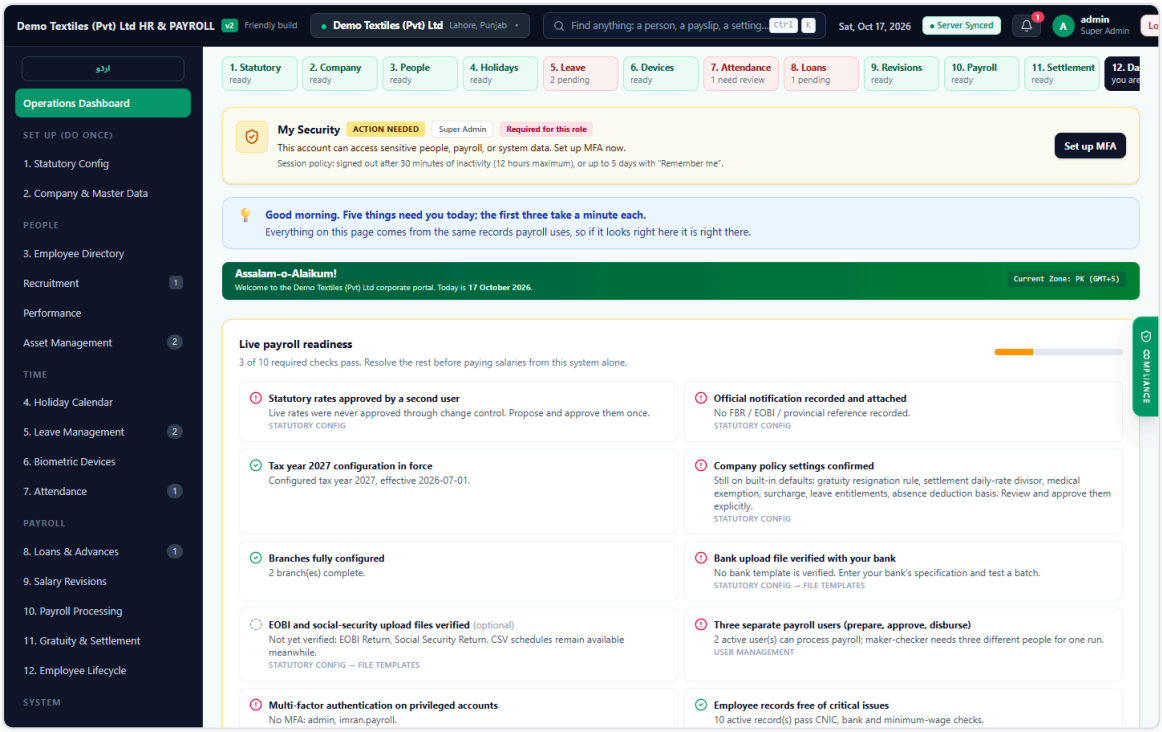

1. Click **Set up MFA** → **Email verification**. A 6-digit code is emailed to you.
2. Type it into **Email verification code** and click **Confirm email MFA**.

> **Important — never share your codes**
>
> No one from HR or IT will ever ask for your 6-digit code. Do not tell it to anyone.

## Lost or changed your phone?

- **If you can still sign in** (for example on a remembered device): in **My Security** click **Lost or replacing your authenticator device? Request a controlled MFA reset.**, explain how your identity can be checked, and click **Submit recovery request**.
- **If you cannot sign in at all:** contact your administrator. They raise the reset request for you (section B5).
- Two different administrators are needed: one raises the request, another approves it. After approval, you sign in with your password only — then set up MFA again straight away.
- If a phone was lost or a device was shared, click **Stop trusting my devices (lost phone or shared device)** in **My Security**. Every device will ask for a code again at the next sign-in.

# A7 Finding your way around the web portal

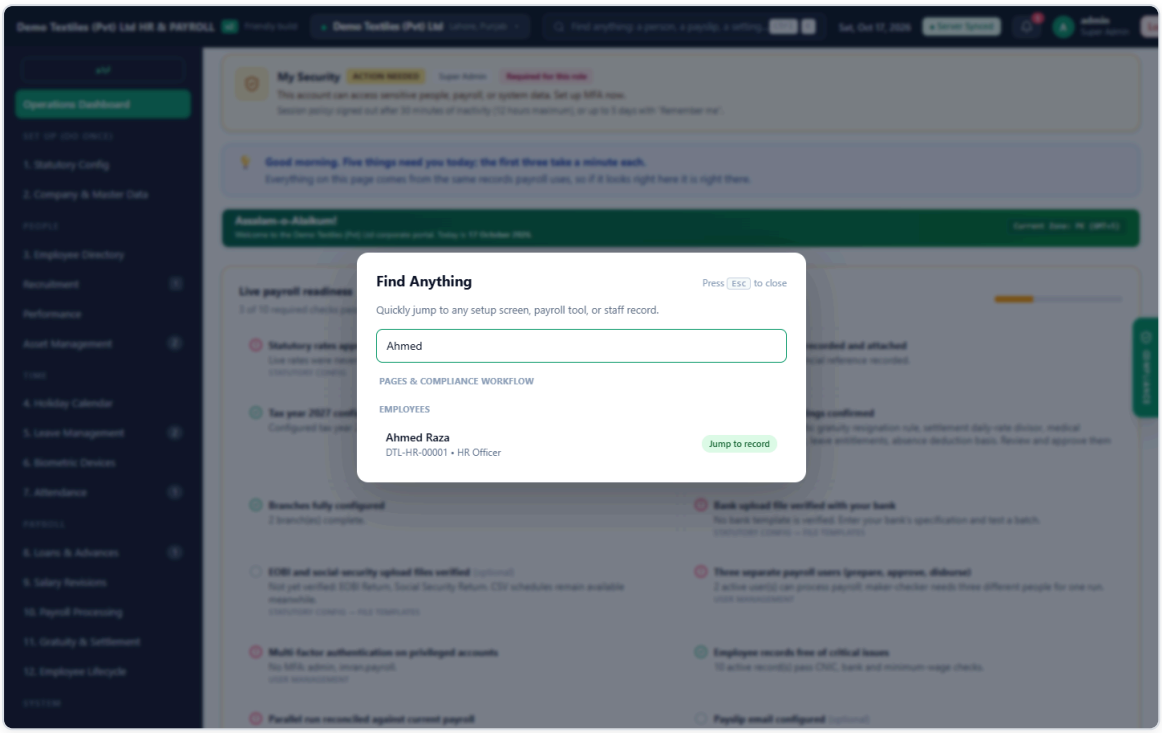

**The main screen after signing in.** Menu on the left, top bar above, step bar and page content in the middle.

## The parts of the screen

| Part | What it does |
|---|---|
| **Menu (left side)** | All pages, grouped as SET UP (DO ONCE), PEOPLE, TIME, PAYROLL, SYSTEM and HELP. Numbers 1–12 show the normal order of work. A small red number next to an item (for example **2** next to Leave Management) means that many items are waiting for you. |
| **Step bar (top of each page)** | Twelve boxes from **1. Statutory** to **12. Dashboard**. Under each step you see its status: *ready*, *2 pending*, *1 need review*, *you are here*. Click a box to go to that step. |
| **Company name chip** | Shows your company and city. Clicking it opens **2. Company & Master Data**. |
| **Search box** "Find anything..." | Jump to any page or employee (see below). |
| **Server Synced** | Green means everything is saved and up to date. *Sync Warning* means something could not load — refresh the page, and tell your administrator if it continues. |
| **Bell** | Notifications. The red number is how many need your attention. |
| **Your name and role**, **Logout** | Who is signed in, and the sign-out button. |
| **Compliance tab** (green, right edge) | Opens a short summary of Pakistani payroll rules and your minimum wage. Click **Hide** to close it. |
| **❓ Guide for this page** (bottom of the menu) | Short help for the page you are on. Click **Got it** to close. |

## Search for anything (Ctrl + K)

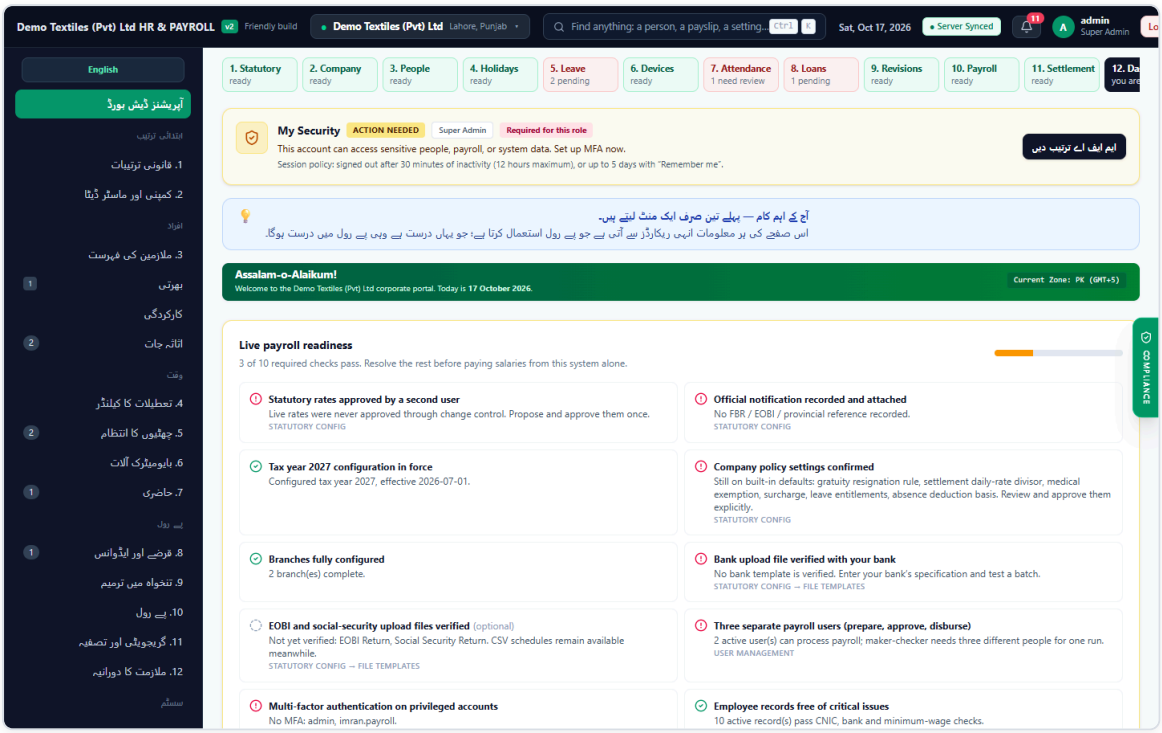

**Find Anything** — typing "Ahmed" finds the employee and matching pages.

1. Press `Ctrl` + `K` on the keyboard, or click the search box at the top.
2. Type part of a page name ("payroll", "holiday") or a person's name, employee code or CNIC.
3. Click a result. Press `Esc` to close the search.

Choosing an employee opens the Employee Directory; find the person in the list there. The pages "User Guide & Labor Laws" and "Notification Center" are also easiest to open from this search.

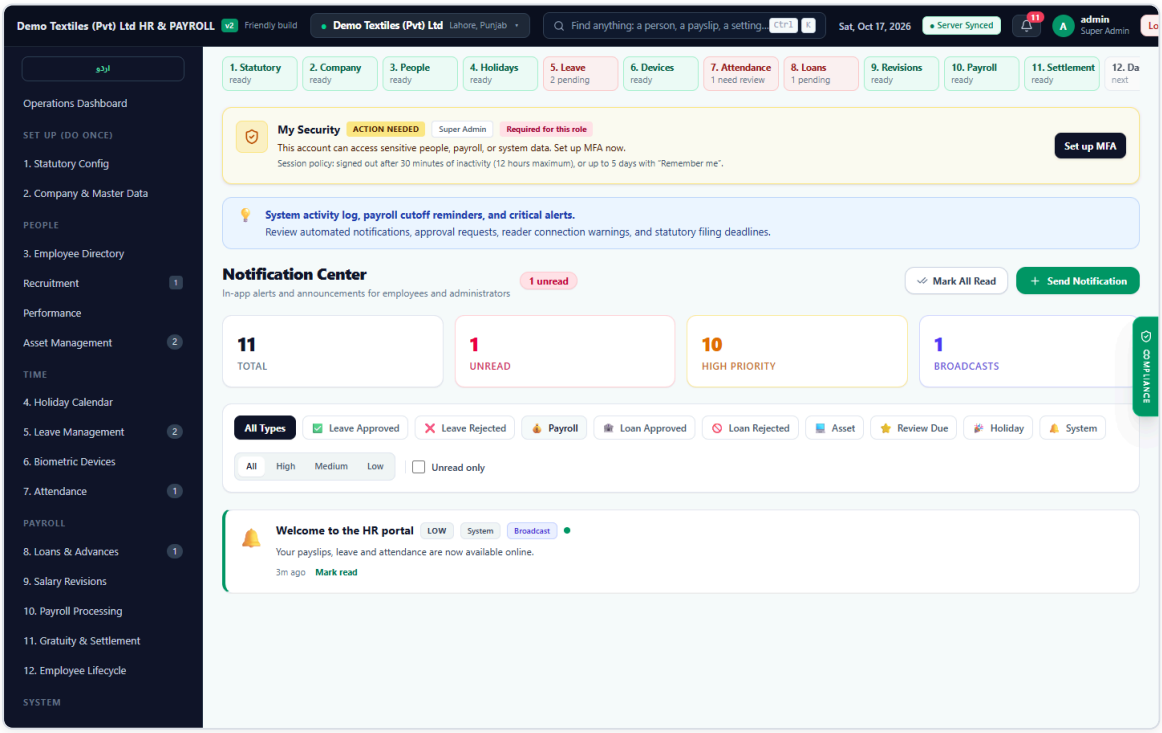

## Urdu screens (اردو)

**Urdu menu.** Click **اردو** at the top of the menu; click **English** to switch back.

The menu, page help and common buttons change to Urdu, and payslips show English and Urdu side by side. Names, amounts and codes stay as they are. The official record is always the English version. Your choice is remembered on this computer.

## Notifications

**Notification Center.** Filter by type or priority; tick *Unread only* to see new items.

- Click the bell (or search "Notification") to open the **Notification Center**. Click an item or **Mark read** when you have dealt with it.
- HR and payroll staff can click **Send Notification** to send a message to one employee or to everyone (leave *Target* empty). You may add an Urdu title and message. Employees see it in their mobile app.

> **Good to know**
> "Mark All Read" and deleting a notification currently only change your screen; after refreshing the page the items may return.

## Typing dates

All dates are shown as **DD-MMM-YYYY**, for example **05-Nov-2026**. In any date box you can type **05-Nov-2026**, **5 Nov 2026**, **05/11/2026** or **05-11-2026** (day first), then press `Enter` — or click the small calendar symbol and pick a day. A date box turns red if the date is not valid.

## Messages and buttons that are greyed out

- If a button is grey, move the mouse over it: a short note explains why (for example *Prepared by you; another authorized user must approve.*).
- If you see **Access Denied**, your role does not include that page. Ask your administrator.
- Nothing is ever deleted without a confirmation, and every change is recorded with your name and the time.

# A8 The Operations Dashboard — your daily starting point

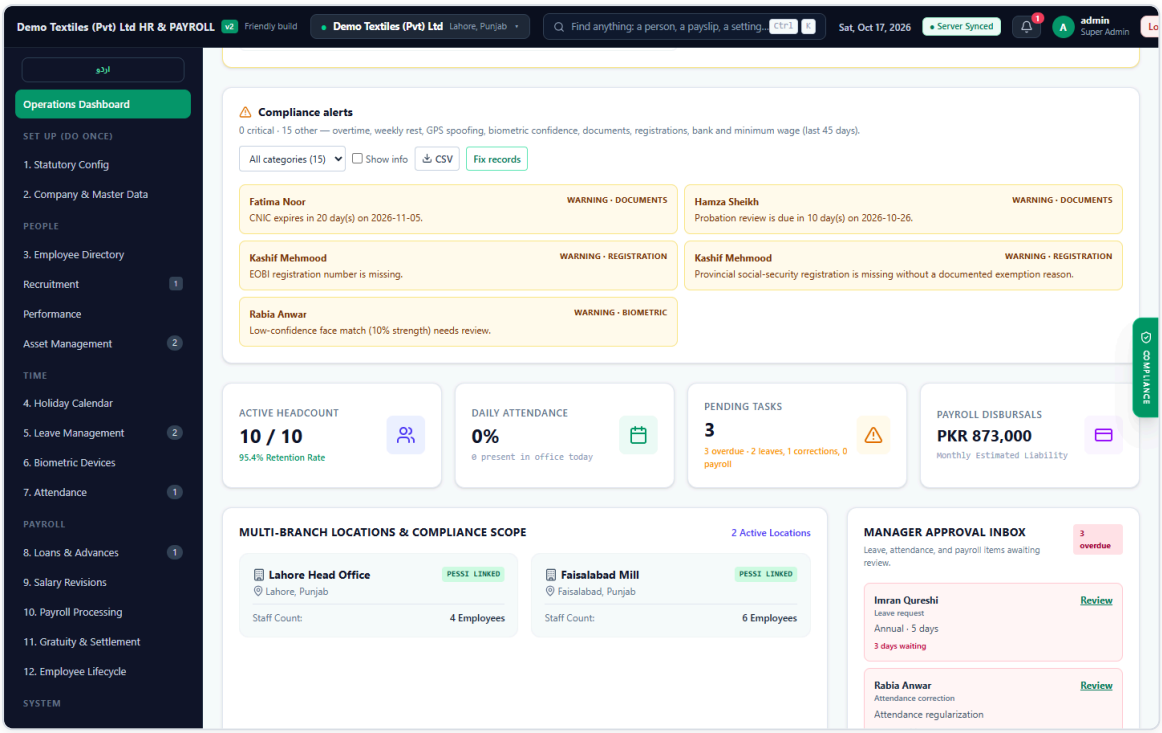

The dashboard opens after you sign in. It shows what needs attention today. Everything on it comes from the same records that payroll uses, so if it looks right here, it is right in payroll.

## Live payroll readiness

Shown to administrators and payroll staff. It lists the checks that must pass before you pay salaries from this system alone. Each check has a green tick (done), a red mark (action needed) or a dotted circle (optional), and tells you which page fixes it.

| Check | How to make it green |
|---|---|
| Statutory rates approved by a second user | Propose rates in 1. Statutory Config; a colleague approves them (section B1). |
| Official notification recorded and attached | Enter the FBR / EOBI / provincial notice number and attach the PDF in 1. Statutory Config. |
| Tax year configuration in force | Set the tax year and effective date (changes every July). |
| Company policy settings confirmed | Review the gratuity, leave, medical exemption and absence rules in 1. Statutory Config. |
| Branches fully configured | Each branch needs a province, establishment type and a location area (geofence) — Master Data. |
| Bank upload file verified with your bank | Set up your bank's file layout and tick "verified" after the bank accepts a test file. |
| Three separate payroll users | Create logins for preparer, approver and payer (User Management). |
| Multi-factor authentication on privileged accounts | Every admin and payroll user sets up MFA (section A6). |
| Employee records free of critical issues | Fix missing or wrong CNIC, IBAN, bank details or below-minimum wages (Employee Directory). |
| Parallel run reconciled against current payroll | Compare one month with your old payroll (section E4). |
| Payslip email / SMS / WhatsApp configured (optional) | Set up by your IT person on the server. |

## Compliance alerts

**Compliance alerts, summary cards and the Manager Approval Inbox.**

A list of problems found in the last 45 days. Each alert shows a severity — **CRITICAL** (fix now), **WARNING** (fix soon) or INFO — a category and the employee. Use the category list to filter, tick **Show info** to include minor items, click **CSV** to download the list, or **Fix records** to open the Employee Directory.

| Category | What it means |
|---|---|
| Overtime | More overtime in a week than your limit (default 12 hours). |
| Weekly rest | Worked more days in a row than allowed (default 6). |
| Location | Impossible travel between two phone punches, or the same GPS position on many days (possible fake-location app). |
| Biometric | A weak face or fingerprint match that a supervisor has not checked yet. |
| Manual attendance | Attendance typed in by hand that a second person has not approved. |
| Documents | CNIC, contract, driving licence, certificate or work permit expired or expiring within 60 days; probation review due. |
| Registration | Missing or wrongly formatted CNIC, EOBI number, social-security number or NTN. |
| Bank | Bank account missing or IBAN not a valid 24-character Pakistani IBAN. |
| Minimum wage | Pay below the minimum wage for that province. |

## Summary cards and approval inbox

- **Active Headcount** — active employees out of all employees.

- **Daily Attendance** — percentage of staff who punched in today.
- **Pending Tasks** — leave requests, attendance corrections and payroll items waiting, and how many are overdue.
- **Payroll Disbursals** — an estimate of the monthly basic salary bill.
- **Multi-Branch Locations** — each branch with its city, province and staff count.
- **Manager Approval Inbox** — the five oldest items waiting for a decision. Items waiting two days or more are red. Click **Review** to open the right page.

**Tip — a 2-minute daily routine for managers**

1. Clear red items in the **Manager Approval Inbox**.
2. Look at **Compliance alerts**, starting with CRITICAL.
3. Check **Daily Attendance** for missing staff.
4. Look for red badges in the menu and the step bar.

PART B

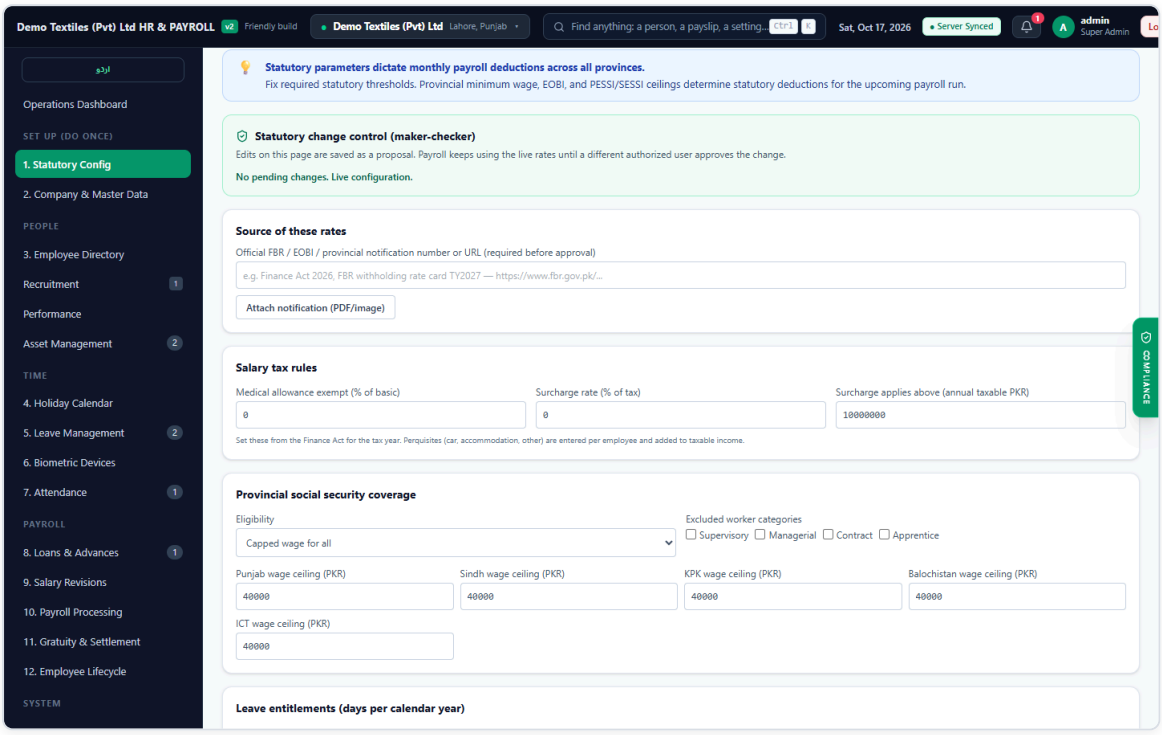

# One-time setup

For administrators. Do these steps once, in this order, before adding employees or running payroll. Afterwards you only come back when a law, a rate or your company changes.

- 1. Statutory Config — legal rates and company rules (B1)
- 2. Company & Master Data — your company (B2)
- Master Data — branches, departments, designations, wage types (B3)
- 4. Holiday Calendar — public holidays (B4)
- User Management — logins, roles and kiosks (B5)

# B1 Legal rates and company rules — 1. Statutory Config

This page holds everything payroll needs from the law and from your company policy: income-tax slabs, EOBI, provincial social security, minimum wage, leave days, gratuity rules, alert limits, bank file layouts and accounting codes.

**Top of 1. Statutory Config** — the change-control box, the rate source and the salary tax rules.

## How changes work here (very important)

- **There is no Save button.** Every number you type is saved immediately as a **proposal**.
- Payroll keeps using the old (live) rates until a **different** authorised person approves your proposal.
- While a proposal is waiting, the page shows the proposed values, and the box at the top shows *Pending proposal by … since … — changed: ….*
- Only one proposal can be open at a time.

## To change a rate (the person making the change)

1. Open **1. Statutory Config**.
2. In **Source of these rates**, type the official notification number or web link (for example "Finance Act 2026, FBR withholding card TY2027"). **This is required before approval.**
3. Click **Attach notification (PDF/image)** and choose the official document (PDF, JPEG or PNG).
4. Change the values you need (the sections are explained below).
5. Ask a colleague with the Settings permission to approve.

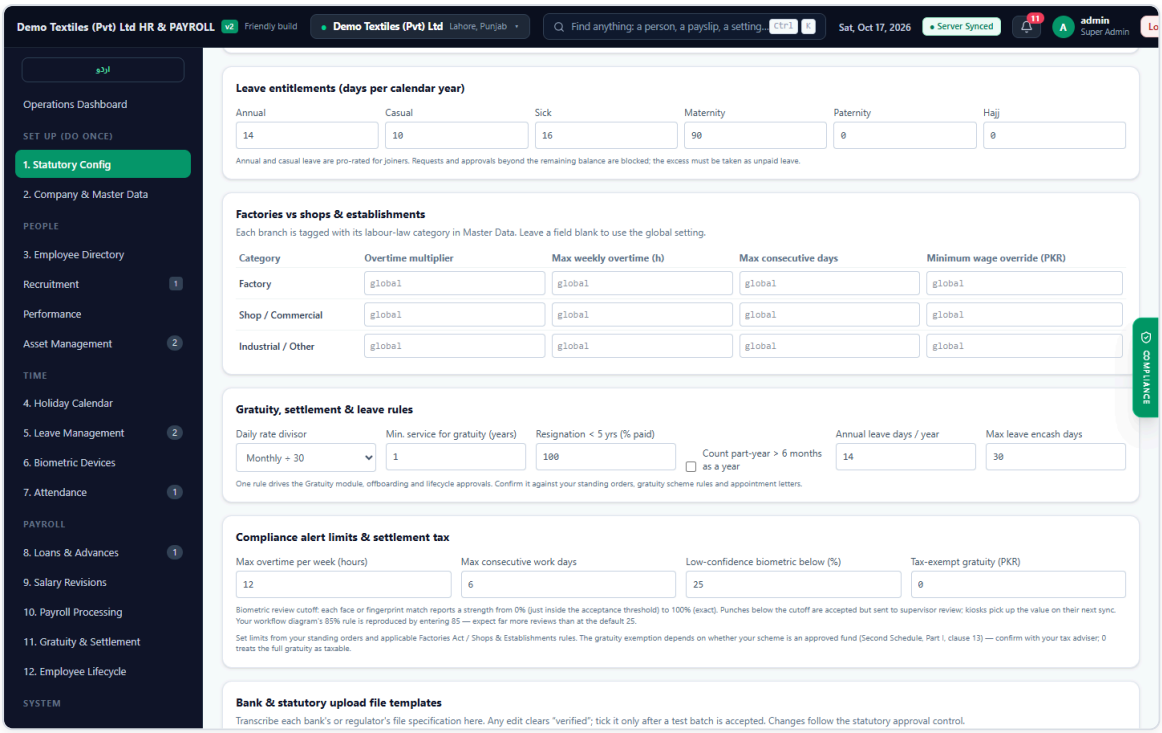

## To approve or reject (the second person)

1. Open **1. Statutory Config**. The amber box shows the waiting proposal and what changed.

2. Compare the values with the official notice.
3. Click **Approve & apply** and type a short comment (at least 5 characters), for example the notice number you checked. The new rates now apply to payroll.
4. Or click **Reject** and give a reason. (If you made the proposal yourself, your button says **Withdraw** instead.)

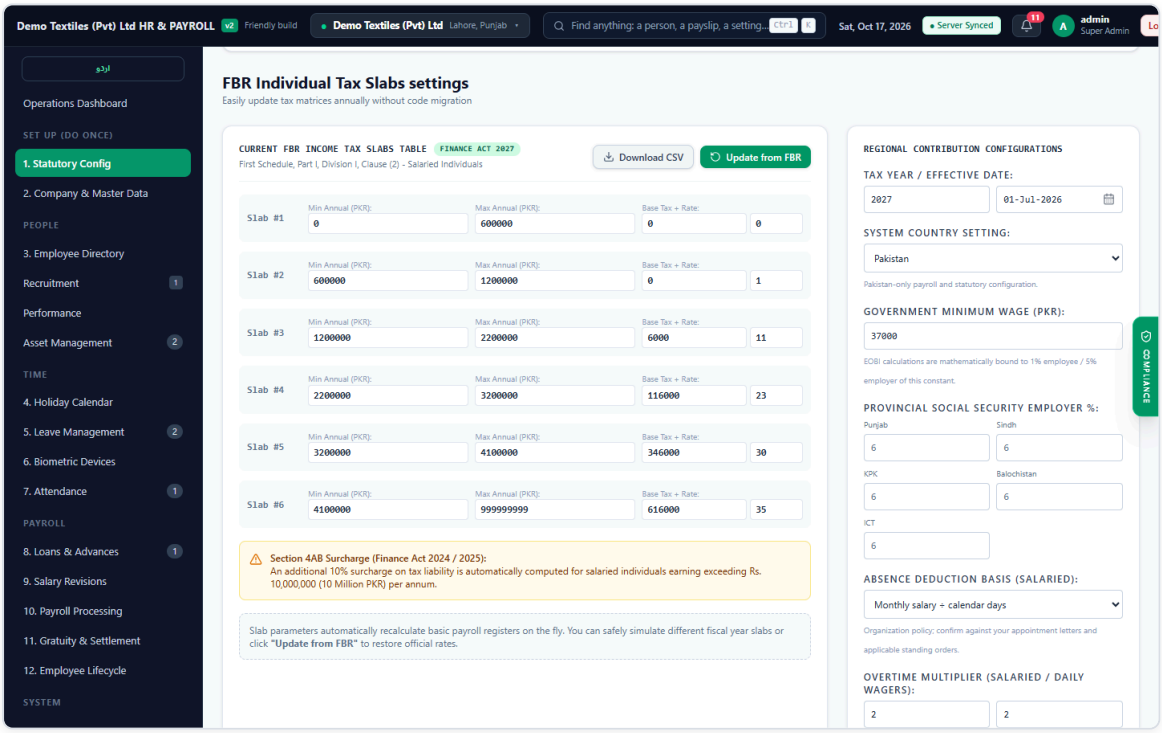

## The sections on this page

| Section | What to enter |
|---|---|
| **Salary tax rules** | **Medical allowance exempt (% of basic)**, **Surcharge rate (% of tax)** and the income above which the surcharge applies. Take these from the Finance Act for the tax year. |
| **Provincial social security coverage** | Who pays social security (everyone up to the wage ceiling, or only people earning below it), which worker categories are excluded (Supervisory, Managerial, Contract, Apprentice), and the wage ceiling for each province. |
| **Leave entitlements** | Days per calendar year for Annual, Casual, Sick, Maternity, Paternity and Hajj leave. **Paternity and Hajj start at 0** — enter your policy, otherwise these leaves cannot be approved as paid. |
| **Factories vs shops & establishments** | Different overtime rate, weekly overtime limit, consecutive-day limit or minimum wage for factories, shops and other sites. Leave a box empty ("global") to use the normal setting. |
| **Gratuity, settlement & leave rules** | Daily rate (monthly ÷ 30 or ÷ 26), minimum service for gratuity, % paid on resignation within 5 years, counting part-years over 6 months, annual leave days and maximum leave days that can be encashed. |
| **Compliance alert limits & settlement tax** | Maximum weekly overtime (default 12 hours) and consecutive work days (default 6) before an alert, the **low-confidence biometric** level (default 25%) and the tax-free part of gratuity (0 = all taxable; ask your tax adviser). |
| **Bank & statutory upload file templates** | The exact file layout your bank, EOBI or social-security office wants (see below). |
| **Chart of accounts mapping** | Your general-ledger account code and name for each payroll posting (salaries, EOBI, tax payable, net salary, etc.). Ask your accountant. |
| **FBR Individual Tax Slabs** | The income-tax table (see below). |
| **Regional Contribution Configurations** | Tax year and effective date, government minimum wage, social-security employer % per province, how absences are deducted, overtime multiplier, social-security wage ceiling and gratuity days per year. |

**Leave entitlements, factory/shop rules, gratuity rules and alert limits.**

## Income-tax slabs

**FBR Individual Tax Slabs** (left) and **Regional Contribution Configurations** (right).

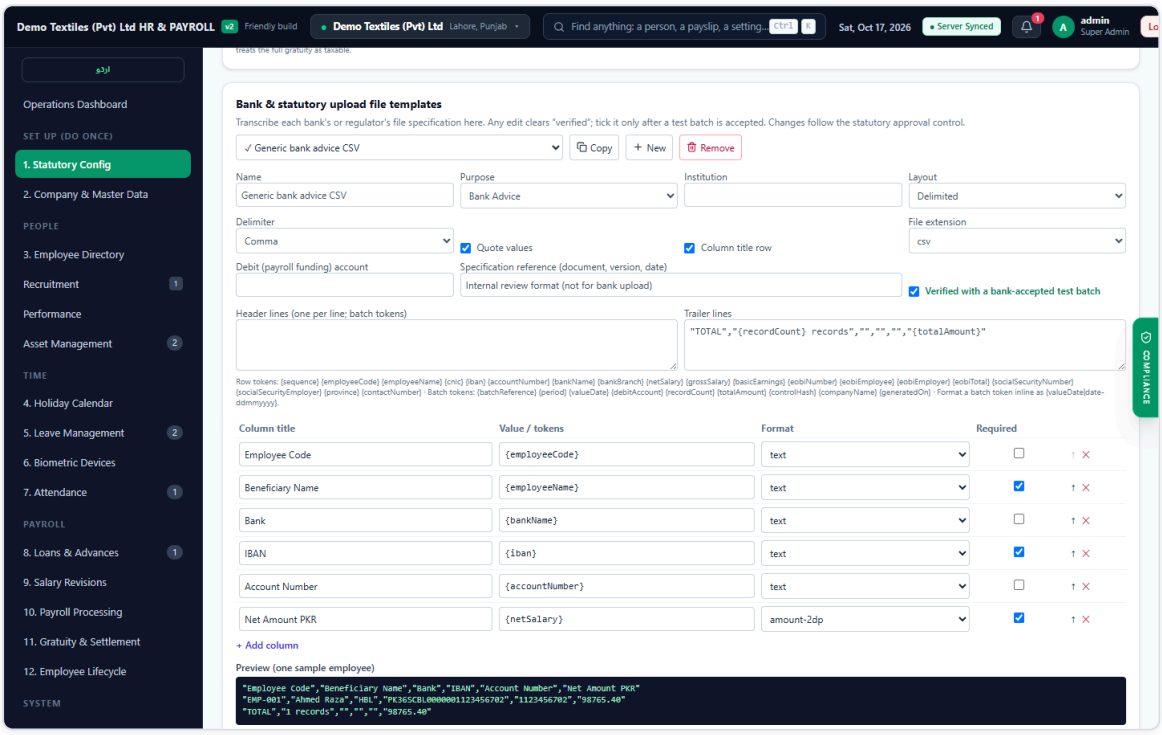

Each slab row has: **Min Annual (PKR)**, **Max Annual (PKR)**, the fixed **Base Tax** and the **Rate**.

> **Important — type the rate as a percentage**
>
> Type **11** for 11%, **1** for 1%, **35** for 35%. (Older screens suggested typing 0.11; the system now reads such small numbers correctly as well, but whole percentages are clearer.)

- **Download CSV** saves the table for your records.
- **Update from FBR** does **not** go online. It replaces your slabs with the table built into the program, which may be from an earlier year. Always compare with the current Finance Act before approving.
- A 10% surcharge is added automatically when yearly taxable income is above PKR 10 million (or the threshold you set).

> **Important — every July**
>
> The tax year changes on 1 July. Before the first July payroll, update the tax year, effective date and slabs, and have them approved. Otherwise payroll refuses to run with *Payroll refused: statutory configuration is not valid for this period.*

## Bank, EOBI and social-security file templates

**File templates.** Choose a template, edit its columns and check the preview.

1. Choose a template in the list. ✓ means verified with the bank; ⚠ means not yet verified. Templates exist for HBL, UBL, Meezan, MCB, Bank Alfalah, Allied and Standard Chartered, plus EOBI and social-security schedules.
2. Click **Copy** to start from an existing one, or **New** for an empty one.
3. Using your bank's official file specification, fill **Name**, **Purpose**, **Layout** (Delimited or Fixed Width), **Delimiter**, **Debit (payroll funding) account** and **Specification reference**.
4. Edit the columns (title, value, format, required). Use **+ Add column** to add one.
5. Look at **Preview (one sample employee)**. Fix any red errors.
6. Send a small test file to your bank. Only after the bank accepts it, tick **Verified with a bank-accepted test batch**.

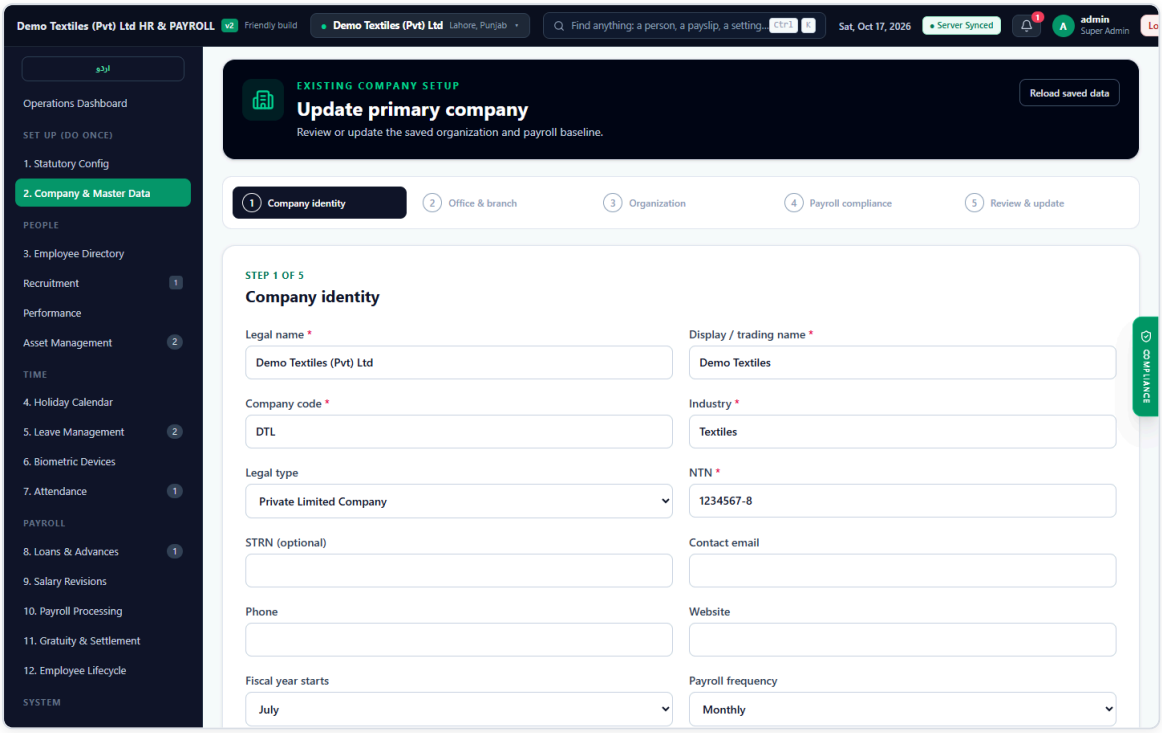

> **Good to know**
>
> The "Generic bank advice CSV" is for internal checking only — it is not a bank upload format. Any change to a template removes its "verified" tick, and template changes need approval like rates.

## Watch panels further down the page

Read-only lists that warn you early: **CNIC Compliance Watch** (CNICs expiring within 90 days), **Contract & Probation Watch**, **Identity & Payment Collision Watch** (two employees with the same CNIC or bank account — this blocks payroll), **Attendance Compliance Alerts**, **Payroll Release Control** and **Today's Attendance Exceptions**.

# B2 Your company — 2. Company & Master Data

A five-step form that creates (or updates) your company, its main branch, starting departments and designations, and the basic payroll settings.

**Step 1 of 5 — Company identity.** Fields marked * are required.

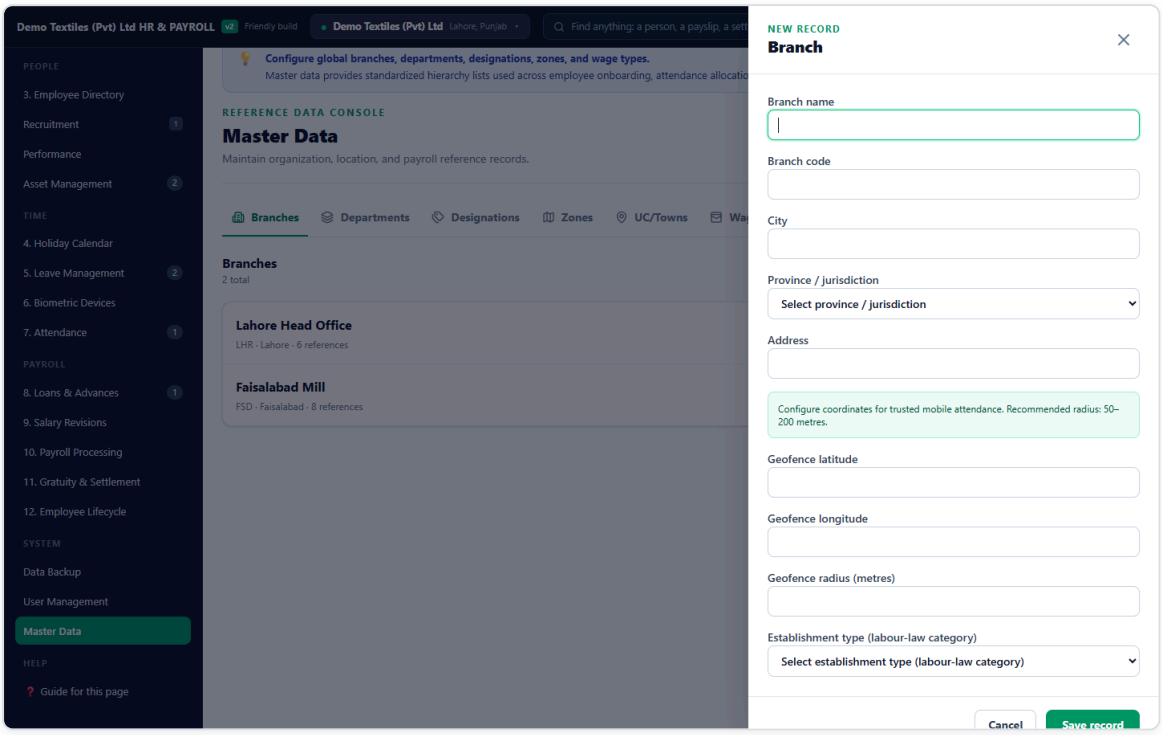

1. **Company identity:** **Legal name**, **Display / trading name**, **Company code**, **Industry**, **NTN** (all required), plus legal type, fiscal year start (July), payroll frequency, currency and time zone. Click **Continue**.
2. **Office & branch:** the registered office address, city and province. The main branch is "Head Office" at the same address unless you untick **Same as registered office**.
3. **Organization:** at least one department (name and short code, for example "Production" / **PRD**) and, optionally, designations with their department and grade. Use **Add row**.
4. **Payroll compliance:** tax year, effective date, minimum wage, EOBI employee and employer %, social security %, wage ceiling, gratuity days, provident-fund maximum, overtime multiplier, monthly hours, and whether you are registered with EOBI and social security (enter the registration numbers).
5. **Review:** check the summary, tick **I reviewed these details and statutory settings.** and click **Create primary company** (or **Update primary company**).

**Important**

- The payroll values entered in step 4 become live straight away. Later changes should be made in 1. Statutory Config, where they need approval.
- The short department codes you type (PRD, HR, FIN) become part of every employee code, so keep them short.

# B3 Branches, departments, designations and wage types — Master Data

Use **Master Data** (under SYSTEM in the menu) to add or change lists after the first setup. The tabs are **Branches**, **Departments**, **Designations**, **Zones**, **UC/Towns** and **Wage Types**.

**Adding a branch.** The geofence fields define where mobile punches are accepted.

1. Choose a tab and click **Add …** (for example **Add Branch**), or **Edit** next to an existing record.
2. Fill the form and click **Save record**.

| Tab | What to enter |
|---|---|
| Branch | Name, code, city, province (Punjab, Sindh, Khyber Pakhtunkhwa, Balochistan or Islamabad/ICT), address, **geofence** (latitude, longitude and radius in metres — the area in which phone punches count as "on site"; 50–200 m is recommended) and **establishment type** (Factory / Shop / Industrial / Other). |
| Department | Branch, department name, code. |
| Designation | Department, title, code, grade. |
| Zone, UC/Town | Optional geographic groupings used for reports. |
| Wage Type | Name, code and calculation basis: **Monthly** (salaried) or **Daily** (daily wagers). Every employee needs one. |

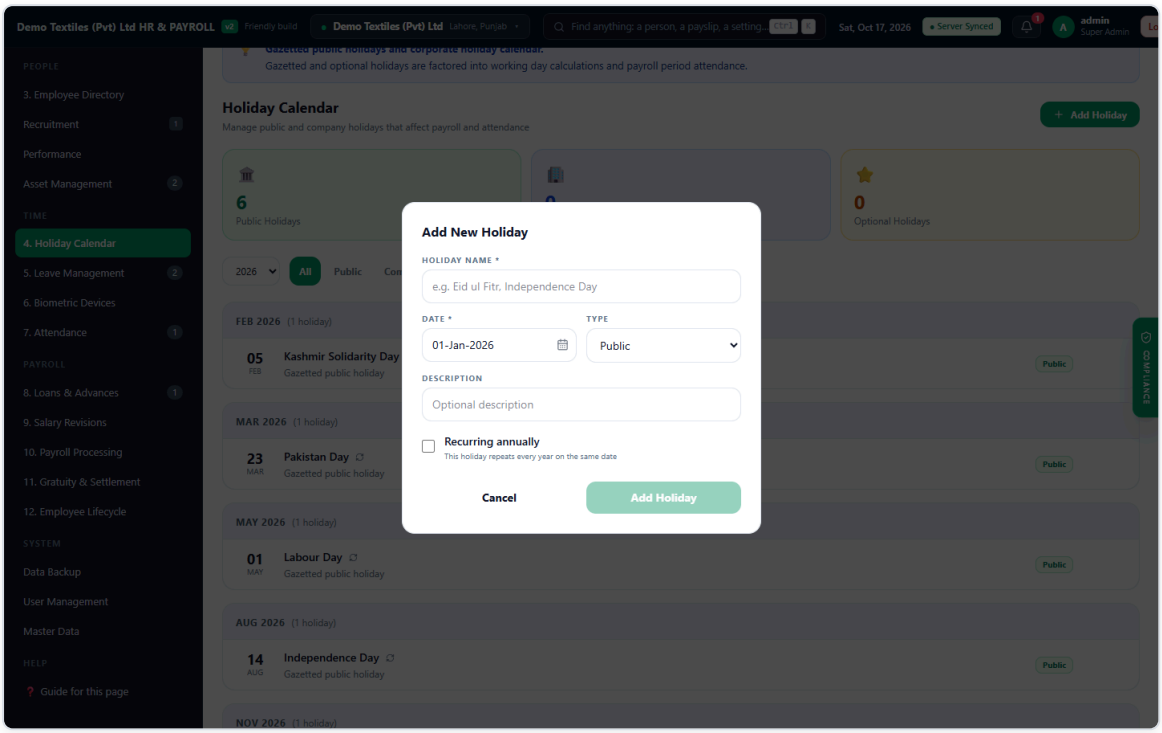

> **Tip — finding a branch's latitude and longitude**
> Open Google Maps, right-click the middle of the branch building and click the two numbers shown at the top (for example 31.4504, 73.1350). The first is latitude, the second longitude.

**Good to know**

Codes are created automatically (tick off **Auto-generate code** to type your own: capital letters, numbers and single hyphens). Records cannot be deleted, and a record already used by employees cannot be moved to another branch or department.

# B4 Public holidays — 4. Holiday Calendar

Holidays here are paid days off and are not counted as absences.

**Add New Holiday.**

1. Open **4. Holiday Calendar** and click **Add Holiday**.
2. Type the **HOLIDAY NAME** and the **DATE**, and choose the **TYPE**: Public, Company or Optional.
3. Tick **Recurring annually** only for holidays on the same date every year (14 August, 23 March, 25 December…).
4. Click **Add Holiday**.

To change or remove a holiday, move the mouse over it and click the pencil or the bin. Use the year list and the All / Public / Company / Optional buttons to filter.

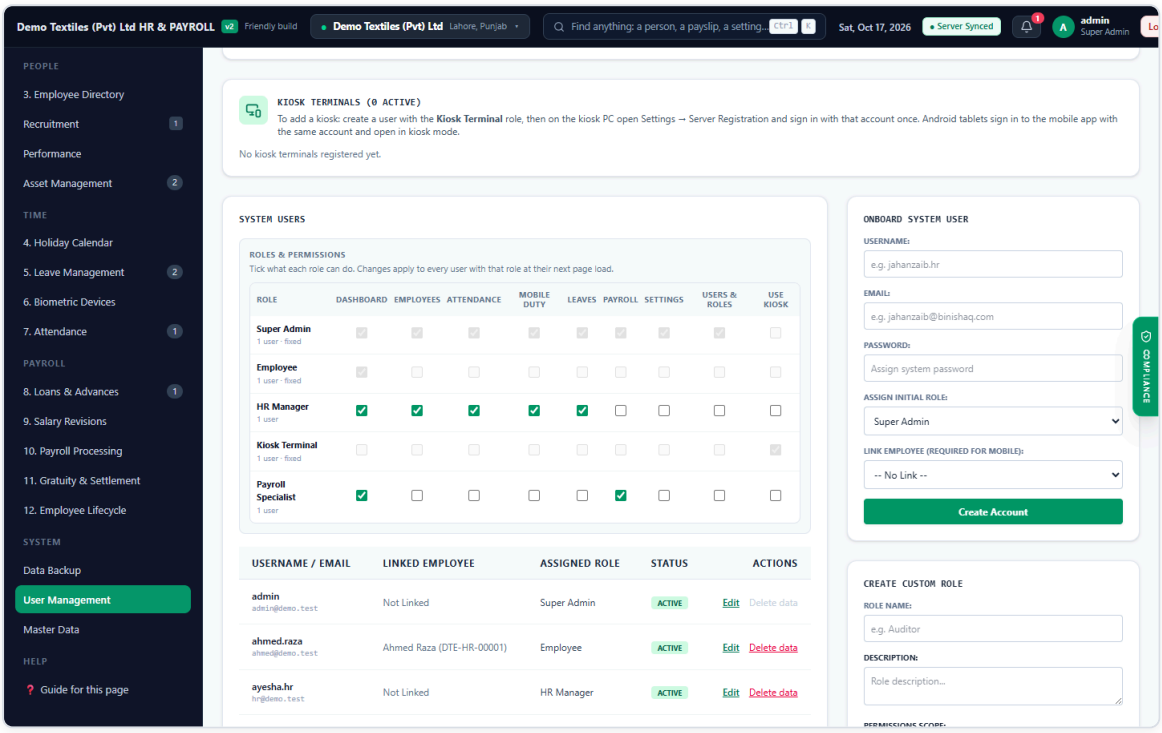

> **Important — Eid and other moon-based holidays**
>
> Do **not** mark Eid ul-Fitr, Eid ul-Adha, Ashura or 12 Rabi-ul-Awwal as recurring. Add them each year once the official dates are announced.

> **Good to know — shifts, Ramadan and Fridays**
>
> There is no separate shift page. Each employee's shift times, grace minutes, Ramadan timings and Friday timings are set on the employee's own record (section C1).

# B5 Logins, roles and kiosks — User Management

Here you create a login for each person, decide what each role may do, reset passwords, approve two-step-verification resets and manage attendance kiosks. Only people with the "Users & roles" permission can open this page.

## Create a login for a person

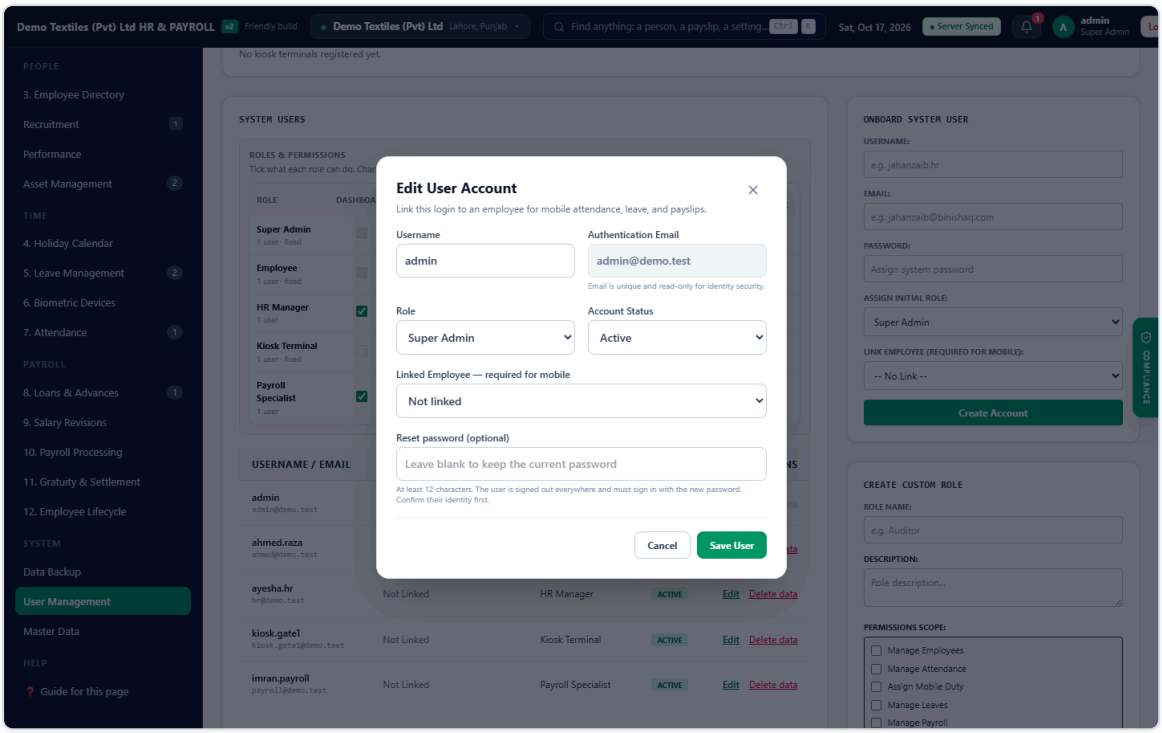

**User Management.** Kiosk terminals at the top, the Roles & permissions table, the user list, and **Onboard System User** on the right.

1. In **ONBOARD SYSTEM USER** fill **USERNAME** (for example *ayesha.hr*), **EMAIL** and **PASSWORD** (at least 12 characters).
2. Choose the role in **ASSIGN INITIAL ROLE**.
3. For an **employee who will use the mobile app**, choose their name in **LINK EMPLOYEE (REQUIRED FOR MOBILE)**. Each employee can be linked to only one login. (Add the employee in 3. Employee Directory first.)
4. Click **Create Account**. Give the person their email and password privately and ask them to set up two-step verification after their first sign-in.

> **Good to know**
>
> Passwords are stored in scrambled (encrypted) form. Nobody — not even the administrator — can read a person's password. If it is forgotten, set a new one as shown below.

# Change a login or reset a password

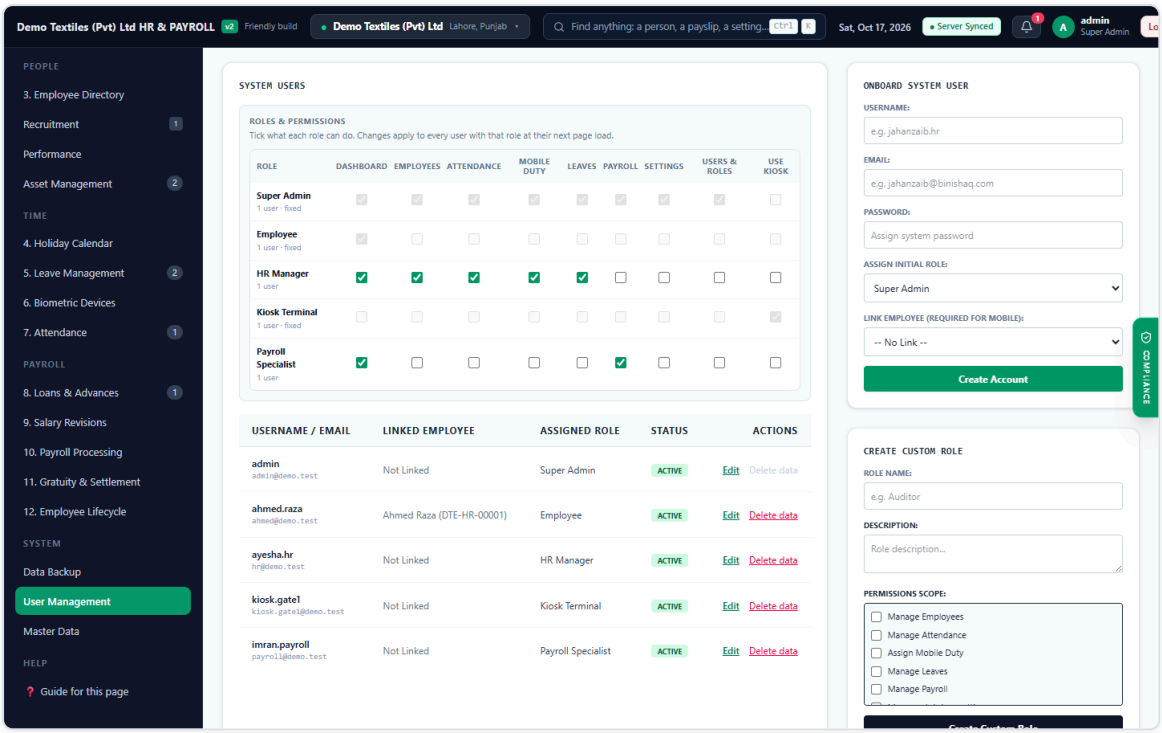

**Edit User Account** — change role, switch the account off, link an employee or reset the password.

1. In the user list, click **Edit** next to the person.
2. Change **Username**, **Role**, **Account Status** (Inactive stops the person signing in) or **Linked Employee**. The email cannot be changed.
3. **To reset a forgotten password:** first confirm the person's identity (in person or by a call to their known number). Then type a new password of at least 12 characters in **Reset password (optional)**. Leave it empty to keep the current password.
4. Click **Save User**. After a password reset the person is signed out everywhere and must sign in with the new password.

> **Warning — Delete data**
>
> **Delete data** permanently removes the login **and** the linked employee's personal records (attendance, leave, loans, reviews, settlements, profile, fingerprints). Payslips are kept but names, CNIC and bank details are replaced by "[REDACTED]". Use it only when the law or the person requires their data to be erased. To stop someone signing in, set **Account Status** to **Inactive** instead.

## Roles & permissions

**Roles & permissions.** Tick what each role may do. Grey rows are fixed.

- Each row is a role; each column is a permission: Dashboard, Employees, Attendance, Mobile duty, Leaves, Payroll, Settings, Users & roles, Use kiosk. Under each role you see how many users have it.
- Tick or untick a box to change what **every** user with that role may do. People see the change the next time their page loads.
- **Super Admin**, **Employee** and **Kiosk Terminal** are fixed and cannot be changed.
- You cannot remove "Users & roles" from your own role (you would lock yourself out), and "Use kiosk" cannot be given to a staff role.

**Create a new role:** in **CREATE CUSTOM ROLE** type a name (for example "Auditor") and description, tick the permissions and click **Create Custom Role**. You can adjust it later in the table.

## Attendance kiosks

Each kiosk PC or tablet signs in with its own **Kiosk Terminal** account. This account can only record attendance — it cannot open any other data.

1. Create a login with role **Kiosk Terminal** (for example username *kiosk.gate1*, email *kiosk.gate1@yourcompany.com*). Do not link an employee.
2. On the kiosk PC, open **Settings** → **Server Registration** and sign in once with that account (section G3). For a tablet, sign in to the mobile app with it (section G7).
3. The kiosk now appears under **KIOSK TERMINALS** with its last sync time.
4. If a kiosk is lost, stolen or replaced, click **Disconnect** next to it. It stops syncing immediately and must be registered again. Switching the kiosk account to Inactive disconnects every kiosk using it.

**Important**

Never sign in to a kiosk with an administrator or HR account — the system refuses, because kiosks are shared machines.

## Two-step verification (MFA) resets

Under **MFA recovery requests**:

1. **To raise a request for someone who lost their phone:** choose them in **Select user for recovery**, type how you verified their identity (at least 10 characters) in **Identity-verification reason** and click **Request reset**.
2. **A second administrator** reads the reason and clicks **Approve** or **Reject**. (The person who raised a request cannot decide it.)
3. After approval, the user's two-step verification is switched off, they are signed out everywhere, and they sign in with their password only. Ask them to set up MFA again immediately.

**Tip — verify identity outside the system**

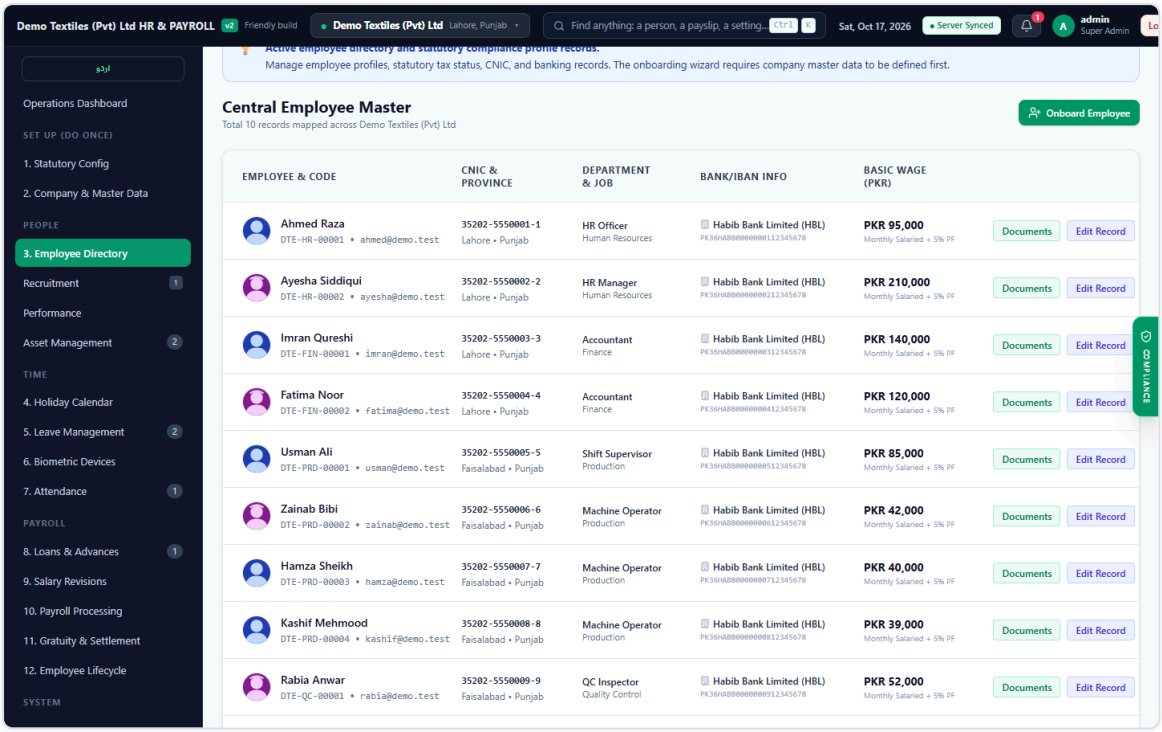

Approve only after checking identity through another channel: a video call, meeting in person, or calling the phone number on their employee record.

PART C

# People

Adding and looking after employee records, their documents and their career changes, plus recruitment, performance reviews and company assets. For HR staff.

# C1 Employee records — 3. Employee Directory

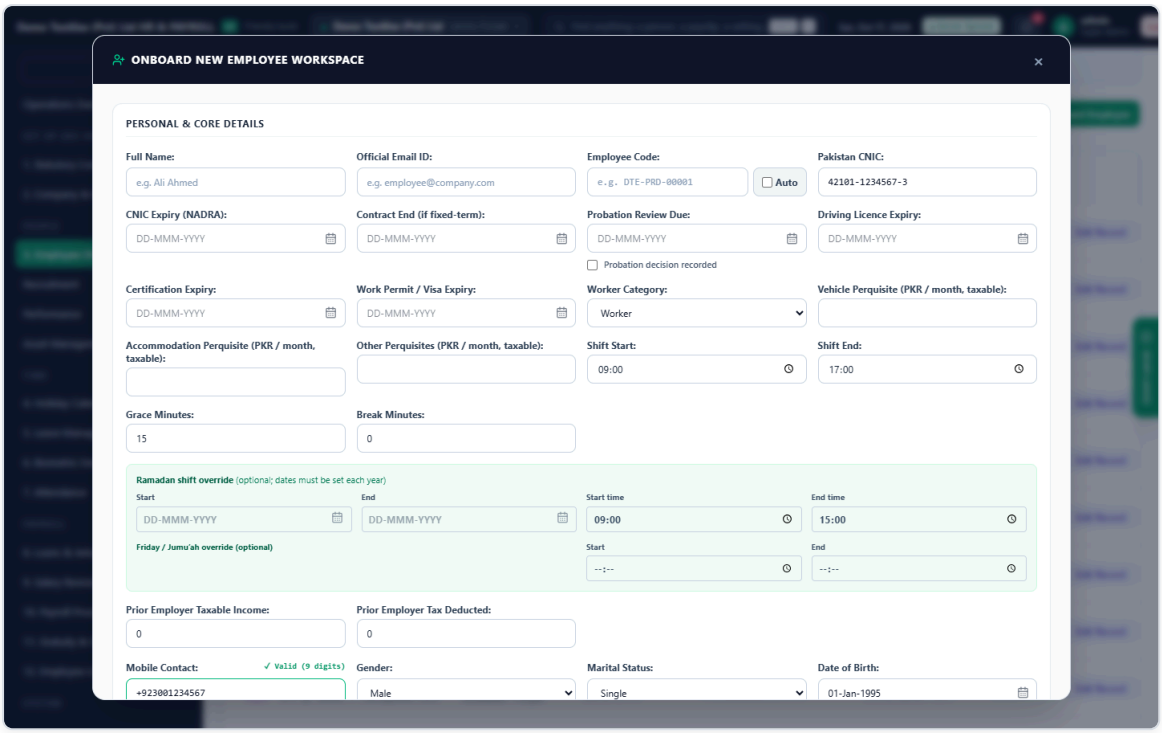

**Central Employee Master.** Each row has **Documents**, **Edit Record** and **Trigger Exit** buttons on the right.

> **Before you start**
>
> Branches, departments, designations and wage types must already exist (sections B2 and B3). The employee form can only choose from those lists.

## Add a new employee

1. Click **Onboard Employee** (top right). The **ONBOARD NEW EMPLOYEE WORKSPACE** opens. It has four sections; scroll down through all of them.
2. Fill **Personal & Core Details** (see below).
3. Fill **Organization & Regional Assignment**: **Assigned Branch**, then **Department**, then **Designation** (each list depends on the one before).
4. Fill **Wage & Custom Allowance Configuration**: wage type, salary, bank, account number and IBAN.
5. Fill **Statutory & Trust Compliance**: EOBI, FBR tax, social security, provident fund and gratuity.
6. Click **Complete Onboarding**. The new employee appears in the list as Active, with today as the joining date.

> **Warning — the form starts with sample values**
>
> Some boxes already contain example data (CNIC 42101-1234567-3, mobile +923001234567, an HBL account, IBAN, EOBI and social-security numbers and a salary of 85,000). **Replace every one** with the real employee's details. Wrong bank details mean the salary goes to the wrong account.

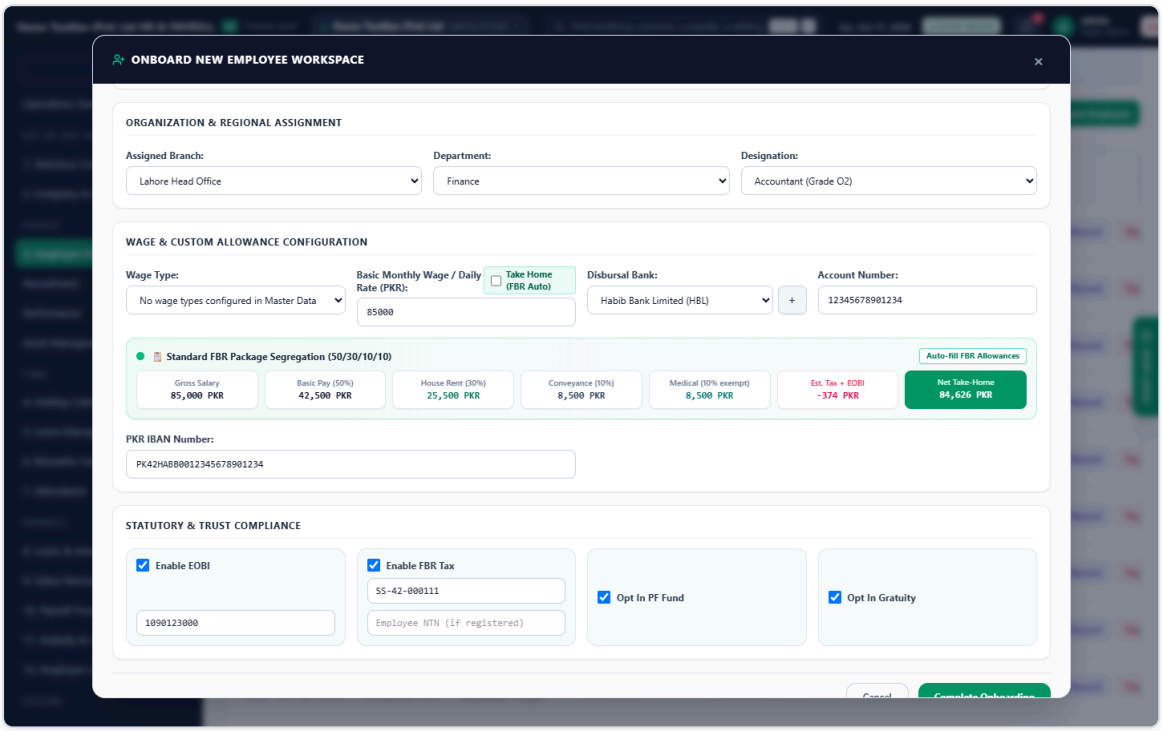

**Personal & Core Details.**

## Personal & Core Details

| Field | What to enter |
|---|---|
| Full Name, Official Email ID | Required. Use the name as on the CNIC. |
| Employee Code | Tick **Auto** to create it automatically (see below), or leave it empty and it is created when you save. |
| Pakistan CNIC | Required. Type the 13 digits; dashes are added for you (42101-1234567-3). |
| CNIC Expiry (NADRA), Contract End, Probation Review Due, Driving Licence Expiry, Certification Expiry, Work Permit / Visa Expiry | Fill these if they apply. The system warns you 60–90 days before they expire. |
| Worker Category | Worker, Supervisory, Managerial, Contract or Apprentice (affects social-security coverage). |
| Vehicle / Accommodation / Other Perquisite | Monthly value of taxable benefits, if any. |
| Shift Start, Shift End, Grace Minutes, Break Minutes | Normal working hours (default 09:00–17:00), minutes allowed late before "Late" (default 15) and unpaid break minutes. |
| Ramadan shift override | Ramadan start and end dates and timings. Enter the dates every year. |
| Friday / Jumu'ah override | Different start and end time on Fridays, if any. |
| Prior Employer Taxable Income / Tax Deducted | For staff who joined during the tax year: income and tax from their previous job this year (from their previous employer's tax certificate). |

| | |
|---|---|
| Mobile Contact | Required, as +923XXXXXXXXX. Typing 0300… is converted automatically. Needed for SMS alerts. |
| Gender, Marital Status, Date of Birth | Date of birth is required. |
| Picture URL / Upload | Click **Browse…** to add a photo (JPEG, PNG or WebP, up to 512 KB). |

### Wage and bank details

**Wage & Custom Allowance Configuration** and **Statutory & Trust Compliance.**

- **Wage Type** — Monthly salaried or Daily wager.
- **Basic Monthly Wage / Daily Rate (PKR)** — the gross monthly salary (or daily rate). The green box shows how it is split: Basic 50%, House Rent 30%, Conveyance 10%, Medical 10%, with estimated tax and take-home pay. Click **Auto-fill FBR Allowances** to fill the allowance boxes, or type your own amounts in **Allowance Overrides**.
- Tick **Take Home (FBR Auto)** if you know the agreed **take-home** amount instead; the system works out the gross for you.
- **Disbursal Bank**, **Account Number** and **PKR IBAN Number** are required. Click **+** to add a bank that is not listed.

> **Important — always check the IBAN**
>
> When you pick a bank and type the account number, the system builds a *suggested* IBAN. It may not be correct. Copy the real 24-character IBAN (it starts with PK) from the employee's bank letter or cheque book.

### Statutory & Trust Compliance

- **Enable EOBI** — type the EOBI number. If the employee is exempt, untick it and type the reason.

- **Enable FBR Tax** — deduct income tax. Type the employee's NTN if they have one, and their provincial social-security number (for example the PESSI number). If they are not registered, type the reason.
- **Opt In PF Fund** and **Opt In Gratuity** — tick if the employee is in your provident fund or gratuity scheme.

## Employee codes

Codes look like **DTE-PRD-00001**:

- **DTE** — the first three initials of your company's *name* (for example "OneNet Solutions" → **ONS**, "Demo Textiles" → **DTE**, "Bin Ishaq" → **BIS**). Words like (Pvt), Ltd, Limited and Pakistan are ignored.
- **PRD** — the short code of the department.
- **00001** — a running number. Numbers are never reused.

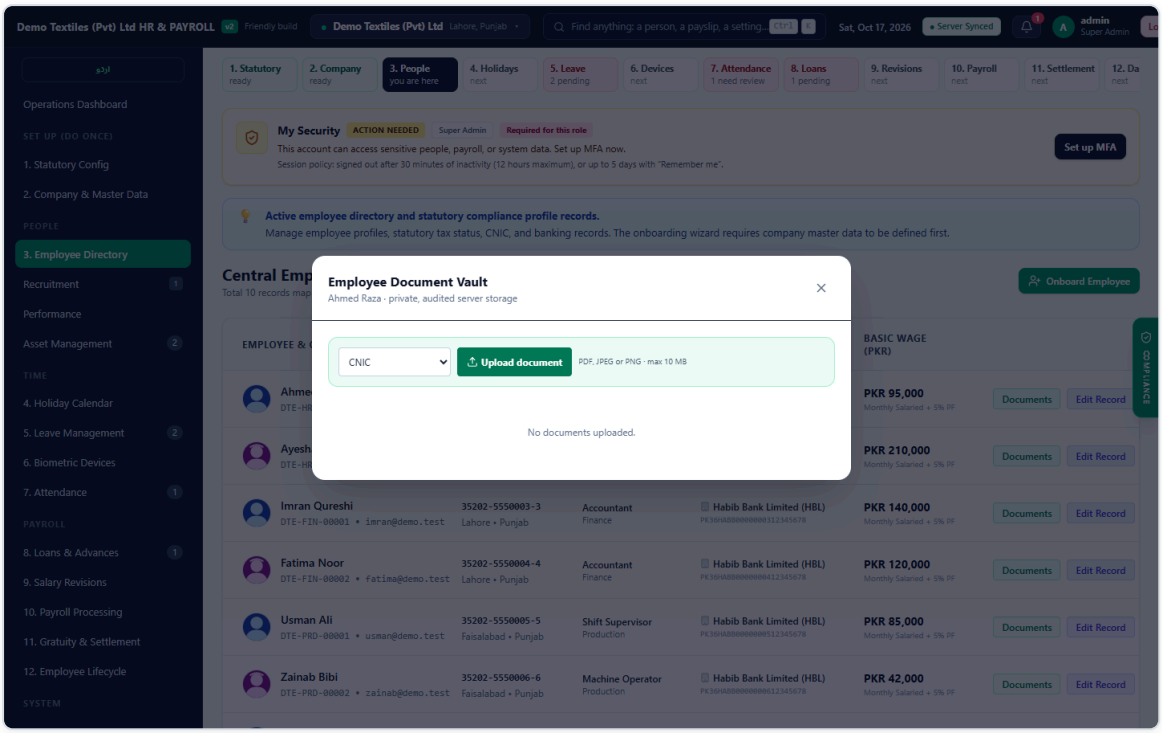

If you type a code yourself it must start with your company prefix and must not already be in use. Existing codes are never changed automatically.

## Change an employee's details

1. Find the person in the list (or press `Ctrl`+`K` and type their name).
2. Click **Edit Record**, change what you need and click **Save Changes**.

> **Good to know**
>
> Salary increases, promotions and transfers should **not** be typed here — use 9. Salary Revisions and 12. Employee Lifecycle, so a second person approves them and arrears are calculated. The list has no search box of its own; use `Ctrl`+`K`. There is no bulk import from Excel; employees are added one by one.

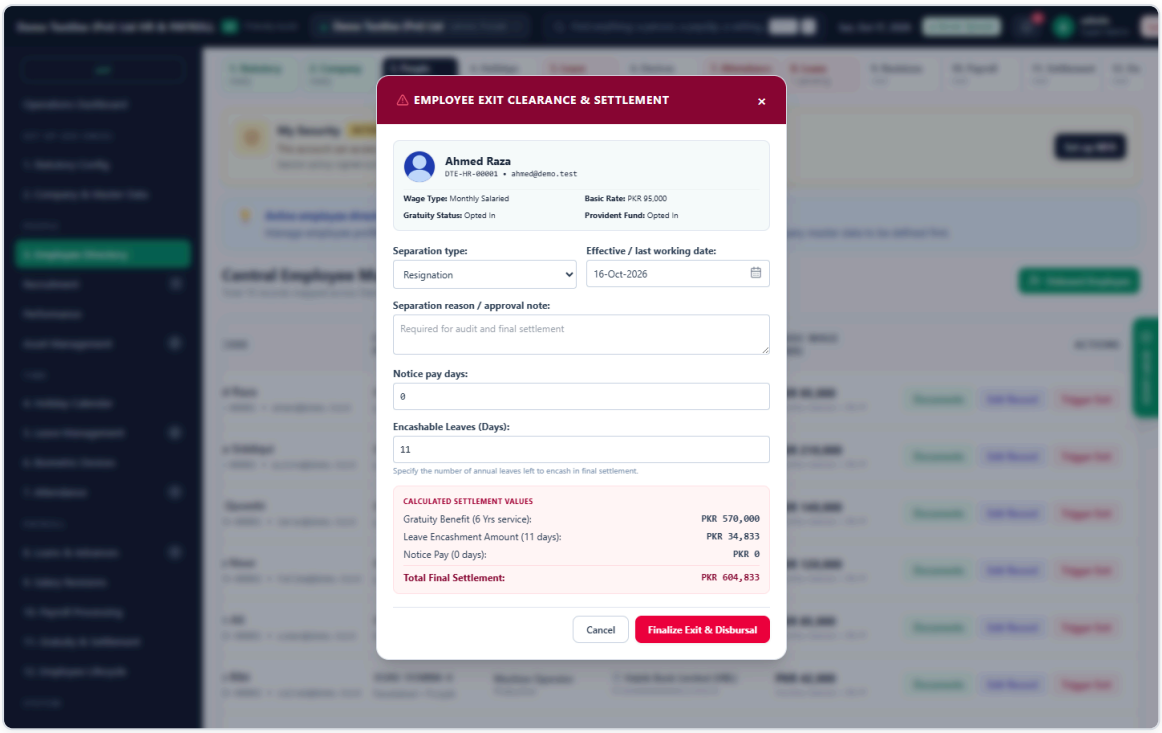

# Employee documents

**Employee Document Vault** — private storage for each employee's papers.

1. Click **Documents** on the employee's row.
2. Choose the document type: CNIC, Contract, Appointment letter, Certificate, Resume or Other.
3. Click **Upload document** and choose the file (PDF, JPEG or PNG, up to 10 MB).
4. Use the download symbol to open a document, or the bin to delete it (you are asked to confirm).

## When an employee leaves (Trigger Exit)

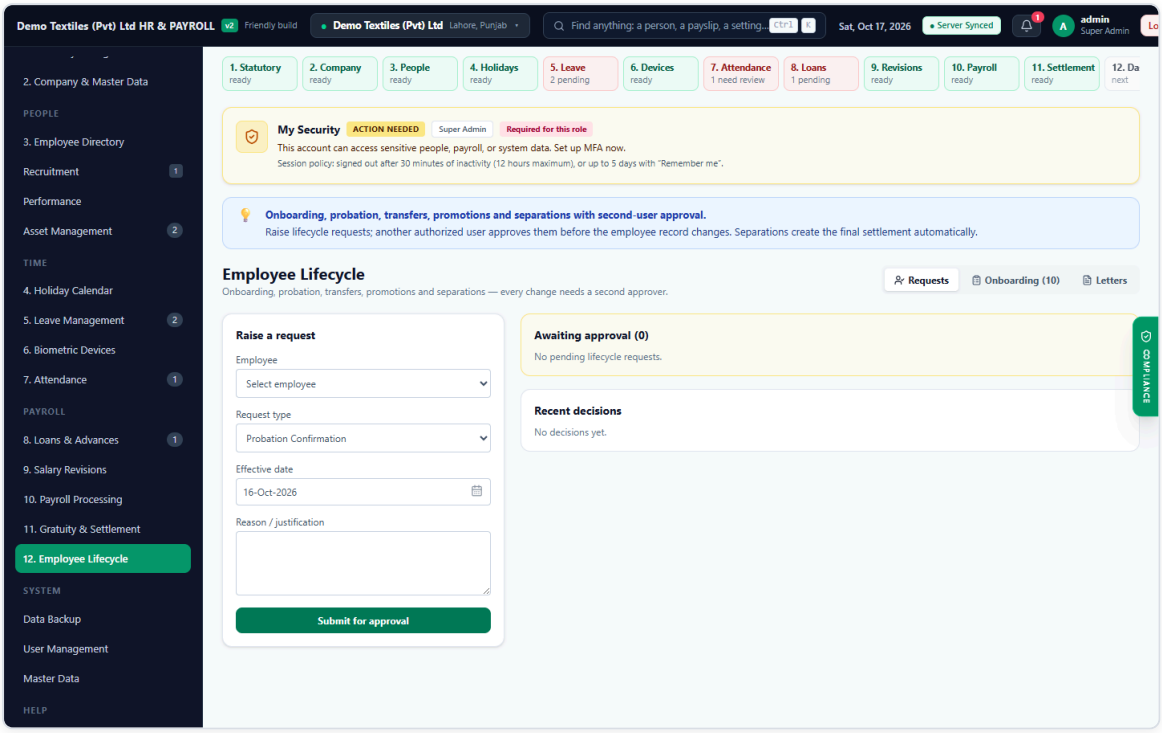

**Employee Exit Clearance & Settlement** — shows an estimate of gratuity, leave encashment and notice pay.

1. Click **Trigger Exit** on the employee's row.
2. Choose the **Separation type** (Resignation, Termination, Retirement, Death or Redundancy) and the last working date.
3. Type the reason, notice-pay days and leave days to be encashed (filled in from the earned leave balance).
4. Click **Finalize Exit & Disbursal**.

> **Important — this sends the exit for approval**
>
> The employee stays Active until **another** person approves the request in **12. Employee Lifecycle**. Approval marks them as left and creates their final settlement in **11. Gratuity & Settlement**. The amounts on this screen are an estimate; the settlement uses your gratuity rules exactly. Before paying, collect company assets (section C5).

# C2 Career changes — 12. Employee Lifecycle

Probation, transfers, promotions, resignations and terminations all go through this page so that a second person approves them before the employee record changes.

**Employee Lifecycle — Requests tab.** Raise a request on the left; requests waiting for approval appear on the right.

## Raise a request

1. On the **Requests** tab, choose the **Employee** and **Request type**.
2. Set the **Effective date** and write the **Reason / justification** (at least 10 characters).
3. Fill the extra boxes for the request type:

| Request type | Extra information |
|---|---|
| Probation Confirmation | None — approval marks probation as confirmed. |
| Probation Extension | New probation review date. |
| Transfer | Destination branch, department and designation. |
| Promotion | New designation and, optionally, the proposed new salary. |
| Resignation / Termination | Notice-pay days and leave days to encash (click "use it" to copy the earned leave balance). |

4. Click **Submit for approval**.

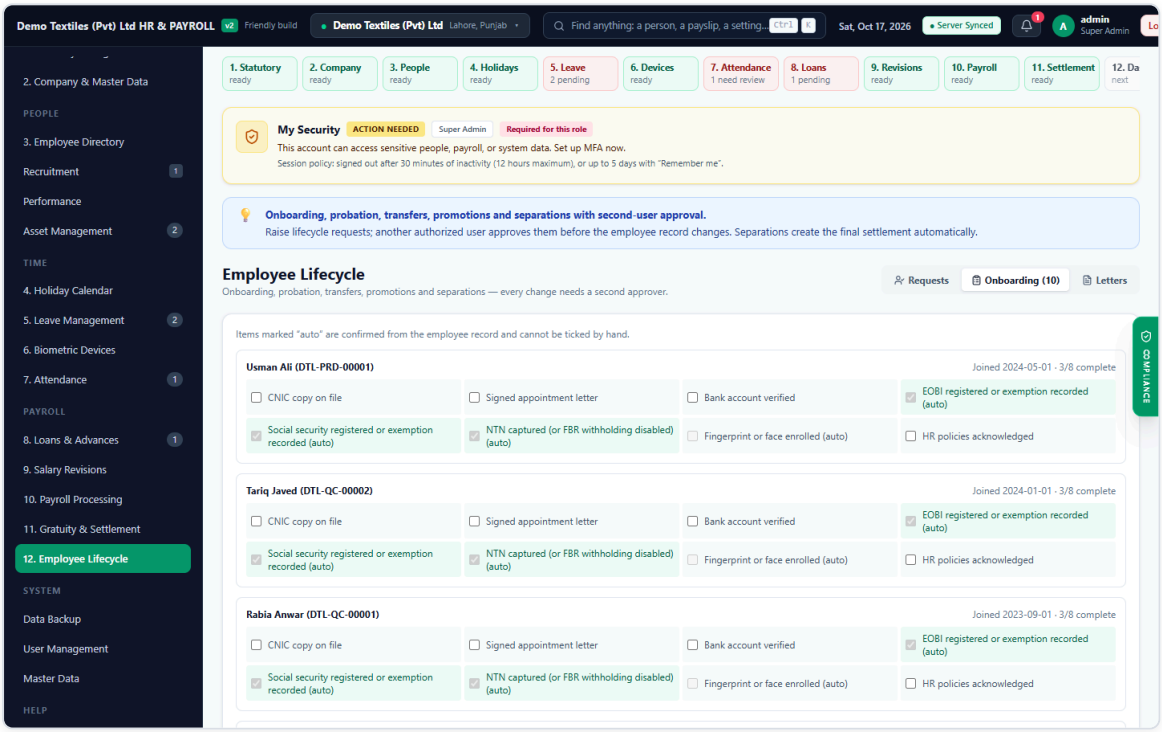

## Approve or reject (a different person)

1. Requests appear under **Awaiting approval** with who raised them.

2 Click **Approve** (type a short comment) or **Reject** (type the reason).

| When approved | What happens |
|---|---|
| Probation extension / confirmation | The probation date or status on the employee record is updated. |
| Transfer | Branch, department and designation change. |
| Promotion | Designation changes. A higher salary becomes a **draft salary revision** that must be approved separately in 9. Salary Revisions. |
| Resignation / Termination | The employee is marked as left, and a final settlement (gratuity, leave encashment, notice pay) is created in 11. Gratuity & Settlement for payroll to process. |

## Onboarding checklist

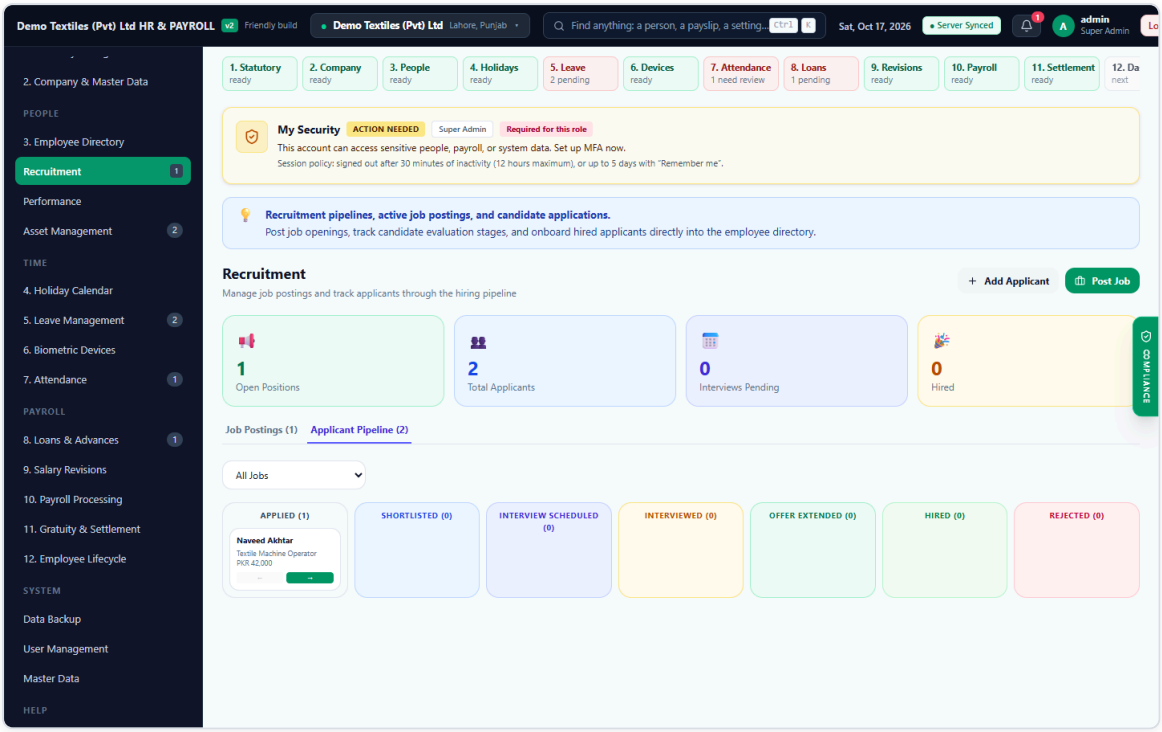

**Onboarding tab** — what is still missing for each new employee.

The **Onboarding** tab lists active employees whose joining paperwork is not complete. Tick by hand: CNIC copy on file, signed appointment letter, bank account verified, HR policies acknowledged. Items marked **(auto)** tick themselves when the employee record is complete: EOBI registered, social security registered, NTN captured, fingerprint or face enrolled.

## Employment letters and experience certificates

On the **Letters** tab, click **Employment letter** (current staff) or **Experience certificate** (staff who have left). A ready-to-print letter opens in a new browser tab; print it with `Ctrl` + `P`, sign and stamp it. If nothing opens, allow pop-ups for this site in your browser.

# C3 Recruitment

**Recruitment — Applicant Pipeline.** Each column is a hiring stage.

## Post a job

1. Click **Post Job**.
2. Fill **Job Title**, department, branch, job type, number of vacancies, salary range, experience and qualification, **Posted Date**, **Closing Date** and the description.
3. Click **Post Job**. (Nothing happens if the title or closing date is empty.)

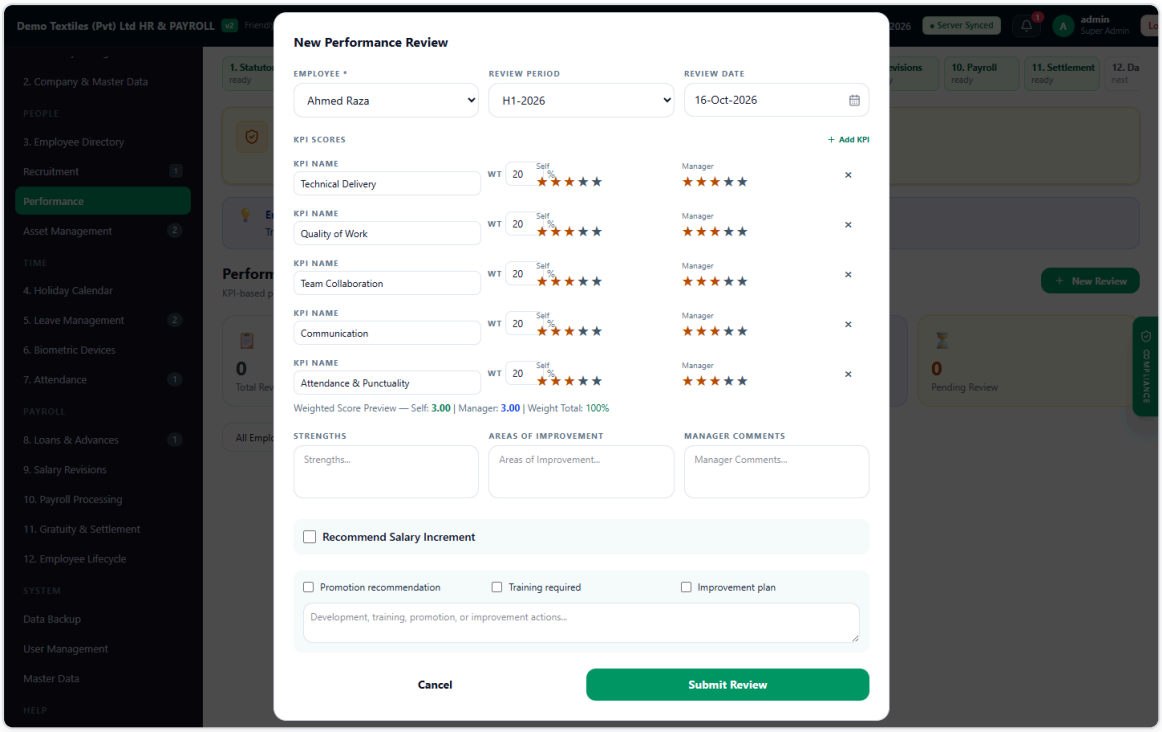

On the **Job Postings** tab, use **Hold** or **Filled** to change a job's status, and **View Pipeline** to see its applicants.

## Track applicants

1. Click **Add Applicant**, choose the job, type the name, email, phone and other details, and save.
2. On **Applicant Pipeline**, move each applicant with the → and ← buttons through: Applied, Shortlisted, Interview Scheduled, Interviewed, Offer Extended, Hired or Rejected.
3. Click an applicant card to see all details or jump to any stage.

> **Good to know**
>
> Moving an applicant to **Hired** does not create the employee record. Add the person yourself with **Onboard Employee** (section C1).

# C4 Performance reviews

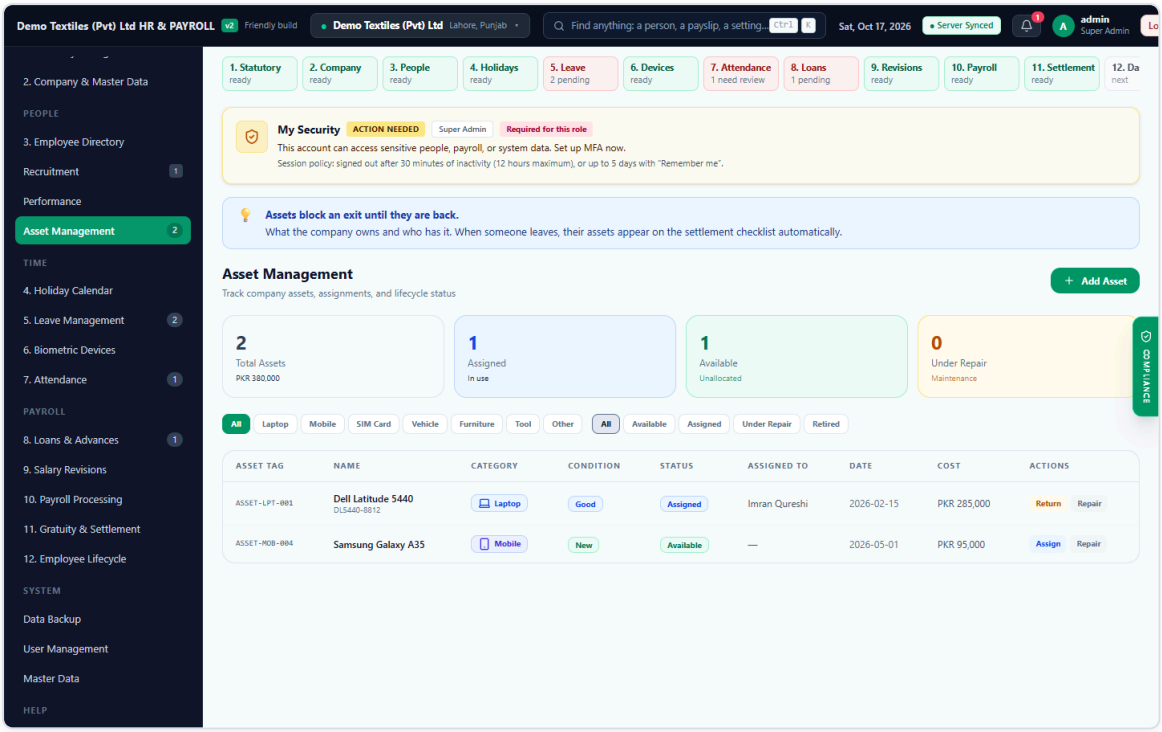

**New Performance Review** — score each KPI from 1 (poor) to 5 (excellent).

1. Open **Performance** and click **New Review**.
2. Choose the employee, review period (for example H2-2026) and review date.
3. For each KPI (Technical Delivery, Quality of Work, Team Collaboration, Communication, Attendance & Punctuality — you can add or remove KPIs), give the weight and the self and manager star ratings. The weights should add up to 100%.
4. Write strengths, areas for improvement and manager comments. Tick **Recommend Salary Increment** (with %), promotion, training or improvement plan if needed.
5. Click **Submit Review**. It shows **Pending HR Approval**.
6. HR clicks **Approve Outcomes** or **Reject Outcomes**. An approved increment becomes a **draft** salary revision; pay changes only after that draft is approved in 9. Salary Revisions.

Employees can see their own approved reviews.

# C5 Company assets

**Asset Management** — laptops, phones, SIM cards, vehicles and other company property.

1. **Add:** click **Add Asset**, type the asset tag (for example ASSET-LPT-004), name, serial number, cost, category, condition and purchase date, and click **Add Asset**.
2. **Give to an employee:** click **Assign** on an available asset, choose the employee and click **Assign**.
3. **Take back:** click **Return** and then **Confirm Return**. The asset becomes Available.
4. **Repairs:** click **Repair** while it is away and **Fixed** when it is back.

> **Important — before a final settlement**
>
> Check this page for anything still assigned to a leaving employee and collect it before the settlement is paid. The settlement does not check assets automatically.

PART D

# Time & attendance

How attendance is recorded and checked, how faces and fingerprints are enrolled, how staff are allowed to punch from their phones, and how leave is handled. For HR and attendance staff.

# D1 How attendance becomes pay

**1. Punch** → **2. Status worked out** → **3. Problems flagged** → **4. Leave & holidays added** → **5. Month locked** → **6. Payroll**

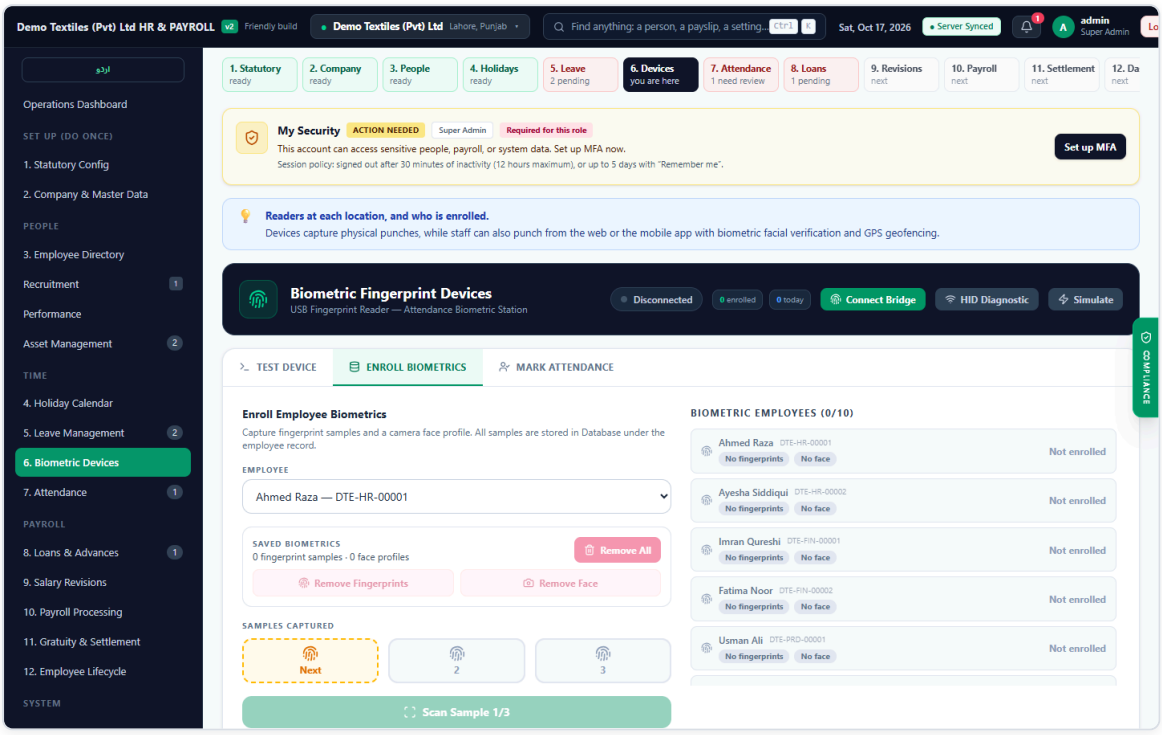

1. **Punch.** Employees punch at a kiosk (face or fingerprint), on their phone (face check and GPS, only when allowed), or HR types an entry by hand. A kiosk keeps punches even when the internet is down and sends them later (up to 8 days old).
2. **Status.** The system compares the punch with the employee's shift:

| Status | Rule |
|---|---|
| Present | Arrived within the grace minutes (default 15 minutes). |
| Late | Arrived after the grace minutes but less than 2 hours late. |
| Half Day | Arrived 2 hours or more late. |
| Absent | No punch on a working day, with no leave and no holiday. |

   Overtime is time worked beyond 8 hours (after breaks). Friday and Ramadan timings are used when set.
3. **Problems are flagged** for a person to check: weak face or fingerprint matches, phone punches outside the branch area, impossible travel, hand-typed entries and employee correction requests.
4. **Leave and holidays.** Approved leave becomes paid (or unpaid) leave days; holidays and weekly days off are added from the calendar.
5. **Lock.** At month end, payroll staff lock ("certify") the register in 10. Payroll Processing. It cannot be locked while any item is waiting for review.
6. **Pay.** Payroll counts present, late, half and leave days from the locked register. Absent and unpaid days are deducted; overtime is paid.

# D2 Enrolling fingerprints and faces — 6. Biometric Devices

Before an employee can use a kiosk, their fingerprints and/or face must be enrolled here — usually on the HR office computer.

**Enroll Biometrics.** Choose the employee; the list on the right shows who is enrolled.

## Connect the fingerprint reader (one time per computer)

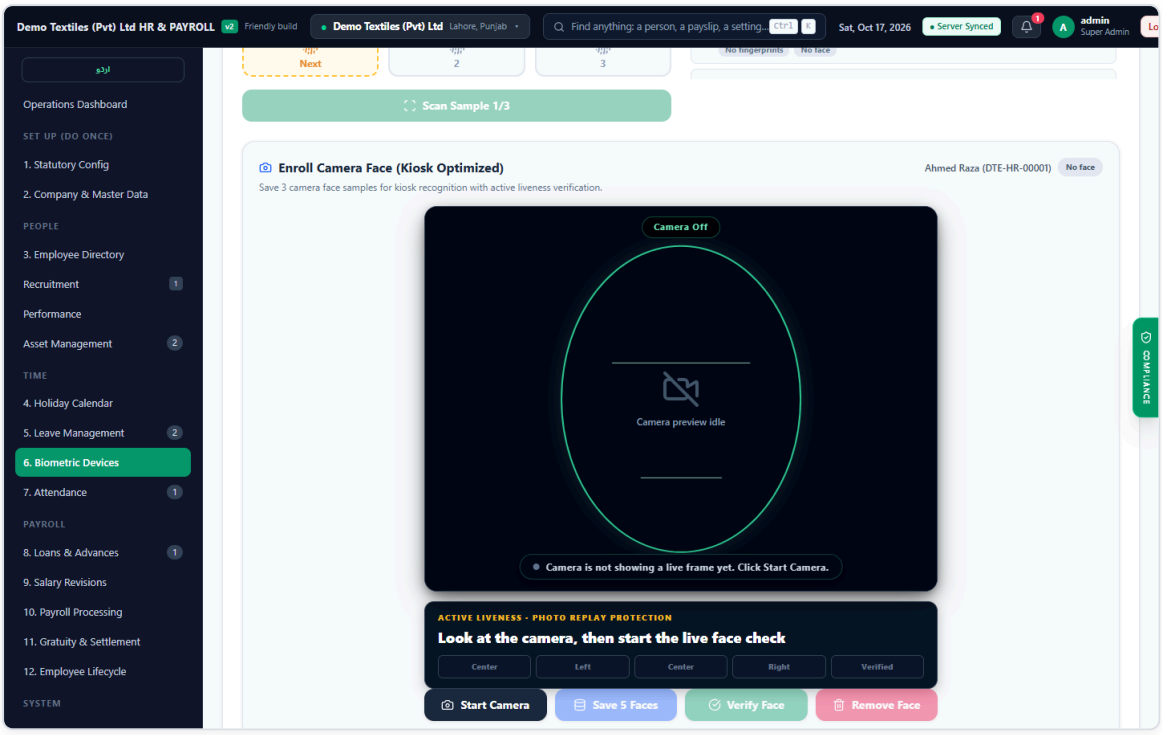

1. Install the reader software (DigitalPersona U.are.U SDK or SecuGen FDx SDK Pro) supplied by your IT person, and plug the reader (U.are.U 4500 or SecuGen Hamster Pro) into a USB port.
2. Open **6. Biometric Devices** and click **Connect Bridge**. The status changes from *Disconnected* to *Native Bridge*.
3. On the **TEST DEVICE** tab, click **Scan Fingerprint** and place a finger to check the reader works.

If you see *Bridge connected, but no fingerprint reader was detected*, unplug and reconnect the reader and restart the bridge program. **Simulate** is only for practice without a reader.

## Enroll fingerprints

1. On **ENROLL BIOMETRICS**, choose the **EMPLOYEE**.
2. Click **Scan Sample 1/3** and ask the employee to press the finger flat on the reader. Repeat for samples 2 and 3 (same finger). A sample below 60% quality is refused — clean the reader and try again.
3. Click **Save to Database**.

# Enroll a face

**Enroll Camera Face.** Start the camera, then click **Save 5 Faces** and follow the head-turn instructions.

1. Choose the employee at the top of the tab.
2. Make sure the room is evenly lit (no bright window behind the person) and **only this employee** is in front of the camera. Glasses normally worn can stay on.
3. Click **Start Camera** and allow the camera if the browser asks. The face should fill the oval.
4. Click **Save 5 Faces**. Follow the prompts: *Center your face*, *Turn your head LEFT* (or RIGHT), *Return to center*, then the other side. This "liveness" check proves a real person is present, not a photo.
5. Keep still while 5 pictures are taken. You see *5 face samples saved for … Click Verify Face to test this enrollment.*
6. Click **Verify Face**. The card **Recognized Employee** should show the right person.
7. Press **Sync** on each kiosk (or wait a few minutes) so it receives the new face.

| Status next to an employee | Meaning |
|---|---|
| Secure face enrolled | Ready to use at kiosks and on the phone. |
| Re-enrollment required | An old-style face record exists but is no longer used. Enroll the face again. |
| No face | Not enrolled yet. |

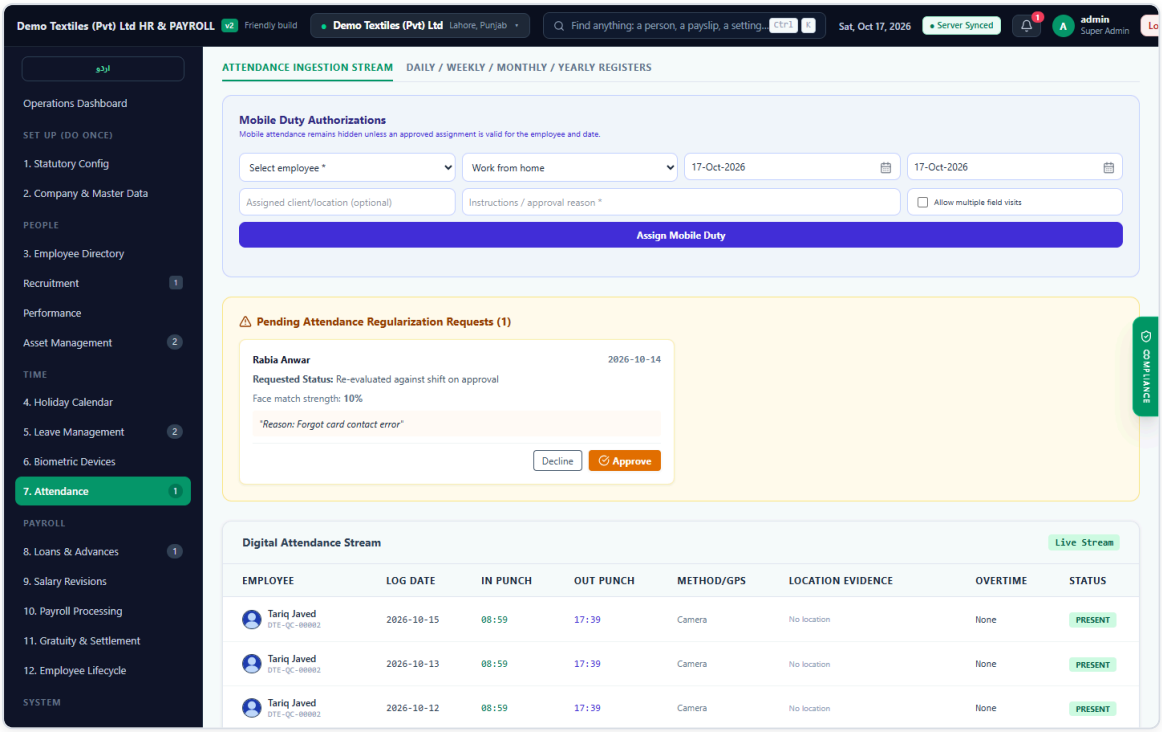

> **Important — after the face-recognition upgrade (October 2026)**
>
> The face recognition was replaced by a much more accurate method. Face records made before the upgrade no longer work — **every employee's face must be enrolled again once**. Fingerprints are not affected.

| Message | What to do |
|---|---|
| *The 5 samples did not agree…* | Someone moved or another face came into view. Only the employee in front of the camera; keep still; try again. |
| *This face matches already enrolled employee …* | This face is already enrolled for someone else. Check you chose the right employee. |
| *Face area is too dark / overexposed* | Improve the lighting; avoid strong light behind the person. |
| *Required head-turn sequence was not completed…* | Turn only the head, slowly, and do not move the camera. |
| *Camera access failed…* | Allow the camera in the browser, and close other programs using it (Teams, Zoom, the kiosk app). |

To remove saved samples use **Remove Face**, **Remove Fingerprints** or **Remove All**.

> **Good to know**
>
> The **MARK ATTENDANCE** tab on this page is for testing the reader only. Real attendance should be recorded on the Windows kiosk (Part G), which checks the fingerprint against the saved templates.

# D3 Checking attendance — 7. Attendance

**7. Attendance** — mobile duty at the top, items waiting for review, then the live list of punches.

## The live list of punches

The **Digital Attendance Stream** shows every punch with the date, in and out times, method (Camera, Biometric, Mobile GPS…), location evidence for phone punches (with a map link and accuracy), overtime and status.

## Review corrections and flagged punches

When anything needs a decision, an amber box **Pending Attendance Regularization Requests** appears. Each card shows the employee, date, reason, any evidence files (gate pass, client sign-off) and, for flagged biometric punches, the match strength.

1. Read the reason and open the evidence.
2. Click **Approve** and type what you checked (for example "gate log confirms 09:05 entry"), or click **Decline** and give a reason.

- **Who decides:** the employee's line manager first. HR may decide only after **3 working days**; after that the request shows *OVERDUE — escalate to department head* and the manager is reminded.
- Approving re-checks the time against the shift — a late arrival stays **Late**. Declining a flagged punch marks the day **Absent**.
- Nobody can decide their own request, and decisions cannot be changed afterwards.

## Add an attendance entry by hand

1. Click **Add Attendance Log**.

2. Choose the employee, date, status, in and out times and method, and click **Save Punch Log**.
3. The entry goes into the review box — **another person must approve it** before the month can be locked.

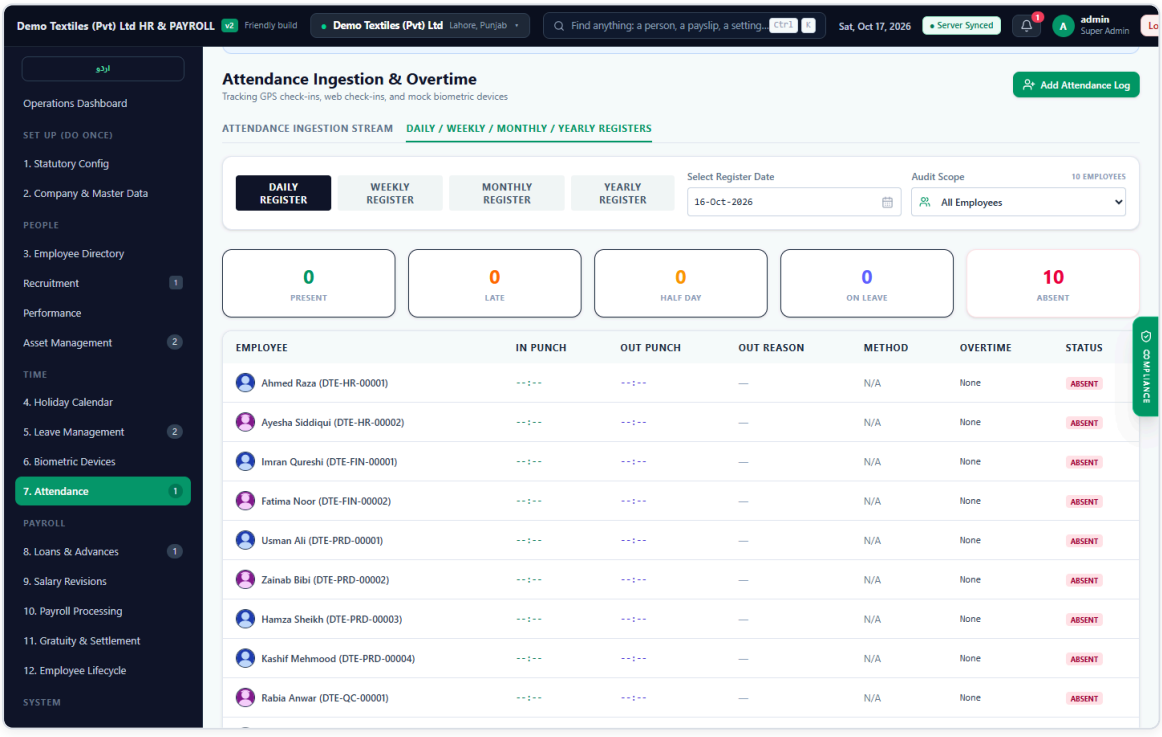

## Allow an employee to punch from their phone (mobile duty)

Phone attendance is switched off for everyone by default. Allow it only for people working away from the office on given days.

1. In **Mobile Duty Authorizations**, choose the employee and the duty type: Work from home, Out of station, Client visit, Market / field duty, Official travel, Direct reporting to worksite or Emergency duty.
2. Set the **from** and **to** dates, optionally the client or location, and type the instructions or approval reason.
3. Tick **Allow multiple field visits** if they will check in at several clients in a day.
4. Click **Assign Mobile Duty**. The employee's app now shows the **Attend** tab on those dates. Click **Cancel authorization** to withdraw it.

Phone punches outside the branch area are still saved but sent to the manager for review.

## Registers (reports)

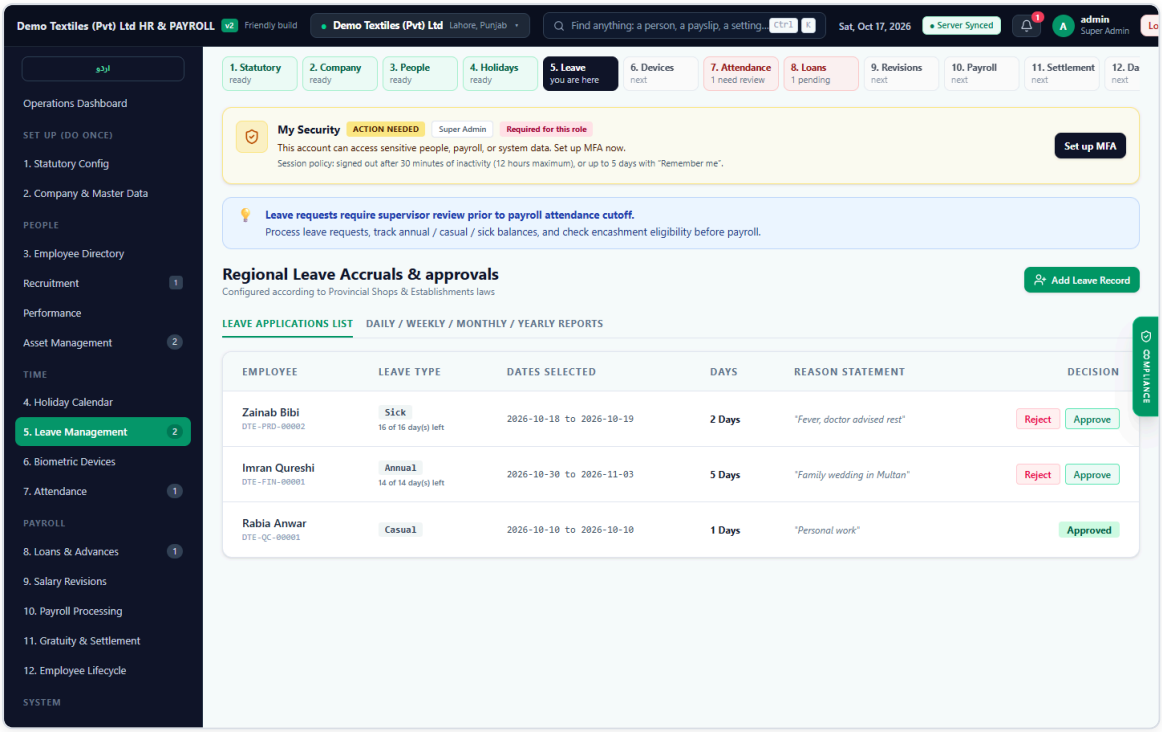

**Daily / Weekly / Monthly / Yearly Registers.**

Click **DAILY / WEEKLY / MONTHLY / YEARLY REGISTERS**. Choose daily, weekly, monthly or yearly, pick the date and (optionally) one employee, and see counts of Present, Late, Half Day, On Leave and Absent with each person's punches.

**Good to know**

The weekly and yearly registers currently show fixed example periods; use the daily and monthly registers for real checks.

# D4 Leave — 5. Leave Management

**Leave Applications List.** The remaining balance is shown under each leave type.

## Leave types and yearly days (default)

| Type | Days per year | Notes |
|---|---|---|
| Annual | 14 | Reduced pro-rata for people who joined during the year. |
| Casual | 10 | Reduced pro-rata for joiners. |
| Sick | 16 | |
| Maternity | 90 | Paper documents to HR. |
| Paternity, Hajj | 0 | Set your policy in 1. Statutory Config first; paper documents to HR. |
| Unpaid | No limit | Deducted from pay. |

Balances run January to December. **Remaining = entitlement − approved − pending**, so waiting requests already reduce the balance.

## Approve or reject a request

1. Employees apply in the mobile app. Requests appear in **LEAVE APPLICATIONS LIST** with the dates, days, reason and remaining balance (red if it is not enough).
2. Click **Approve** or **Reject**. The employee is notified, and approved days are added to the attendance register automatically.

## Record leave yourself

1. Click **Add Leave Record**.
2. Choose the employee, leave type, start and end dates and reason.
3. Click **Approve & Log Leave**. It is saved as approved immediately.

> **Important**
>
> - Leave days are counted as calendar days from start to end, including weekends and holidays.
> - If the balance is not enough, approval is blocked with *Approval blocked: … Apply the excess as Unpaid leave*. Record the extra days as Unpaid leave.

The **DAILY / WEEKLY / MONTHLY / YEARLY REPORTS** tab shows who is on approved leave on a date, and monthly and yearly summaries.

PART E

# Payroll

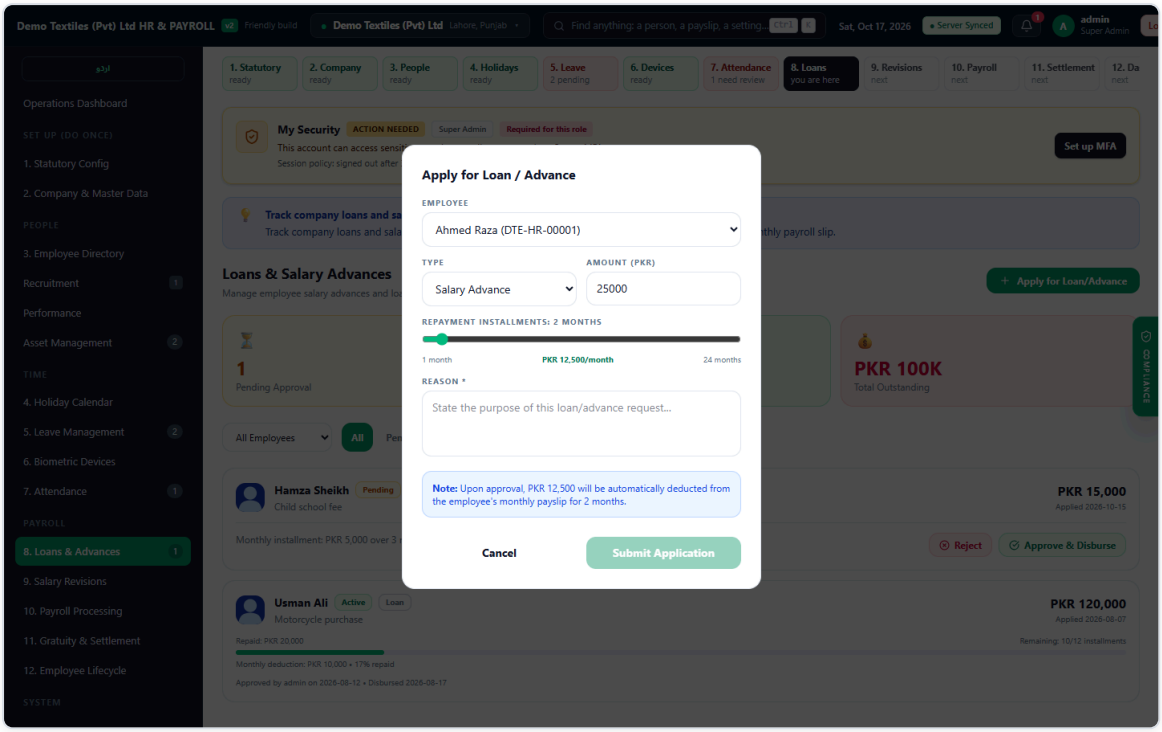

The monthly salary cycle from locking attendance to paying staff and filing returns, plus loans, salary increases and final settlements. For payroll staff.

# E1 Month-end checklist

Follow this list every month. Each step is explained in the sections that follow.

| # | Step | Who | Where |
|---|---|---|---|
| 1 | Approve or reject all leave requests for the month. | HR / managers | 5. Leave Management |
| 2 | Clear every item in "Pending Attendance Regularization Requests" (corrections, hand entries, flagged punches). | Managers / HR | 7. Attendance |
| 3 | Approve loans, salary revisions and lifecycle changes that should apply this month. | A second person | 8, 9, 12 |
| 4 | Enter one-time items (bonus, commission, arrears, reimbursements, deductions) and have them approved. | Payroll + a second payroll user | 10. Payroll Processing |
| 5 | Choose the month and click **Lock Register**. | Payroll | 10. Payroll Processing |
| 6 | Click **Run New Payroll Cycle** and review the draft and payslips. | Payroll (preparer) | 10. Payroll Processing |
| 7 | Click **Approve**. | A **different** payroll user | 10. Payroll Processing |
| 8 | Download the **Bank Advice File** and upload it in your bank's portal. | Payroll | 10. Payroll Processing |
| 9 | After the bank pays, click **Mark Disbursed** and enter the bank reference. | Not the approver | 10. Payroll Processing |
| 10 | Send payslips (email / SMS / WhatsApp), download FBR, EOBI and social-security files, export the accounting journal. | Payroll | 10. Payroll Processing |
| 11 | When tax is deposited with FBR, record the CPR number. | Payroll / finance | 10. Payroll Processing |

# E2 Loans and salary advances — 8. Loans & Advances

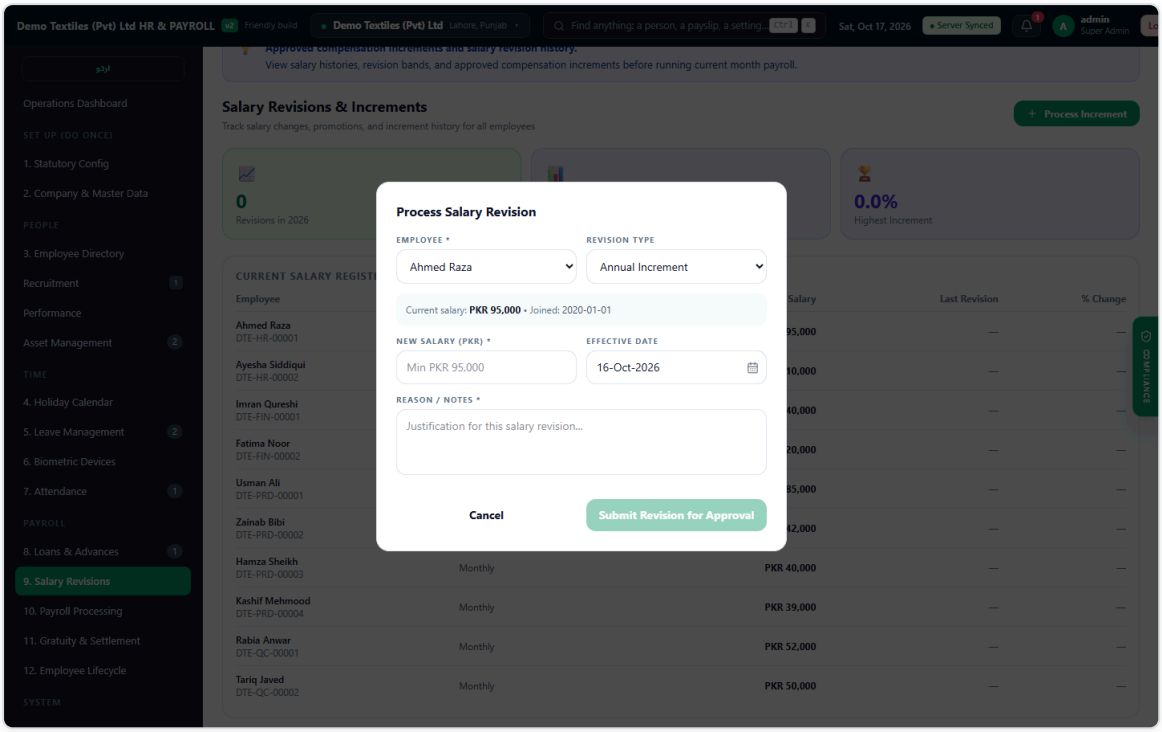

**Apply for Loan / Advance.** The monthly deduction is shown before you submit.

1. Click **Apply for Loan/Advance**.
2. Choose the **Employee** and the **Type** (Salary Advance or Loan), type the **Amount (PKR)**, and move the slider to choose the number of monthly instalments (1–24).
3. Type the **Reason** and click **Submit Application**. It is saved as **Pending**.
4. To approve, click **Approve & Disburse** (or **Reject**). The loan becomes **Active**.

- Each month the instalment is deducted in payroll. The balance goes down only when that month's payroll is marked **Disbursed**. When nothing remains, the loan becomes **Closed**.
- The cards show Repaid, Remaining instalments and a progress bar. Filter with the employee list and the Pending / Active / Closed / Rejected buttons.

> **Important**
>
> Loans do not require a second approver in the system. Follow your company's own approval process (for example a signed loan form) before clicking Approve & Disburse. If Submit does nothing, choose the employee again in the list and resubmit.

# E3 Salary increases — 9. Salary Revisions

**Process Salary Revision.** The preview shows the increase in rupees and percent.

1. Click **Process Increment**.
2. Choose the **Employee** and **Revision Type** (Annual Increment, Promotion, Adjustment or Market Correction).
3. Type the **New Salary (PKR)** and the **Effective Date**, and the reason.
4. Click **Submit Revision for Approval**. It shows **DRAFT — NOT APPLIED**; pay has not changed yet.
5. A **different** person clicks **Approve & Apply**. The salary now changes.

> **Good to know — back-dated increases**
>
> If the effective date is in a month already paid, the system works out the difference and creates an **Arrears** item for the current month. It appears in 10. Payroll Processing → One-time payroll adjustments and must be approved there before the next payroll.

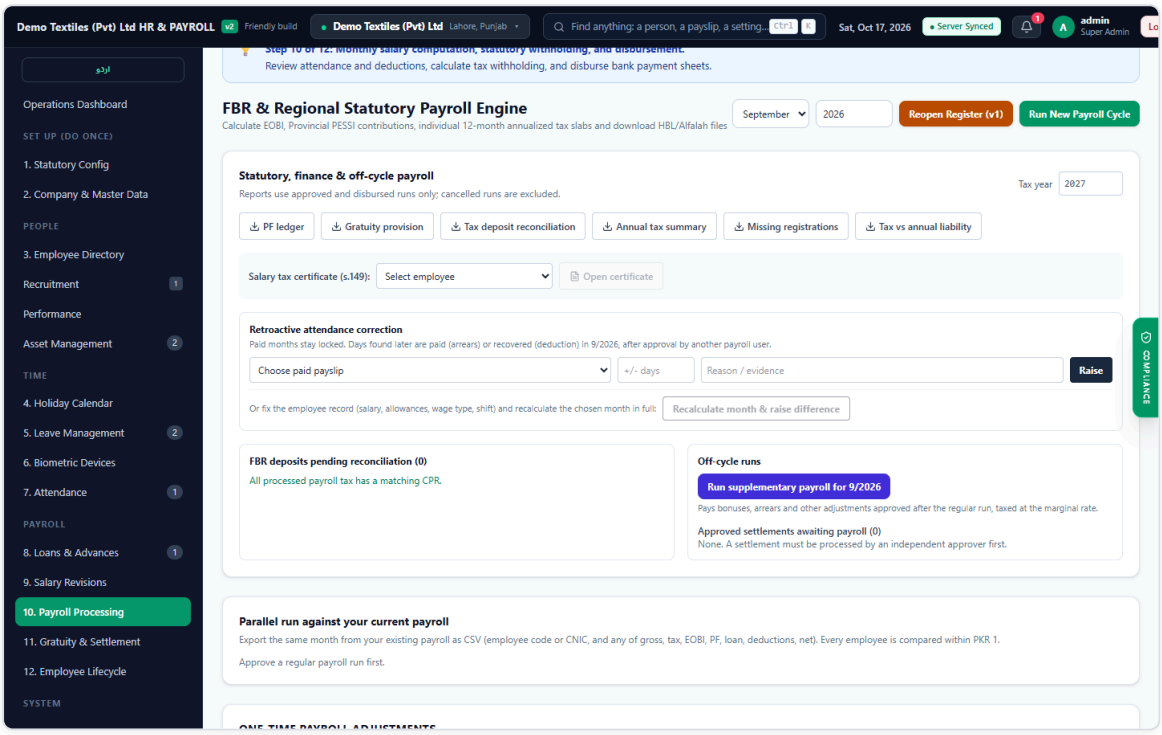

# E4 Running payroll — 10. Payroll Processing

Payroll runs move through these stages:

**Draft** → **approved by a second person** → **Approved** → **bank file, then paid** → **Disbursed**

A Draft or Approved run can be **Cancelled** (with a reason). A Disbursed run can never be cancelled or deleted — corrections go into a later month.

## Step 1 — Lock the attendance register

**September is locked** — the button now reads **Reopen Register (v1)**.

1. At the top right, choose the **month** and **year**.
2. Click **Lock Register**. You see *Attendance register locked. Integrity reference: …*

| If you see | Do this |
|---|---|
| *Attendance period cannot be locked: N exception(s) require review.* | Clear the waiting items in 7. Attendance (missing punch-outs, corrections, hand entries, weak matches). |
| *…because it contains no attendance records.* | You chose the wrong month, or no punches were recorded. |

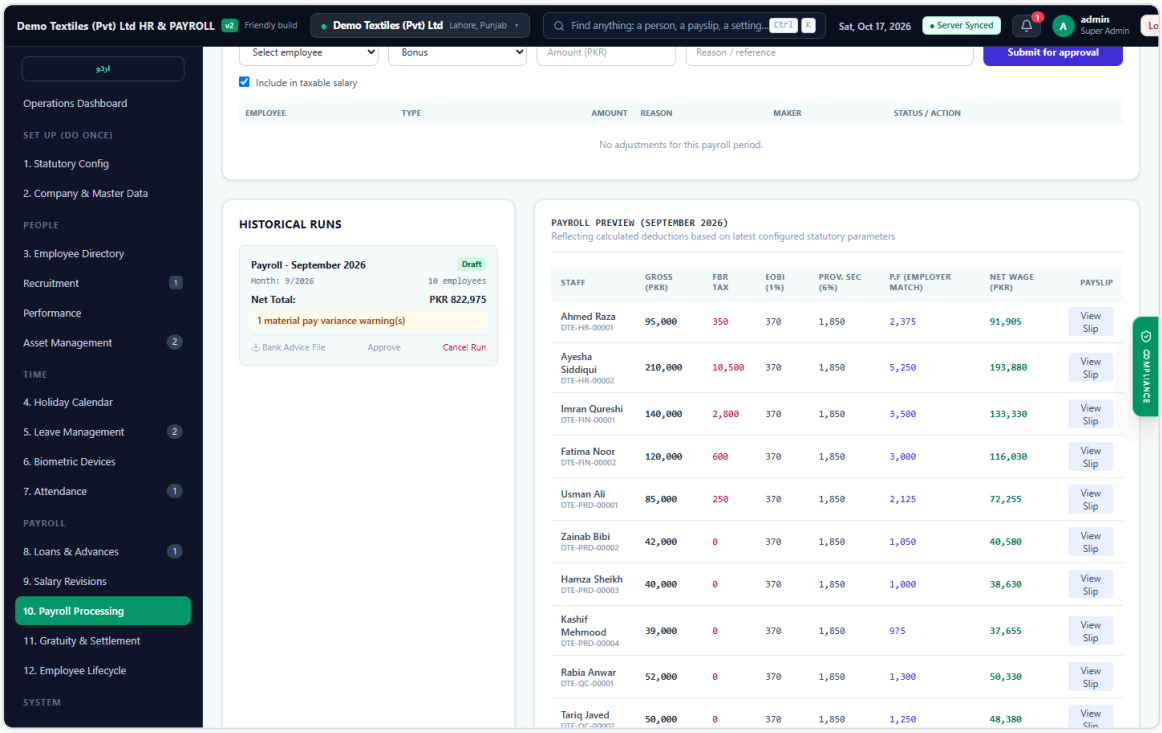

**Need to correct a locked month?** Click **Reopen Register (vN)**, type the reason (at least 10 characters), make the corrections, then click **Lock Corrected Register**. A month cannot be reopened while a payroll run uses it (cancel the run first), and never after it has been paid.

## Step 2 — One-time items (bonus, arrears, deductions)

1. In **ONE-TIME PAYROLL ADJUSTMENTS**, choose the employee and type: Bonus, Commission, Arrears, Reimbursement, Deduction or Tax Adjustment.
2. Type the amount and reason. For bonus, commission and arrears, tick **Include in taxable salary** if it is taxable.
3. Click **Submit for approval**. Another payroll user clicks **Approve** or **Reject**.

Each item is paid by one payroll run only. Items approved after the month's run are paid with a supplementary run (below).

## Step 3 — Create the payroll run

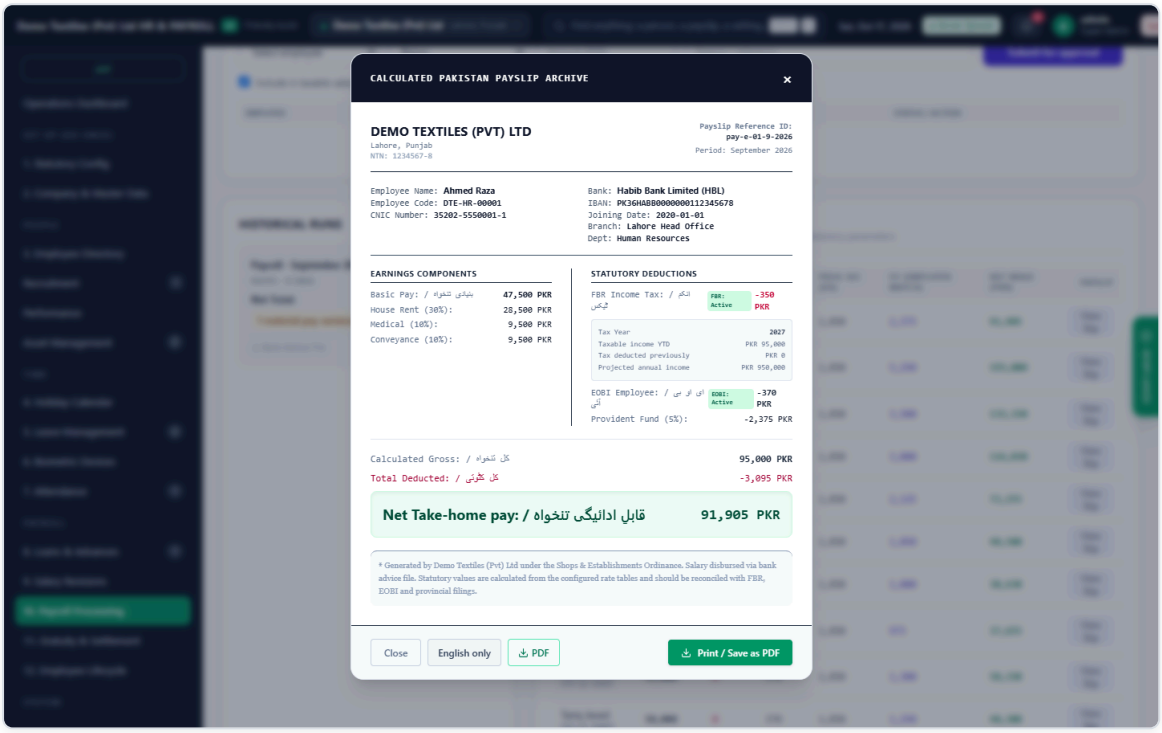

**A Draft run** under Historical Runs (left) and the Payroll Preview with each employee's figures (right).

1. Click **Run New Payroll Cycle**. The system first checks everything; if a check fails you get a clear message (see the table below).
2. When it succeeds you see *Draft payroll created for N employees…* with total gross and net pay. Only Active and On-Leave employees are included.
3. Check the **Payroll Preview** table: gross, FBR tax, EOBI, social security, provident fund and net pay per person. Read any **material pay variance warning** (pay changed by 25% or more since last month).
4. Click **View Slip** to open any employee's payslip.

| Payroll refused because… | Fix |
|---|---|
| *A payroll run already exists for this period.* | Open the existing run instead (or cancel it first). |
| *statutory configuration is not valid for this period* | Update the tax year and effective date in 1. Statutory Config (every July). |

| | |
|---|---|
| *lock the attendance register first* | Do step 1 (again, if data changed after locking). |
| *There are N pending item(s) in "Needs Review"* | Clear the review box in 7. Attendance. |
| *Payroll preflight failed with N critical issue(s)* | Fix employee records: missing/invalid CNIC, duplicate CNIC, missing bank details, invalid IBAN, zero net pay, or pay below minimum wage. |

## Reading a payslip

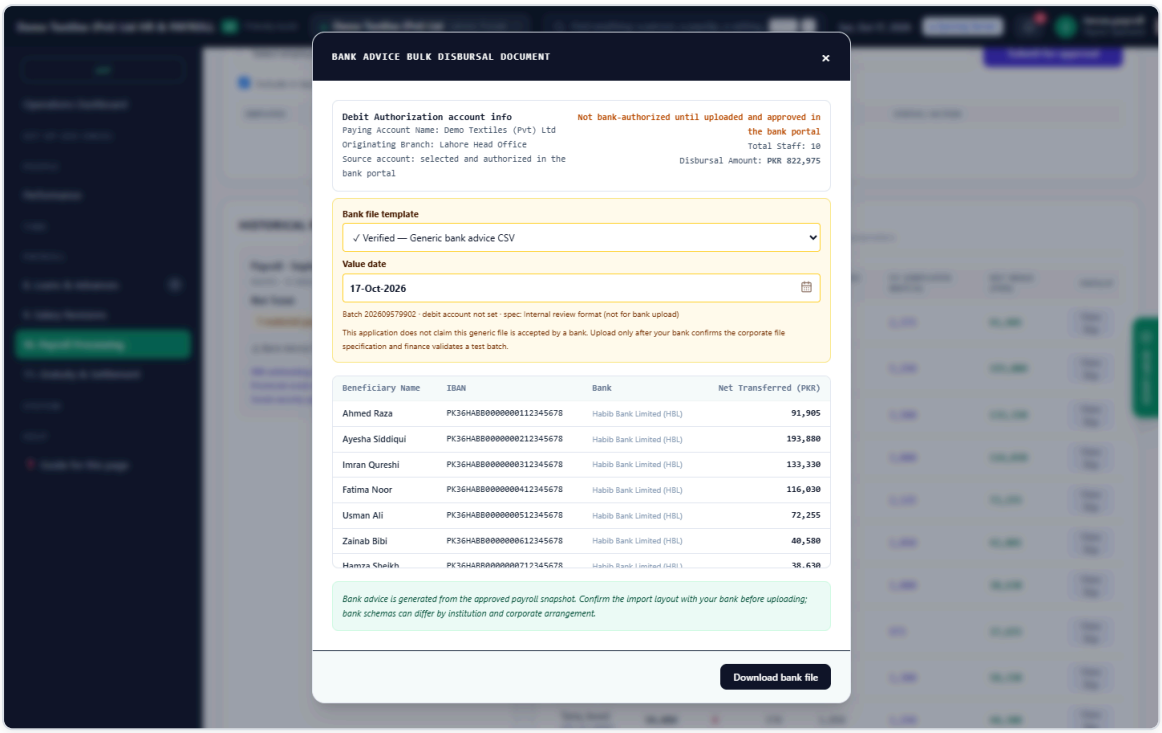

**Payslip** with **English + اردو** switched on.

- **Earnings components:** basic pay, house rent, medical, conveyance, overtime and any bonus or arrears.
- **Statutory deductions:** FBR income tax (with tax year, taxable income so far, tax already deducted and projected yearly income), EOBI, provident fund, loan recovery, absence and other deductions.
- **Net Take-home pay** at the bottom.
- Buttons: **English + اردو** (adds Urdu labels), **PDF** (downloads the payslip), **Print / Save as PDF**, **Close**.

## Step 4 — Approval by a second person

1. A different payroll user signs in, opens the month and checks the draft and a few payslips.
2. They click **Approve** on the run. (For the person who prepared it, the button is grey: *Prepared by you; another payroll officer must approve.*)

## Step 5 — Bank file

**Bank Advice Bulk Disbursal Document** — choose your bank's template and the value date.

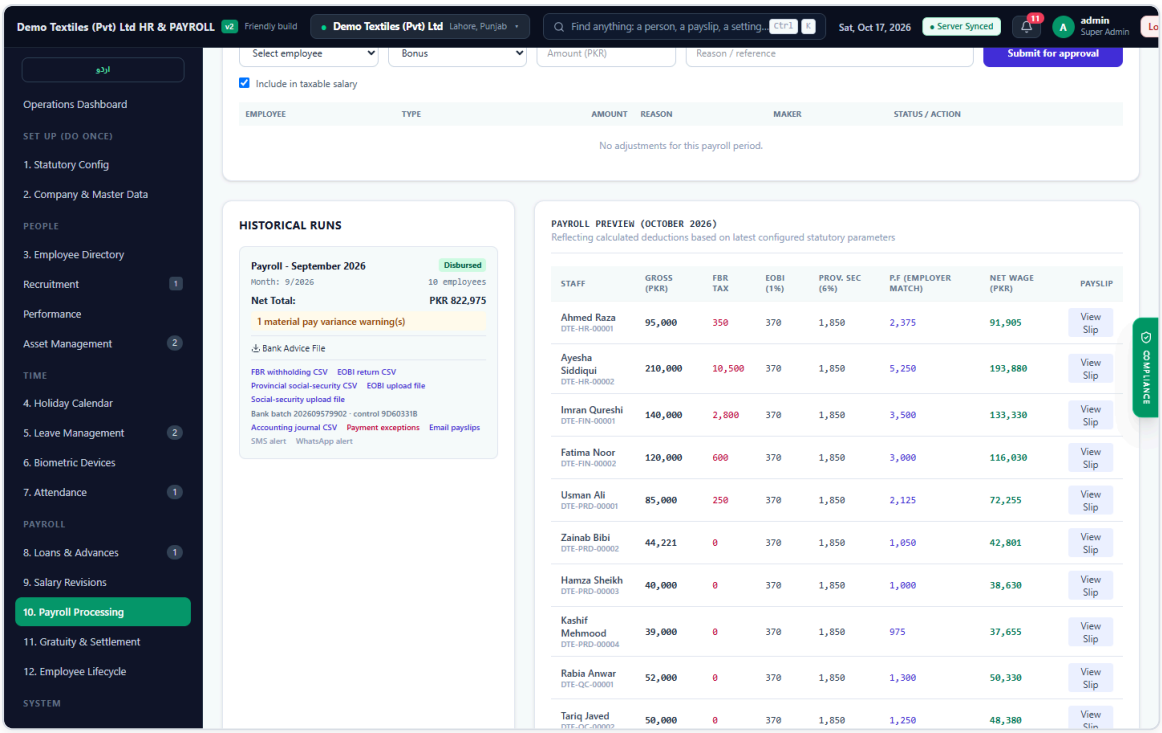

1. On the approved run, click **Bank Advice File**.
2. Choose the **Bank file template** (✓ verified, ⚠ not yet verified) and the **Value date**.
3. Check the beneficiary list (name, IBAN, bank, amount) and the total.
4. Click **Download bank file**, then upload it in your bank's corporate portal and authorise it there.

> **Warning**
> The bank file is not a payment by itself — money moves only when you upload and authorise it in your bank's portal. Use only a template your bank has accepted. If any IBAN is invalid or an amount is zero, the file is blocked until you fix the employee record.

## Step 6 — Mark as paid

1. When the bank has paid, click **Mark Disbursed** and type the bank's transaction / reference number.
2. The run becomes **Disbursed**. Each employee gets a "Salary has been disbursed" notification, loan balances are reduced, and payslips appear in the mobile app.

The person who approved the run cannot mark it paid, and the bank file must be downloaded first.

**A Disbursed run** with all the files and delivery buttons.

## Step 7 — Payslips, returns and accounts

| Button on the run | What it does |
|---|---|
| **Email payslips** | Emails each employee a PDF payslip (bank account partly hidden). Already-sent payslips are skipped. Needs email to be set up on the server. |
| **SMS alert** / **WhatsApp alert** | Sends a short English and Urdu message "your salary has been processed" (no amounts). Grey if not set up on the server; needs a mobile number like +923XXXXXXXXX. |
| **FBR withholding CSV** | Monthly income-tax withholding file for FBR. |
| **EOBI return CSV** / **EOBI upload file** | EOBI contributions (the upload file uses your EOBI template). |
| **Provincial social-security CSV** / **Social-security upload file** | PESSI / SESSI etc. contributions. |
| **Accounting journal CSV** | A balanced journal entry for your accounting software, using your chart of accounts. |
| **Payment exceptions** | Handle payments the bank returned (below). |

Files show warnings for missing CNIC, EOBI or social-security numbers — fix those records before filing.

## Yearly and statutory reports

In **Statutory, finance & off-cycle payroll**, set the **Tax year** and download: **PF ledger**, **Gratuity provision**, **Tax deposit reconciliation**, **Annual tax summary**, **Missing registrations** and **Tax vs annual liability**. To give an employee their yearly **salary tax certificate (section 149)**, choose them and click **Open certificate**, then print. Only approved and paid runs are counted.

## Recording the FBR tax deposit (CPR)

1. After paying the withheld tax to FBR, find the run under **FBR deposits pending reconciliation** and click **Record CPR**.
2. Type the CPR / PSID number, the amount deposited and the deposit date (YYYY-MM-DD).

## Corrections after a month is paid

Paid months stay locked. Use **Retroactive attendance correction**: choose the paid payslip, type + or − days and the reason, and click **Raise**; or fix the employee record and click **Recalculate month & raise difference**. This creates an arrears or deduction item in the current month for another payroll user to approve.

## Bonuses after the month's run — supplementary payroll

Click **Run supplementary payroll for M/YYYY**. It pays one-time items approved after the regular run, taxed at the employee's top rate. Then approve, download the bank file and mark it paid as usual.

## Final settlement payroll

Settlements processed in 11. Gratuity & Settlement appear under **Approved settlements awaiting payroll**. Click **Create final settlement run** to pay one, with the year's tax recalculated and outstanding loans recovered. Then approve, bank file and mark paid as usual.

## When the bank returns a payment

1. On the paid run, click **Payment exceptions**.
2. Click **Mark failed** next to the employee and type the bank's reason.
3. Correct the employee's bank details in 3. Employee Directory.
4. Tick the failed rows and click **Download retry advice**; upload it to the bank.
5. After the bank pays, click **Record retry paid** and type the bank reference.

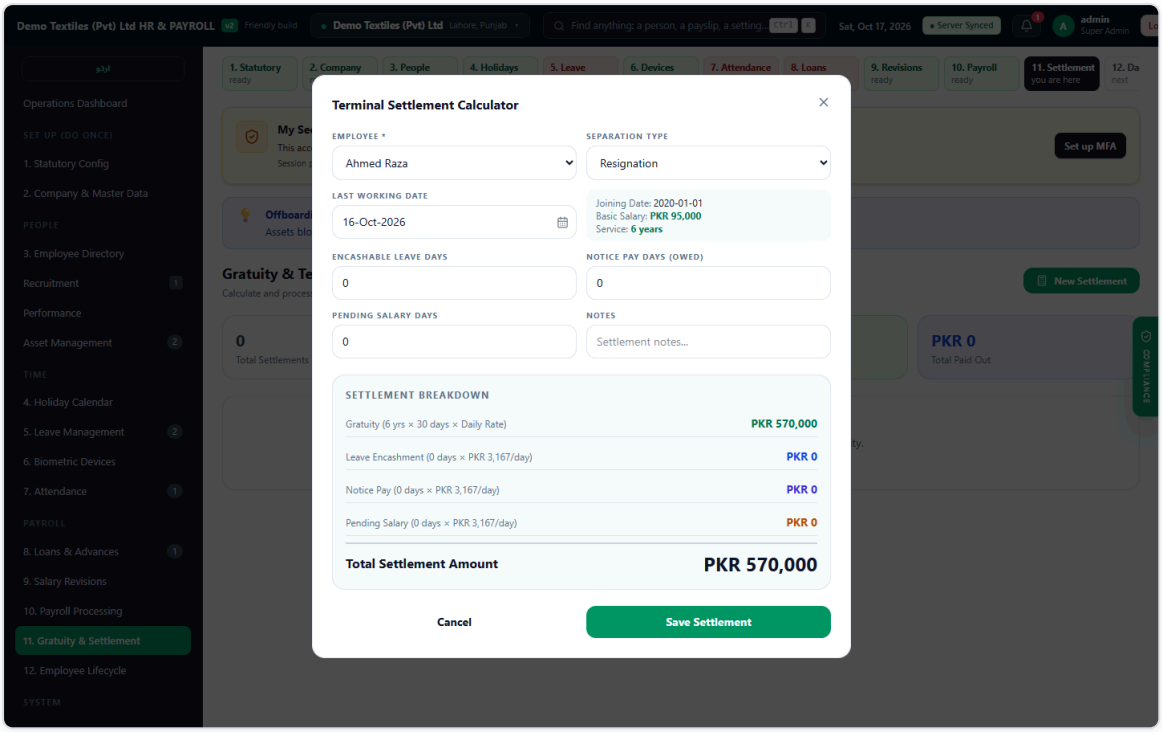

## Cancelling a run

On a Draft or Approved run click **Cancel Run** and type the reason (at least 10 characters). Payslips are kept for audit; one-time items are released for the next run, and the register can be reopened. If the run had been approved, a **Reversal journal CSV** is offered for your accounts.

## Checking against your old payroll (parallel run)

Before relying on the system alone, compare one month with your previous payroll: in **Parallel run against your current payroll** choose an approved run, upload your old payroll for the same month as a CSV file (employee code or CNIC, plus gross, tax, EOBI, PF, loan, deductions and net), review the Matched / Differences counts, download the **Difference report**, explain any differences and click **Record result on this run**.

# E5 Final settlements — 11. Gratuity & Settlement

**Terminal Settlement Calculator.** Gratuity, leave encashment, notice pay and pending salary.

Settlements are created automatically when a resignation or termination is approved in 12. Employee Lifecycle. You can also create one here:

1. Click **New Settlement**.
2. Choose the employee, **SEPARATION TYPE** and **LAST WORKING DATE**. Joining date, basic salary and years of service are shown.
3. Type **ENCASHABLE LEAVE DAYS**, **NOTICE PAY DAYS (OWED)** and **PENDING SALARY DAYS**.
4. Check the **Settlement Breakdown** and total, then click **Save Settlement**. It is **Pending**.
5. A second payroll user clicks **Process**.
6. Pay it either with a final settlement payroll run (section E4) or, after paying outside payroll, a third person clicks **Mark Paid**.

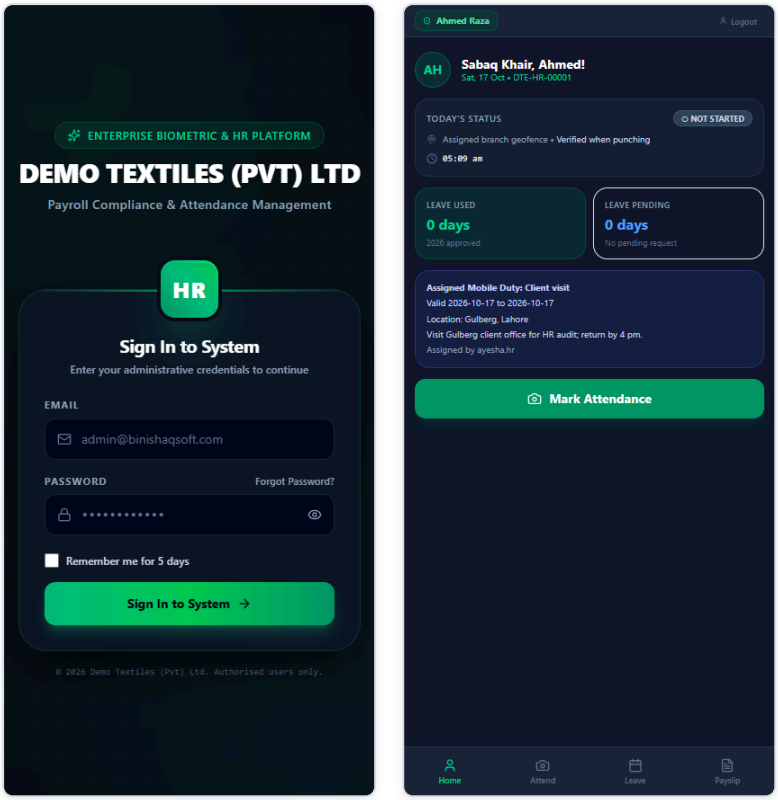

Gratuity follows your rules in 1. Statutory Config (minimum service, part-years, resignation percentage). Employees with less than the minimum service get no gratuity. Collect company assets before paying (section C5).

PART F

# The employee mobile app

For employees. How to install the app, sign in, mark attendance when working away from the office, ask for leave and see your payslips. Managers can photocopy this part for staff.

# F1 Installing and signing in

**Left:** sign-in. **Right:** the Home screen after signing in.

1. Your HR department gives you the app file (**Bin Ishaq HR Suite**). Open it on your Android phone and tap **Install**. If the phone warns about installing from this source, allow it for this file only (Settings → "Install unknown apps").
2. When asked, allow **Camera** and **Location** — they are needed for attendance.
3. Open the app. Type the **email** and **password** HR gave you and tap **Sign In to System**.
4. Tick **Remember me for 5 days** on your own phone so you do not have to sign in every time.

> **Important**
>
> Your login must be **linked to your employee record**. If you see *Employee account is not linked*, ask HR to link it in User Management.

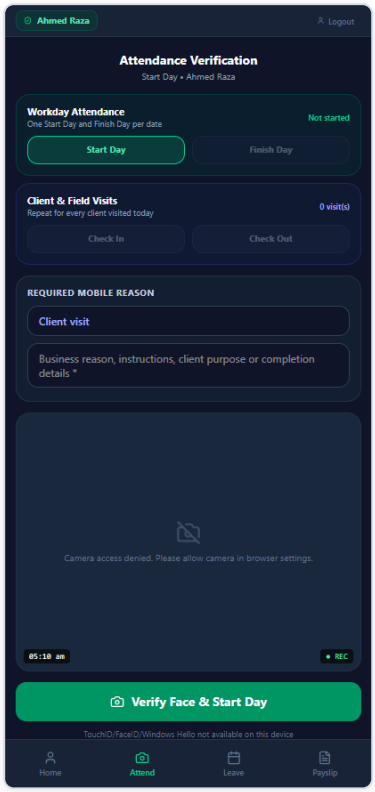

At the bottom are four tabs: **Home**, **Attend** (only on days you are allowed to punch from your phone), **Leave** and **Payslip**. **Logout** is at the top right.

# F2 The Home screen

- **Today's Status:** *Not Started*, *Day Active* or *Day Finished*.
- **Geofence:** *Verified in range* (your punch was inside the branch area), *Manager review* (outside the area, your manager will check), or *Verified when punching* (nothing checked yet today).
- **Leave Used** and **Leave Pending** this year.
- If you are allowed to work outside today, a card shows your **Assigned Mobile Duty**, dates, location and instructions, with a green **Mark Attendance** button.

# F3 Marking attendance from your phone

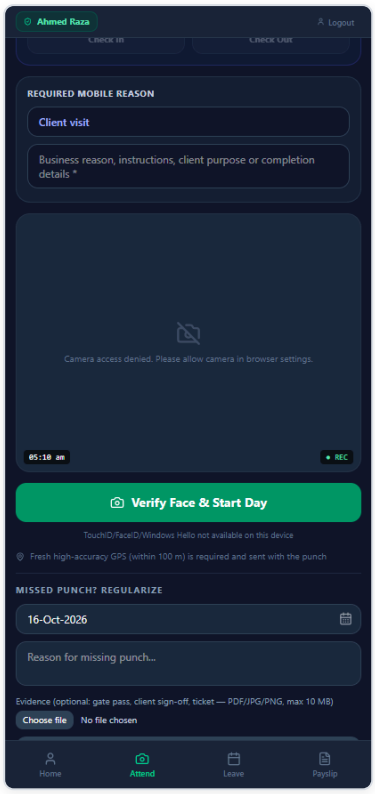

You can punch from your phone **only on days your manager or HR has assigned you mobile duty** (for example a client visit or work from home). On normal office days, use the kiosk at the entrance.

**Attendance Verification.** (In this picture the camera is blocked because it was taken on a computer; on your phone you will see yourself.)

1. Tap **Attend** (or **Mark Attendance** on Home). The front camera starts.
2. Choose what you are doing:
   - **Start Day** and **Finish Day** — once each per day.
   - **Check In** and **Check Out** — for each client or site you visit (if your duty allows visits). For Check In, type the client or location name.
3. Type the reason or details in the box marked ***** (for example "Started HR audit at client office").
4. Hold the phone at face height with your whole face inside the oval, in good light. Tap **Verify Face & ...** (or simply hold still — it starts by itself).
5. Follow the instructions: *Turn your head LEFT / RIGHT*, *Return to center*. Move only your head, not the phone.
6. The phone then takes your GPS location (it must be accurate to within 100 metres — stand near a window or outdoors if needed).
7. You see **Attendance Recorded!** with the time, method and location. Tap **Record Next Action** or **Back to Home**.

## Forgot to punch? Ask for a correction

**Missed Punch? Regularize** — at the bottom of the Attend tab.

1. Scroll to **Missed Punch? Regularize** at the bottom of the Attend tab.
2. Choose the date and describe what happened (at least 10 characters).
3. Optionally attach proof — a gate pass, client sign-off or ticket (photo or PDF, up to 10 MB).
4. Tap **File Regularization**. Your line manager reviews it.

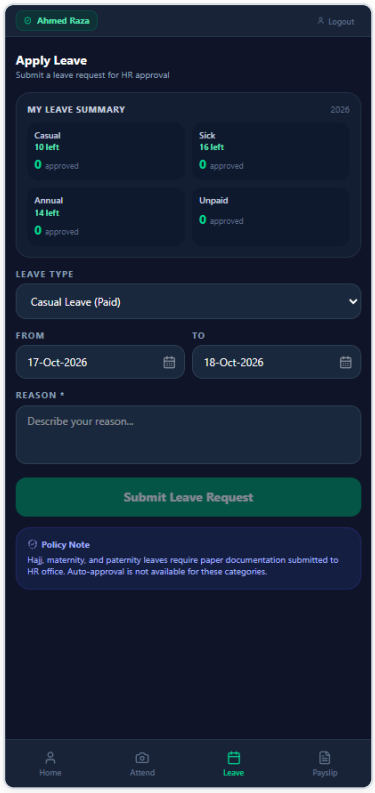

If you do not have the Attend tab, ask your manager or HR to raise the correction for you.

## Problems marking attendance

| Message | What to do |
|---|---|
| *Mobile attendance is not authorized for today.* | You have no mobile duty today — use the office kiosk, or ask your manager. |
| *Face does not match the signed-in employee.* | Only you can punch on your own account. Good light, face fully inside the oval. |
| *Secure face enrollment is required…* | HR must enroll your face first (section D2). |
| *GPS accuracy is … m. Move to an open area…* | Turn on location, go near a window or outdoors, try again. |
| *Camera access denied…* | Allow the camera for the app in your phone settings. |
| *The phone or face moved too far…* | Hold the phone still; turn only your head. |
| *Duplicate punch ignored…* | You punched less than 2 minutes ago — nothing more to do. |

| | |
|---|---|
| *Check out from the active visit before…* | Tap Check Out for your current client first. |

# F4 Asking for leave

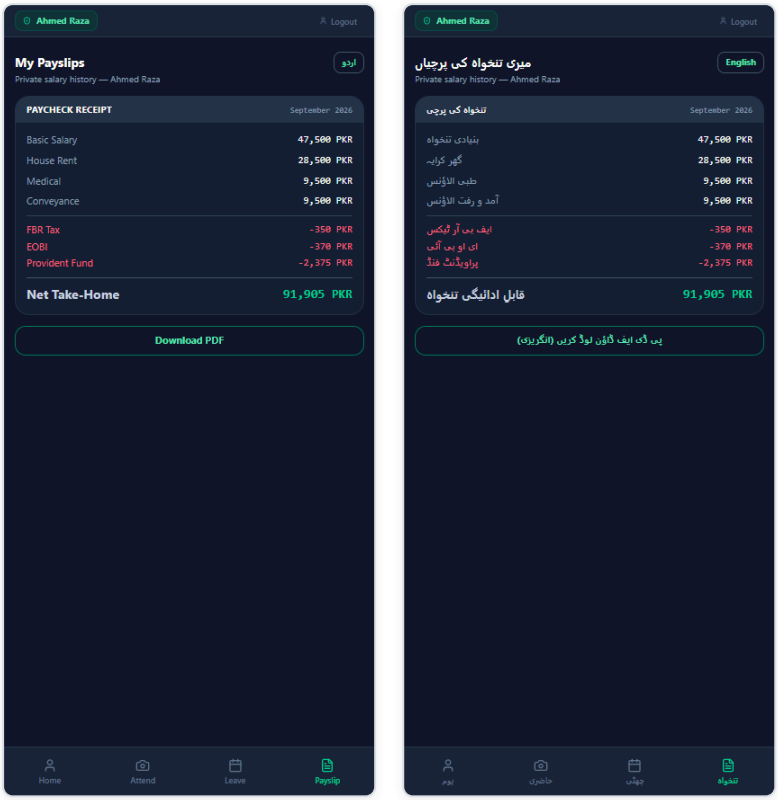

**Apply Leave** — your remaining days are shown at the top.

1. Tap **Leave**. **My leave summary** shows days left for Casual, Sick and Annual leave.
2. Choose the **LEAVE TYPE**: Casual, Sick / Medical, Annual or Unpaid.
3. Choose the **FROM** and **TO** dates and type the reason.
4. Tap **Submit Leave Request**. HR or your manager will approve or reject it, and you will be notified.

If you do not have enough days left, apply for the extra days as Unpaid leave. Hajj, maternity and paternity leave are arranged with HR using paper forms.

# F5 Your payslips

**My Payslips** in English (left) and Urdu (right).

1. Tap **Payslip**. Your latest payslip appears after the company has paid salaries for that month.
2. If there are several, choose the month in **Choose pay period**.
3. Tap **اردو** to read it in Urdu (tap **English** to switch back).
4. Tap **Download PDF** to save it (the PDF is in English).

PART G

# Attendance kiosks

Setting up the Windows attendance kiosk at your entrance, using it every day, and using an Android tablet or phone as a kiosk. For administrators and the staff who look after the kiosk.

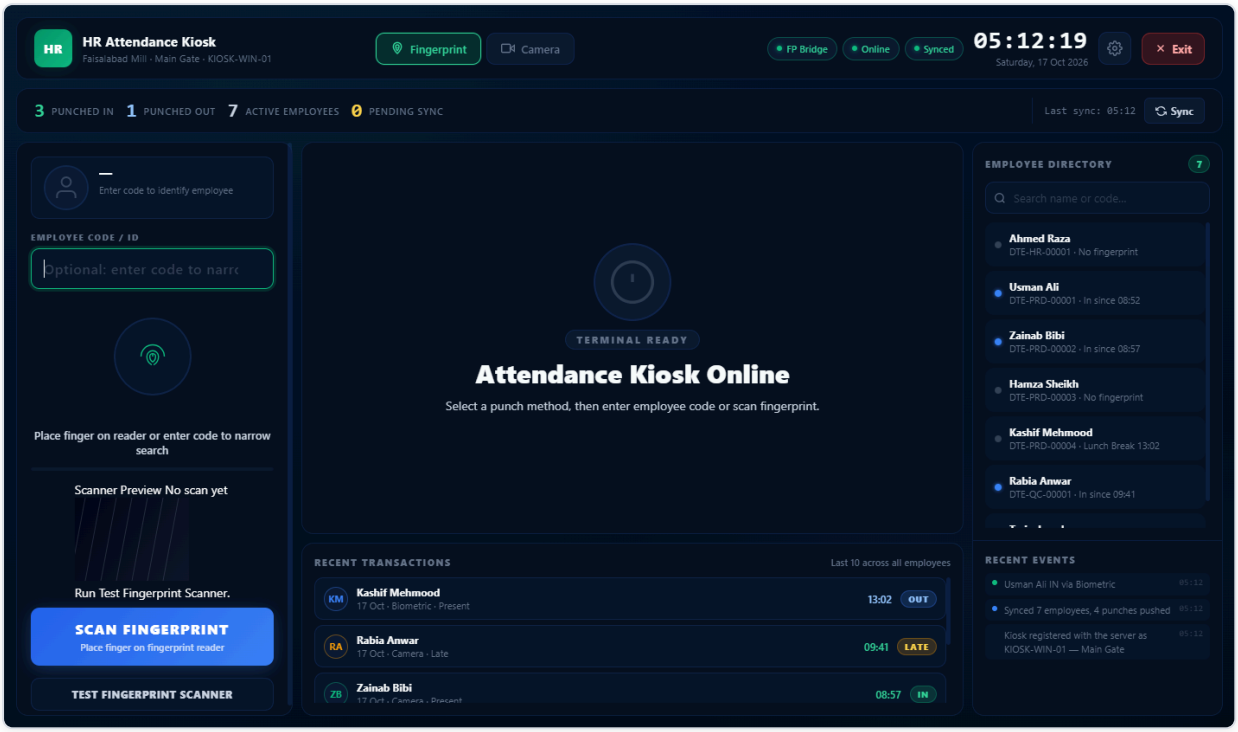

# G1 Installing the Windows kiosk

You need a Windows 10 or 11 PC with a webcam and/or a USB fingerprint reader (DigitalPersona U.are.U 4500 or SecuGen Hamster Pro), and an internet connection.

1. Run the installer **Bin Ishaq Attendance Kiosk Setup 1.0.x.exe** given by your IT person. Choose the install folder and finish. Desktop and Start-menu shortcuts are created.
2. The kiosk starts by itself every time Windows starts. Only one copy runs at a time.
3. To **update** to a newer version, just run the newer installer. It closes the running kiosk automatically; punches waiting to be sent are kept. (Version numbers go up with every release — 1.0.1, 1.0.2…; the current version is shown in Settings.)

> **Tip — first update from version 0.0.0**
>
> If updating from the very first version (0.0.0) fails, uninstall "Bin Ishaq Attendance Kiosk 0.0.0" from Windows Settings → Apps, then run the new installer. Your kiosk settings and waiting punches are kept.

# G2 The kiosk screen

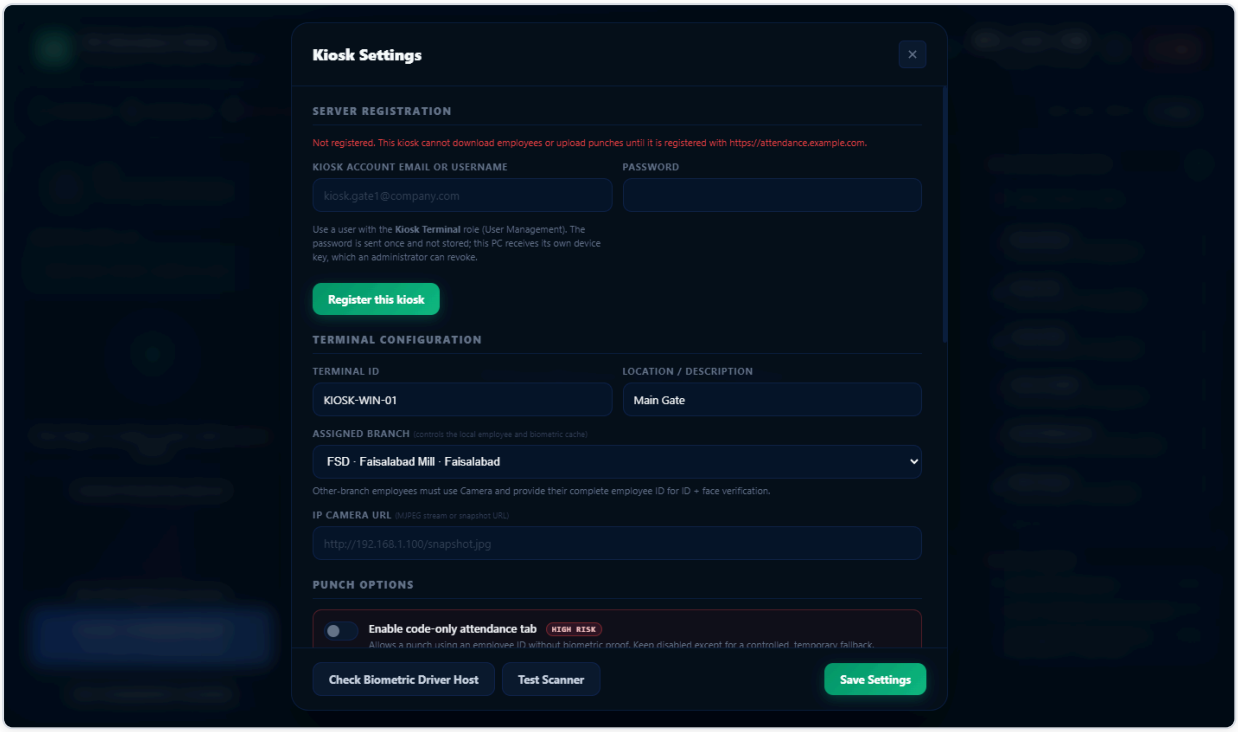

**The kiosk main screen** on the Fingerprint tab.

| Area | What it shows |
|---|---|
| Top bar | Branch, location and terminal ID; the punch method tabs (**Fingerprint**, **Camera**, and **Employee Code** only if enabled); status lights; clock; Settings (gear) and **Exit**. |
| Status lights | **FP Bridge** — green when the fingerprint reader program runs. **Online** — green after a successful sync, red when the server cannot be reached. **Synced** — amber when punches are waiting to be sent. |
| Numbers bar | Punched in, punched out, active employees, pending sync, last sync time and the **Sync** button. |
| Left panel | Employee code box (optional) with keypad, and the punch button. |
| Centre | Camera view or result card; below it the last 10 punches. |
| Right panel | Employee directory with search (tap a person to fill their code) and recent events. |

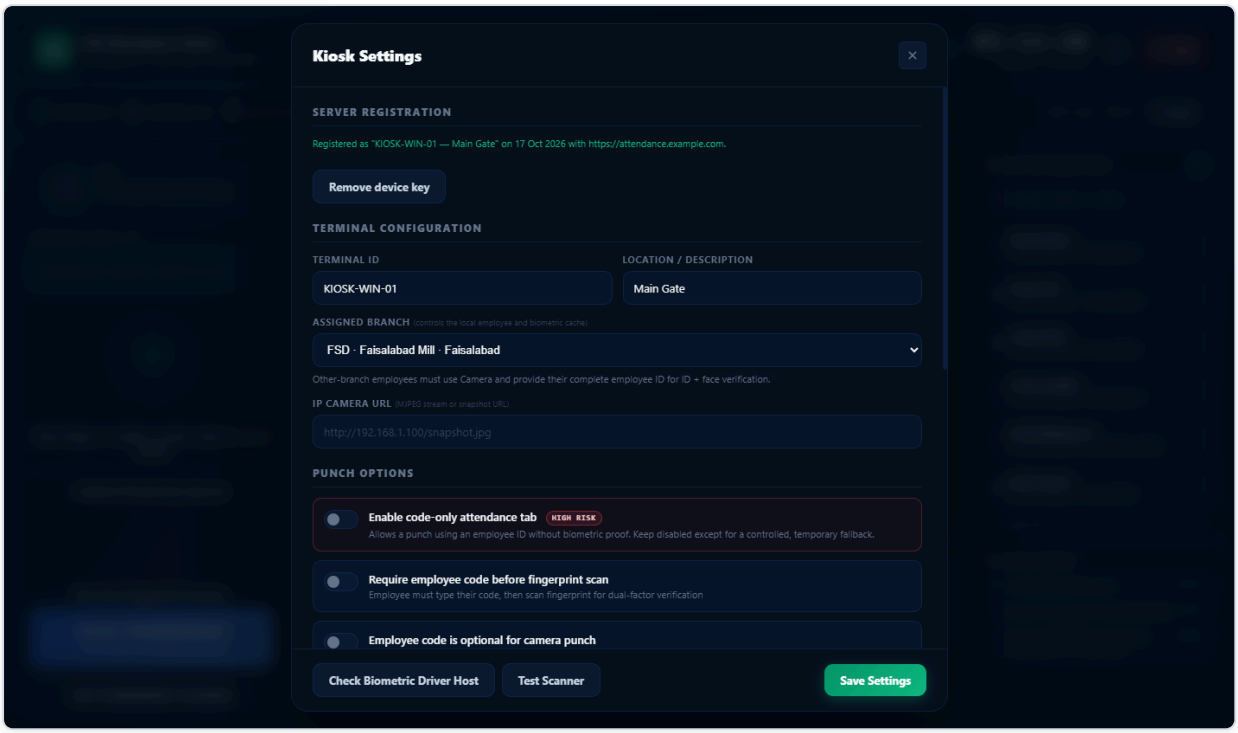

Keyboard shortcuts: `F2` Fingerprint, `F3` Camera, `F5` Sync, `Esc` closes Settings.

# G3 First start: register the kiosk and choose its branch

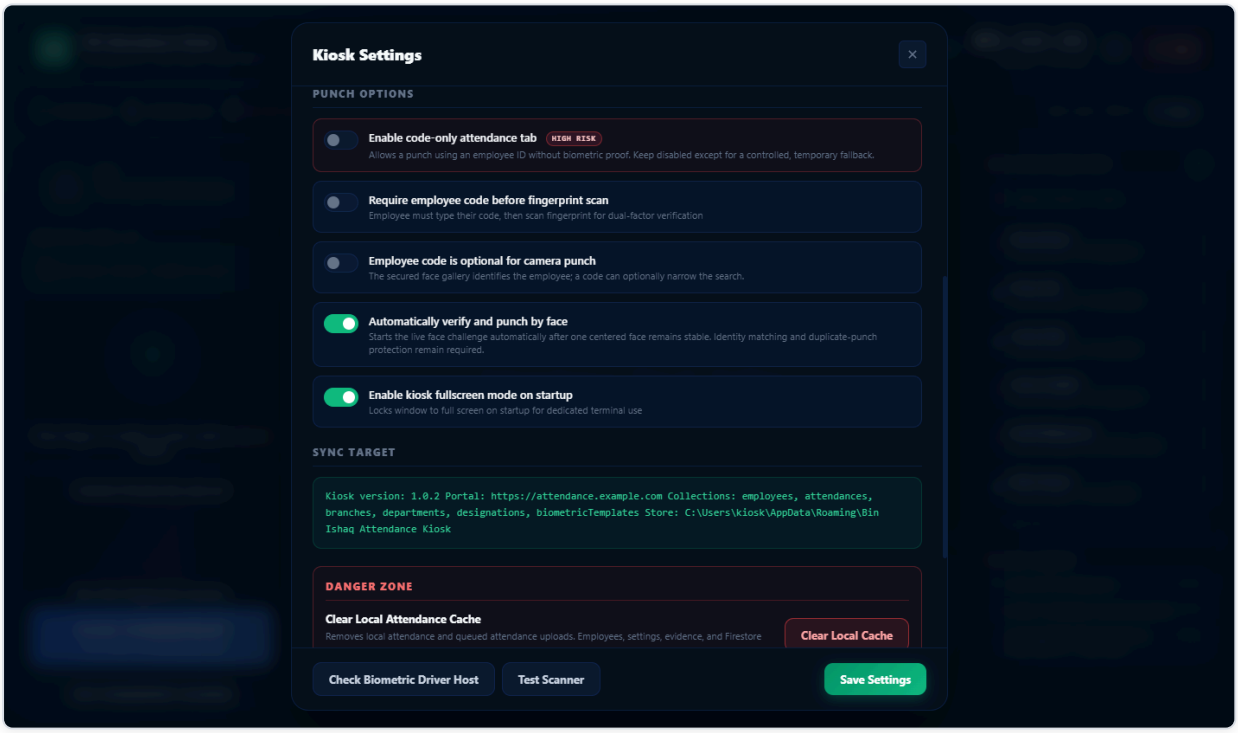

**Kiosk Settings — not registered yet.** Sign in once with the Kiosk Terminal account.

1. An administrator creates a login with role **Kiosk Terminal** (section B5).
2. On the kiosk, click the **gear** (Settings).
3. Under **SERVER REGISTRATION**, type the kiosk account's email (or username) and password, and click **Register this kiosk**. The password is used once and not stored; the PC receives its own secret key.
4. The line turns green: *Registered as "…" on … with …*, and the kiosk downloads employees.
5. Under **TERMINAL CONFIGURATION**, set the **TERMINAL ID** (for example KIOSK-WIN-01), **LOCATION / DESCRIPTION** (for example Main Gate) and — required — the **ASSIGNED BRANCH**. The kiosk keeps only that branch's employees.
6. Click **Save Settings**.

**Kiosk Settings — registered. Remove device key** disconnects this PC from the server.

## Punch options

**Punch options.**

| Option | Meaning |
|---|---|
| Enable code-only attendance tab **HIGH RISK** | Lets people punch by typing an employee code with no face or fingerprint. Anyone could punch for someone else — keep it **off** except as a short emergency fallback. |

| | |
|---|---|
| Require employee code before fingerprint scan | Employees type their code, then scan their finger (extra safety). |
| Automatically verify and punch by face | The face check starts by itself when one face stays in the oval. Recommended on. |
| Enable kiosk fullscreen mode on startup | Fills the whole screen at start-up. |
| IP camera URL | Leave empty. Network cameras cannot prove a real person is present, so camera punching is blocked when this is set. Use the PC's webcam. |

The footer has **Check Biometric Driver Host** and **Test Scanner** (tests the fingerprint reader without recording attendance). Further down, **Sync Target** shows the **Kiosk version** and server address.

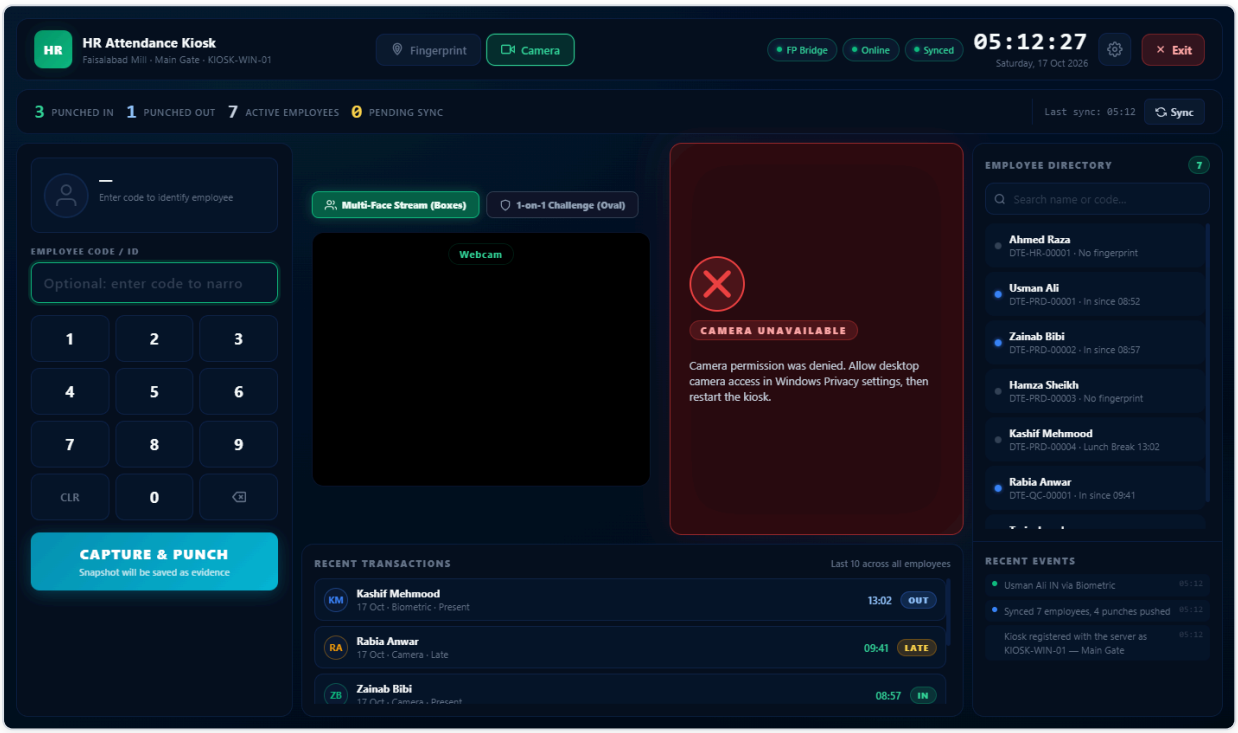

> **Warning — Clear Local Cache**
> The **Danger Zone** button **Clear Local Cache** permanently deletes punches stored on this PC that have not been sent yet. Use it only when your IT person asks, and after a successful Sync.

# G4 Punching in and out at the kiosk

## With a fingerprint

1. On the **Fingerprint** tab, (optionally) type your code.
2. Place the enrolled finger flat on the reader (or press **SCAN FINGERPRINT**).
3. The result card shows your name and **Punch In Recorded** or **Punch Out Recorded**.

## With your face — several people at once (Multi-Face Stream)

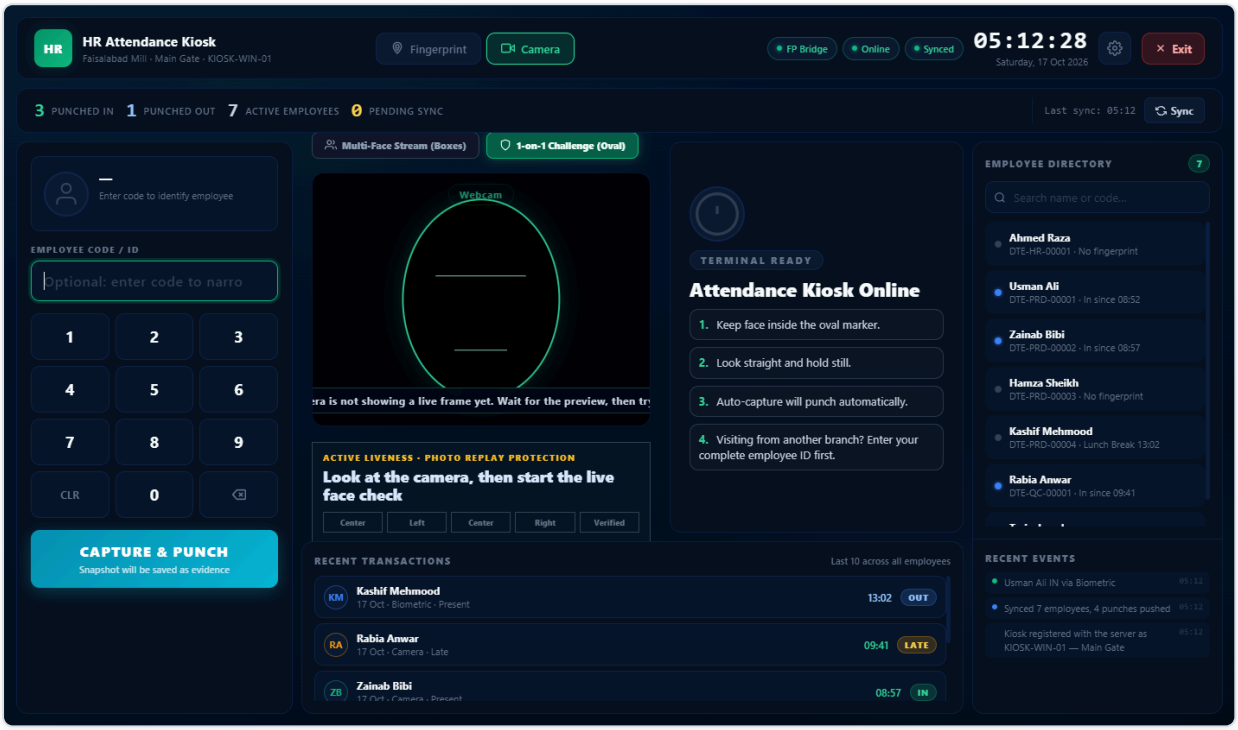

**Camera tab, Multi-Face Stream.** Each face gets a box with a name and status. (The picture was taken without a webcam.)

1. On the **Camera** tab choose **Multi-Face Stream (Boxes)**.
2. Walk up and look at the camera for a moment. Each face gets a box; when recognised it shows your name and **PUNCHED IN · time** or **PUNCHED OUT · time**.

| Label on the face box | Meaning |
|---|---|
| Aligning face… / Verifying 1/3… | Hold still, looking at the camera. |
| PUNCHED IN / PUNCHED OUT · time (green) | Done. |
| Already Recorded (blue) | You punched in the last few minutes; nothing more to do. |
| Face not enrolled · See HR | Your face is not enrolled (or must be enrolled again). See HR. |
| Ambiguous · Enter Code | Your face looks too similar to someone else's. Type your employee code, then look at the camera. |

| | |
|---|---|
| Not recognized | No match, or the face matched someone already shown on screen. Step forward one at a time. |
| Look at camera · Hold still | Face turned away, too small or moving. |
| Sync kiosk in Settings | The kiosk has no employee data. Press Sync or register it. |

## With your face — one at a time (1-on-1 Challenge)

**1-on-1 Challenge (Oval)** with the head-turn liveness steps.

1. Choose **1-on-1 Challenge (Oval)**. Only one person should be in front of the camera.
2. Put your face inside the oval and hold still (or press **CAPTURE & PUNCH**).
3. Follow the prompts: *Center your face → Turn LEFT → Return to center → Turn RIGHT → Live person verified*. A photo is saved as evidence.

## Choosing a reason when you go out

When you punch while already IN, the kiosk asks **Select Checkout Reason**. Tap one (or press its number):

| Short break — your next punch is a **return** | Ends your day |
|---|---|
| 2 Lunch Break · 3 Tea Break · 4 Official Duty · 5 Client Meeting · 6 Site Visit · 7 Personal Work · 8 Medical Appointment · 12 Prayer | 1 End of Shift · 9 Emergency Leave · 10 Half-Day Leave · 11 Sick Leave |

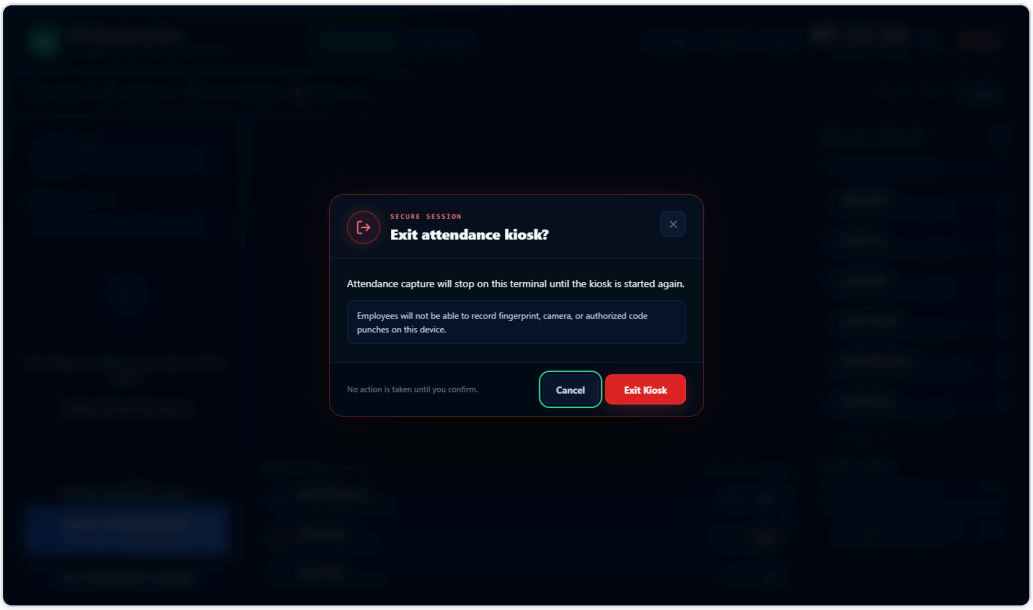

After a day-ending reason, punching again shows *Attendance is already completed today…*. Ask HR if it needs correcting.

## Staff from another branch

Use the **Camera** tab, type your **complete** employee ID first, then complete the face check. This needs internet; fingerprint cannot be used for another branch.

# G5 Internet problems, syncing and exiting

- Every punch is saved on the PC first and then sent to the server. If the internet is down, punches wait (**Pending Sync** above 0, **Synced** light amber) and are sent automatically every 5 minutes, or when you press **Sync**. The server accepts waiting punches up to 8 days old — fix internet problems quickly.
- New employees, faces and fingerprints reach the kiosk at the next sync.
- If the sync line says *Not registered — open Settings to register this kiosk*, register it again (section G3). This also happens if an administrator clicked **Disconnect**.
- To close the kiosk, click **Exit** and confirm **Exit Kiosk**. Attendance cannot be recorded until it is started again.

**Exit attendance kiosk?** Nothing happens until you confirm.

# G6 Kiosk problems and messages

| Message | What to do |
|---|---|
| *Camera Is Busy* | Close other programs using the webcam (Teams, Zoom, browser, the HR enrollment page) and try again. |
| *Camera Unavailable — permission was denied* | Windows Settings → Privacy → Camera → allow desktop apps; restart the kiosk. |
| *More than one face detected…* | 1-on-1 mode needs exactly one person in view. |
| *Camera locked after repeated failures…* | Wait 30 seconds or use the fingerprint. |
| *Please wait … seconds before punching again.* | Punches less than 2 minutes apart are ignored. |
| *Fingerprint not recognized. Please try again.* | Clean the reader and finger; press flat; use the enrolled finger. |
| *No fingerprint templates were found…* | Press Sync; check registration; ask HR to enroll fingerprints. |
| *Fingerprint reader is unavailable.* / FP Bridge red | Reconnect the reader; click Check Biometric Driver Host in Settings. |
| *That month is locked for payroll.* | The punch is for a month already closed — HR must correct it as an adjustment. |
| *This employee account is terminated / suspended.* | Contact HR. |

# G7 Using an Android tablet or phone as a kiosk

1. Install the mobile app on the tablet (section F1).
2. Sign in with a **Kiosk Terminal** account (not an employee's). The screen turns sideways and fills the whole screen in kiosk mode, opening straight on face recognition.
3. Tap the gear to open **Mobile Kiosk Settings**: set the Terminal ID, location and assigned branch (or company-wide), and whether to punch automatically when one face is centred. Tap **SAVE KIOSK SETTINGS**.
4. Employees stand in front of the camera. Choose **Multi-Face Stream** (walk-in, several people) or **1-on-1 Liveness** (one person, head-turn check). A success screen says **ACCESS GRANTED** and *Welcome …* *Check-In registered at ….*
5. To leave kiosk mode, open the gear and tap **LOG OFF / EXIT KIOSK**.

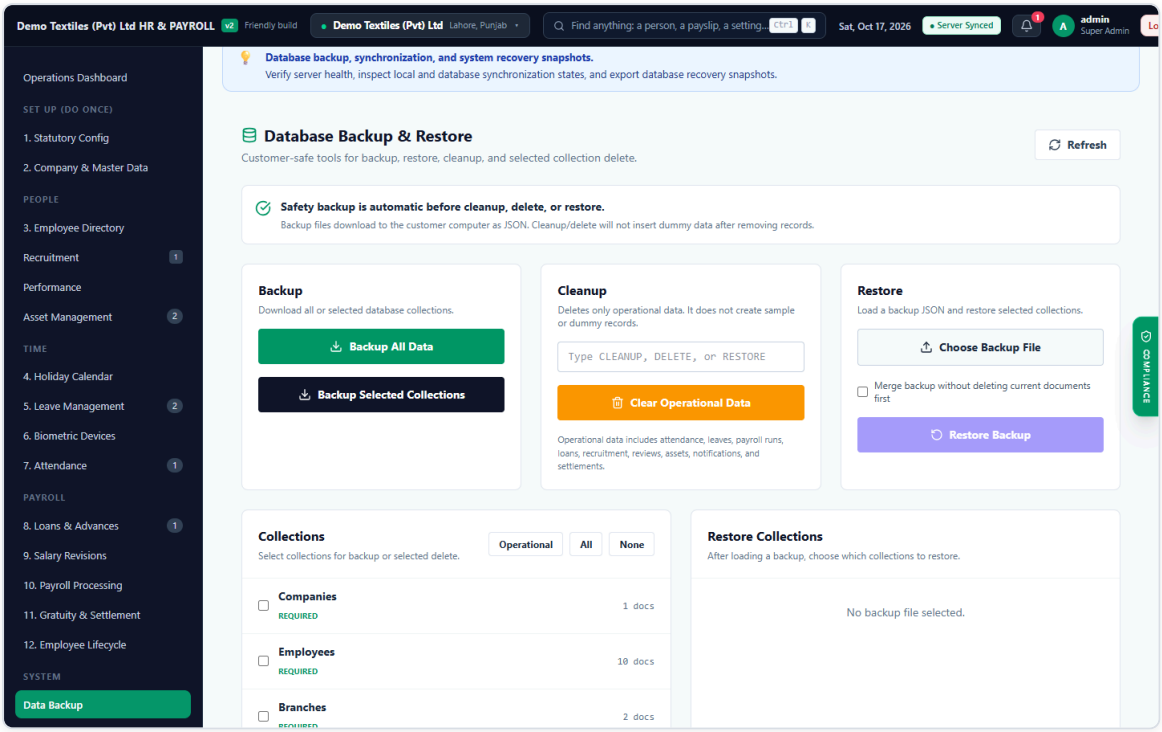

Buttons in the tablet settings: START / RETRY CAMERA, ANDROID CAMERA PERMISSION (opens the app permissions) and FLUSH LOCAL WEB CACHE (does not delete saved attendance).

PART H

# Looking after your data

Backups and restoring. For administrators only.

# H1 Data Backup

**Database Backup & Restore.**

## Make a backup (do this at least weekly, and before any big change)

1. Open **Data Backup** (under SYSTEM).
2. Click **Backup All Data**. A file named *database-backup-…-full.json* is downloaded.
3. Store it somewhere safe and private (for example an encrypted company drive), because it contains salaries and CNICs.

To back up only some lists, tick them in **Collections** (or use the Operational / All / None buttons) and click **Backup Selected Collections**.

> **Good to know**
>
> This screen backs up the main lists (employees, attendance, leave, loans, payroll runs and so on). Your IT person should also keep full server backups of the database, which include everything (payslips, approval history, audit log).

## Restore from a backup

1. Click **Choose Backup File** and pick the backup file.
2. Tick the lists to restore. Tick **Merge backup without deleting current documents first** if you only want to add back missing items.
3. Type the word **RESTORE** in the confirmation box and click **Restore Backup**.

**Warning — Clear and Delete buttons**

**Clear Operational Data** (type CLEANUP) and **Delete Selected Collections** (type DELETE) remove data permanently. A safety backup is taken first, but only use these with your IT person, for example when removing test data before going live. Payroll runs, payslips and approval records can never be deleted.

PART I

# Help & answers

Quick answers to common questions and problems, and the meaning of words used in this guide.

# I1 Frequently asked questions

**I changed a tax rate but payroll still uses the old one.**

Rate changes are proposals until a second person approves them in 1. Statutory Config (section B1).

**The Approve button is grey.**

You prepared this item, so someone else must approve it. Move the mouse over the button to read why.

**Payroll says the register must be locked, but I locked it.**

Something changed after locking (new attendance, leave, a holiday). Click Reopen Register, give the reason, check, and lock again.

**An employee is missing from payroll.**

Only Active and On-Leave employees are included. Check their status, and that their joining date is before the month ends.

**An employee's tax looks wrong.**

Check the tax slabs (rates typed as percentages, e.g. 11 for 11%), the tax year and effective date, the employee's prior-employer income and tax (for mid-year joiners), and their perquisites. Use the payslip's tax panel (taxable income so far, projected yearly income) to follow the calculation.

**A kiosk does not recognise someone.**

Check the face box label (section G4). Most often the face needs enrolling again (section D2), the kiosk needs a Sync, or the light is poor.

**Two people were recognised as the same person.**

This was a problem with the old face method and is fixed by the October 2026 upgrade. Make sure every kiosk runs version 1.0.2 or later and that every face has been enrolled again.

**An employee cannot see the Attend tab in the app.**

Phone attendance needs a mobile-duty assignment for that day (section D3). On normal days they use the kiosk.

**An employee cannot see their payslip in the app.**

Payslips appear only after the month's payroll is marked **Disbursed**, and only if their login is linked to their employee record.

**Someone forgot their password.**

An administrator resets it in User Management → Edit → Reset password, after confirming their identity (section B5).

**Someone lost the phone with their authenticator app.**

Two administrators reset their MFA in User Management → MFA recovery requests (section B5). Then the person sets it up again.

### How do I give a new employee a mobile login?

Add them in 3. Employee Directory, then in User Management create a login with role Employee and link it to their name (section B5).

### Where do I change working hours, Ramadan or Friday timings?

On each employee's record (3. Employee Directory → Edit Record). Enter Ramadan dates every year.

### Can I import employees from Excel?

Not at present; employees are added one by one with Onboard Employee.

# I2 Common messages and what to do

| Message | Meaning and action |
|---|---|
| *Your secure session expired. Please sign in again.* | You were inactive too long. Sign in again. |
| *Access Denied* | Your role does not include this page. Ask your administrator. |
| *Maker-checker control: …* | You cannot approve your own work, or the item was already decided. Ask a colleague. |
| *Kindly fill in all required fields.* | A required box (marked *) is empty. |
| *CNIC format must be valid (e.g. 42101-1234567-3)* | Type the 13 CNIC digits. |
| *Mobile Contact must start with +923…* | Type the mobile as +923XXXXXXXXX. |
| *Employee code must start with … (company prefix).* | Tick Auto, or start the code with your company prefix. |
| *IBAN must be a valid 24-character Pakistan IBAN.* | Copy the IBAN from the bank letter — PK + 22 characters. |
| *Approval blocked: … leave balance …* | Not enough leave days. Record the extra as Unpaid leave. |
| *Attendance period cannot be locked: N exception(s) require review.* | Clear the review box in 7. Attendance. |
| *Payroll refused: …* | See the table in section E4, step 3. |
| *Configure a bank file template in Statutory Config first.* | Set up your bank's file layout (section B1). |
| *Sync Warning* in the top bar | Some data did not load. Refresh the page; if it continues, tell your IT person. |
| *Allow pop-ups to open the printable document.* | Allow pop-ups for this site in your browser, then click again. |

# I3 Routines at a glance

### Every day

- ☐ Check the dashboard's Manager Approval Inbox and Compliance alerts.
- ☐ Decide attendance corrections and leave requests.
- ☐ Check that each kiosk's Online and Synced lights are green.

### Every month

- ☐ Follow the month-end checklist (section E1).
- ☐ File FBR, EOBI and social-security returns; record the FBR CPR.
- ☐ Make a backup (section H1).

### Every year

- ☐ Before July payroll: new tax year, tax slabs and rates — proposed and approved (section B1).
- ☐ Add next year's public holidays, including Eid dates when announced (section B4).
- ☐ Update Ramadan dates on employee records.
- ☐ Issue section 149 salary tax certificates (section E4).

### When people join or leave

- ☐ Joiner: add the employee, enroll face/fingerprint, create a mobile login if needed, complete the onboarding checklist.
- ☐ Leaver: Trigger Exit → second-person approval → collect assets → process and pay the settlement → switch their login to Inactive.

# 14 Words used in this guide

| Word | Meaning |
|---|---|
| Approve / maker-checker | One person prepares a change, a different person checks and approves it. |
| Attendance register | The day-by-day record of each employee for a month, used by payroll. |
| Lock (certify) register | Freeze a month's attendance so payroll can use it and nobody can change it silently. |
| Payroll run | The salary calculation for all employees for one month. |
| Draft / Approved / Disbursed | A payroll run that is prepared / checked by a second person / actually paid. |
| Bank advice / bank file | The list of salary payments uploaded to the bank's portal. |
| Punch | Recording arrival (IN) or departure (OUT). |
| Kiosk | A PC or tablet at the entrance where employees punch with face or fingerprint. |
| Liveness check | Turning the head left and right so the system knows a real person is present, not a photo. |
| Enroll | Saving someone's face or fingerprint so they can be recognised. |
| Sync | The kiosk exchanging data with the server. |
| Geofence | The area around a branch where phone punches count as on-site. |
| Mobile duty | Permission for an employee to punch from their phone on given dates. |
| Regularization | A request to correct a missed or wrong punch. |
| MFA / two-step verification | Signing in with a password plus a 6-digit code from your phone or email. |
| CNIC | Computerised National Identity Card number (13 digits). |
| NTN | National Tax Number from FBR. |
| IBAN | International bank account number — 24 characters starting with PK. |
| EOBI | Employees' Old-Age Benefits Institution — pension contributions (employee 1%, employer 5% of the minimum wage, by default). |
| PESSI / SESSI / provincial social security | Provincial employee social-security contributions (Punjab, Sindh, KP, Balochistan, ICT). |
| FBR | Federal Board of Revenue — income tax. |
| CPR / PSID | Payment receipt number for tax deposited with FBR. |
| Section 149 certificate | The yearly certificate of salary and tax deducted, given to each employee. |
| Gratuity | A lump sum paid when an employee leaves, based on years of service. |
| Final settlement | Everything owed to a leaving employee: gratuity, leave encashment, notice pay, pending salary, minus loans. |

| | |
|---|---|
| Arrears | Money owed for past months (for example a back-dated increase), paid in the current month. |
| Provident fund (PF) | Savings fund; employee and employer each contribute a percentage of basic pay. |
| Perquisite | A taxable benefit such as a company car or accommodation. |

**About this guide**

Edition 17-Oct-2026, written for the web portal, mobile app and kiosk version 1.0.2 and later. The screenshots show an imaginary company with made-up people and amounts. If a screen looks different from this guide, your system may be newer — ask your administrator for the latest edition.
